

JONES

SEASON 2021/2022

SOMETIMES IT ALL LINES UP.

You're at the perfect spot on the planet at the perfect moment in time. You pick the perfect line and you place every turn in the perfect location with effortless precision, power and grace.

To achieve this perfection in the mountains requires years of commitment to the craft. It also requires being perfectly in sync with your equipment. Your board, bindings, boots, backpack and apparel must all be in harmony with your movements, acting as one like a natural extension of your body.

For over ten years we have developed snowboards with the goal of helping riders achieve such perfect experiences in the mountains. We make snowboards for every condition and every riding style because there are no rules to perfection. Perfection is a feeling that evolves with the snow conditions, the terrain and your skills.

When we started making bindings our mission was the same as our snowboards - make bindings that helped riders make the perfect turn. Season after season we have pushed our binding development towards this goal and our 21/22 binding collection is the closest to perfection we've come yet.

But if you are freezing cold, dripping with sweat, or soaked to the bone, having the perfect board and bindings is irrelevant. This is what led us to take the biggest leap we have taken since the foundation of the company. After three years of relentless R&D, we are proud to introduce the debut of Jones Outerwear.

Our goal with Jones Outerwear is to do things differently, and develop new winter apparel concepts that blend comfort, performance and sustainability in a fresh look and functional fit. With a laser focus on essentials and a clear intention for each piece, we designed three unique, movement focused kits that will keep you cool, dry and comfortable through a wide variety of conditions and objectives.

The Jones Outerwear development process mirrored how we make our boards - work with the best people, years of test/tweak/repeat, countless prototypes, and learn from the leaders of the industry while keeping an open mind that there is always a better way to do things.

We are not in business to put our logo on more products. We are here to bring new equipment and apparel concepts to the world that balance unmatched performance and durability with industry leading sustainable manufacturing and material standards. We're also here to help fight for clean air, clean water and a healthy planet by leveraging our success to support and promote environmental causes.

From what's under your feet to what's on your back, every product in the Jones 21/22 collection is purpose built to be perfect for its intended use. So when you zip up, strap in, and drop in, you can forget about your gear and focus all your attention on having the perfect day in the mountains.

INTRODUCING OUTERWEAR

Environmentally minded and movement focused technical gear built to embrace all of Mother Nature's moods.

SHRALPINIST *collection*

Equipment for the unknown

The Shralpinist collection. Next level outerwear for next level adventures.

UPHILL *collection*

Rapid ascent apparel

The Uphill collection. No compromise outerwear for dynamic days in the mountains.

MOUNTAIN SURF *collection*

The rad, cozy kit

The Mountain Surf collection. Every day, any day outerwear so comfy you can live in it.

The evolution continues

New Hanger 3.0. Wider binding footprint for better boot fit + more power.

110% freestyle float

New Mind Expander Twin, the trick friendly surf slasher.

Son of the Surf Series

New Storm Wolf. A Storm Chaser that rips turns like a Lone Wolf!

Triple strength connection

New Jones exclusive Karakoram 3C clips. Our lightest, most powerful split clips ever!

Cutting edge clips

All splits now feature Karakoram Ultra clips or new Ultra 2.0 or Jones exclusive 3C clips.

Call me Koroyd

New high tech core material. Our lightest, dampest core material ever!

Full camber for real

New Aviator 2.0. The second coming of the resort razor.

Meet the Meteorite

New all-mountain binding. Epic performance, super tweakable flex.

A Stratos for all

New Women's edition of the all-mountain marvel.

Plush power

New Power Spine Ankle Strap. 3D-molded for ultimate comfort and response.

Power Plates

The future of high performance wood core tech is here.

ETHICS

Our mission

Design innovative mountain gear that sets new performance standards and be a leader in manufacturing sustainability, environmental outreach, and backcountry education.

If only snowboard gear grew on trees, born from simply seed, soil, water, and sunshine, with a rogue root pushing up the sidewalk as their only impact. Manufacturing snowboards, outerwear, or any of the gear we make, demands resources with a more complex footprint than a fruit tree, but that doesn't stop us from holistically tending to our production like an orchard.

We start with unique ECO-performance designs, the seeds of our products, that utilize innovative sustainable materials whenever possible. Our partner factories are our rich soil, cutting edge facilities where our designs come to life while providing steady employment and social stability to the workforce. The water and energy we use is never taken for granted and we strive to minimize our carbon footprint by analyzing the environmental impact at every stage of our products' life cycle and investing in renewable energy.

We are very proud of the fruits of our labor. We make performance standard setting products that unlock limitless potential for human creativity and well being. We also give back to the global community through jobs and donations to environmental non-profits. No doubt there will be challenges as we work to make our garden ever greener, but we're excited to share our successes and failures publicly. We've got nothing to hide in our orchard. Every business decision we make is firmly rooted in our desire to grow the sweetest, most sustainably produced snowboards, outerwear and backcountry gear we can.

Environment non-profit partners

Our quest to improve the sustainability of our products is only one facet of our environmental efforts. We strive to take real action against climate change through our partnerships with the non-profit organizations 1% For The Planet, Protect Our Winters (POW), and Community Carbon Trees (CCT), plus public fundraising campaigns that help support them.

1% For The Planet

1% For The Planet is a growing association of businesses that have pledged to give 1% of their sales directly to sustainability-oriented non-profits. The mission of 1% For The Planet is to leverage this alliance of financially committed businesses to support a healthy planet.

"We understand that supporting environmental efforts is important to our customers," said Jeremy Jones. "As a member of 1% For The Planet our customers are assured that their support goes beyond just our profits. We are proudly accountable for giving back to the earth."

1% For The Planet member companies support thousands of non-profit organizations helping to save land, protect forests, rivers and oceans, make agricultural and energy production more sustainable, get toxins out of the environment, plastics out of the oceans and more. 1% for the Planet carefully vets each nonprofit for track record, credibility and impact and annually verifies that members are making their contributions. More than \$100 million dollars has been invested by 1% for the Planet members in the last ten years.

More information on:

www.onepercentfortheplanet.org

Protect Our Winters

Protect Our Winters is a climate change organization founded by Jeremy Jones in 2007. The mission of POW is to engage and mobilize the winter sports community to lead the fight against climate change. POW is the environmental center point of this global community and unites brands, athletes and communities towards a common goal of reducing climate change's effects on our sports and local economies. The collective power of the winter sports community is massive and POW helps organize the effort to step up and take responsibility to save a season that fuels our passions and provides jobs and economic vitality to mountain regions.

Jones' 1% For The Planet donation to POW is used to support their efforts to push climate change legislation in Washington D.C., fight coal exports in the Pacific Northwest, and promote climate change awareness campaigns such as the **Outdoor State**, a new campaign that connects like-minded outdoor enthusiasts and gives them the tools to let their voices be heard as climate change activists.

More information on:

www.protectourwinters.org

Community Carbon Trees (CCT)

Community Carbon Trees (CCT) fights against climate change by reforesting clear cut swaths of Costa Rican rainforest with a wide diversity of native tropical trees. The reforestation and protection of trees is truly an important step toward the mitigation of climate change as forests pull carbon dioxide from the atmosphere and recycle it into oxygen. The benefits of reforestation in Costa Rica are greater than most other places on Earth because tropical trees are able to grow 365 days-a-year thanks to Costa Rica's unique location within 10 degrees of the Equator.

With our total donations to CCT, Jones Snowboards has supported the planting of 9000 trees on a previously deforested cattle ranch surrounding a stunning waterfall. The trees are now 3-5 years old and the forest is already flourishing with secondary growth and wildlife.

introducing OUTERWEAR

Welcome to Jones Outerwear

Environmentally minded and movement focused technical gear built to embrace all of Mother Nature's moods.

Jeremy Jones' ultimate all-weather outerwear line that balances unmatched performance and durability with industry leading sustainable manufacturing and material standards. From expeditions, to all-day lift lapping and backyard thrashing, the Shralpanist, Mountain Surf and Uphill collections got you covered no matter where you roam or how you ride. Jones apparel is the future of environmentally minded, movement focused technical gear built for pushing your limits and erasing boundaries.

in all conditions."

CREATIVITY

I started with a blank piece of paper with a laser focus on the essentials.
The result is a line of purpose built apparel perfect for shred adventures from November
to June. From backyard pow surfing, to off the map adventures and bell-to-bell resort
days, this is what I wear in the mountains through arctic cold fronts, atmospheric
rivers, tent crushing storms and sun scorched approaches.

OUTERWEAR ETHOS

We believe there is a better way.

A better way to manufacture apparel so it does less harm, and lasts longer. A better way to protect yourself from nature's wrath without sacrificing comfort, mobility and breathability. And a better way to get more versatility out of fewer pieces, to design clothing that adapts to nature's moods.

When we set out to start making apparel this is what drove us. To do things differently, and bring new winter apparel concepts to the world that blend comfort, performance and sustainability in a fresh look and fit. Every piece in the collection is purposefully designed to be extremely functional to help you unlock your wildest dreams in the mountains.

Every piece in the collection is also built with the most sustainable materials possible. All of our materials are Oeko-tex and/or Bluesign certified, and a vast majority are recycled. We use only 100% organic cotton, 100% recycled down and 100% non-mulesed merino wool. We also use PFC-Free DWR treatments on all our fabrics, except for GORE-TEX PRO. DWR is a necessary evil of waterproofing and GORE-TEX PRO does not yet offer a PFC-Free DWR option. When they do, we will use it.

The social impact of our products is equally important to us as the environmental impact. **Our production facilities are all BSCI or WRAP certified, which guarantees that the people who make our apparel receive fair salaries and that they can work in a safe and clean working environment.** As a member of 1% For The Planet, every tee, jacket or pant we sell also gives back and helps protect clean air, clean water and a healthy planet.

This is not about putting our logo on more products. From upcycled down to body mapped GORE-TEX PRO, this is about making cutting edge apparel that performs just like we move through the mountains - with complex simplicity. One foot in front of the other, but no wasted steps, and no wasted energy. This is apparel we believe in every step of the way.

PROUD MEMBER OF

Body mapped performance

The Shralpinist and Mountain Surf Collection feature body mapped fabric designs that are abrasion resistant in high contact areas and super breathable in high output areas.

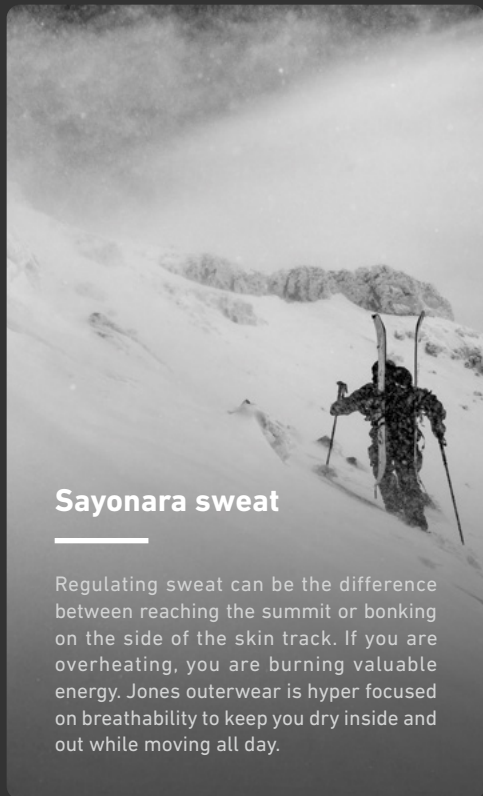

High volume pockets

All jackets feature thoughtfully placed pockets for storage that doesn't impede movement including large internal pockets for stashing skins, goggles or gloves.

The Re-Up revolution

The first puffy in the world made with 100% recycled fabrics and 100% upcycled 750-fill down.

Sayonara sweat

Regulating sweat can be the difference between reaching the summit or bonking on the side of the skin track. If you are overheating, you are burning valuable energy. Jones outerwear is hyper focused on breathability to keep you dry inside and out while moving all day.

Safety features

Avalanche safety is a top priority at Jones. The 5 Red Flags and an Avy Rescue Checklist are printed in our jackets and every piece is equipped with Recco.

Dynamic Recycled fabric

Jones exclusive 100% recycled, four-way stretch soft touch fabric developed with Teijin that offers unheard of 20K waterproof / 40K breathability ratings. The perfect fabric for splitboarding!

Next level GORE-TEX Pro

Gore Tex Pro is the ultimate fabric for extreme conditions. The Shralpinist collection combines the most rugged Gore-Tex Pro available and the most breathable Gore-Tex Pro available in a groundbreaking body mapped fabric layout.

Mountain modern fit

Refined snowboard fits that are cut for movement and balance comfort, performance and style.

Sustainable performance

From fabrics to cord locks to zippers, we source high performance recycled materials wherever possible.

Lifetime guarantee

We back our quality 110%. All Jones outerwear is guaranteed against defects in materials and workmanship for life.

Shralpinist 3L GORE-TEX PRO jacket NEW

EQUIPMENT FOR THE UNKNOWN

Ideal for alpine adventures in extreme conditions

Mother Nature can be ferocious. And when breaking new ground in the mountains, you gotta be ready to deal with it. "Full value" conditions are part of the game. From extreme winds and pounding snow to driving rain, the Shralpinist 3L GORE-TEX PRO Jacket will keep you comfortable in uncomfortable situations, so you can give the mountains the focus they demand. What makes this jacket so unique is its groundbreaking, body mapped GORE-TEX PRO fabric design. The hood and arms, where you get wet, are made with the most rugged GORE-TEX PRO fabric available, and the torso, where temperature regulation is critical, is made with most breathable GORE-TEX PRO fabric available, made with 100% recycled nylon face fabric with solution dyed backer. Balancing comfort, durability and sustainability with an ergonomic fit, the Shralpinist 3L GORE-TEX PRO Jacket is designed for pushing your limits and embracing the unknown.

FIT DESIGN Regular | Relaxed yet engineered fit. Ergonomically cut for precise articulation while climbing and riding.

Shralpinist 3L GORE-TEX PRO pants

NEW

EQUIPMENT FOR THE UNKNOWN

Ideal for alpine adventures in extreme conditions

To make the impossible become possible you need equipment that's ready to handle anything the mountain throws at you. The Shralpinist 3L GORE-TEX PRO Pant is built for no limits, no boundaries shredding in the harshest conditions. What makes this pant so unique is it's groundbreaking, body mapped GORE-TEX PRO fabric design. The seat and knees, where you need protection while climbing or sitting, are made with the most rugged GORE-TEX PRO fabric available, and the insides of the legs, where heat is generated as you move, are made with the most breathable GORE-TEX PRO fabric available, made with 100% recycled nylon face fabric with solution dyed backer. Balancing comfort, durability and sustainability with an ergonomic fit, the Shralpinist 3L GORE-TEX PRO Pant is designed for pioneering adventures in extreme conditions.

UPHILL

COLLECTION

HIGH PERFORMANCE FOR HIGH ENERGY ADVENTURES

We want to explore deep into the mountains.

Jeremy Jones built the Uphill collection for foot powered backcountry adventures that demand long days, covering huge amounts of terrain, through ever changing weather. Featuring cutting edge, stretch breathable fabrics, the Uphill collection is designed to keep you cool and comfortable when you're moving, and warm and dry when you stop, so you can focus all your energy on chasing summits and sending lines.

Peak Bagger Jacket

NEW

HIGH PERFORMANCE FOR HIGH ENERGY ADVENTURES

Ideal for high output backcountry touring

When it comes to gear, we are not a fan of compromises. To hike and explore to our full potential we need waterproof AND breathable outerwear. The Peak Bagger Jacket is a lightweight jacket with a tailored fit that's built for dynamic days in the mountains. Made for dark starts straight through to afternoon squalls, the Peak Bagger is made with a Jones exclusive fabric developed with Teijin that offers remarkable four-way stretch, 20K waterproof / 40K breathable performance. The fabric is soft to the touch, abrasion resistant, 100% recycled and excels in all conditions, whether cold, wet or warm. Set your pace and go big with perfect all-day temperature regulation in this jacket that's designed to keep you dry all day, inside and out

Jones-exclusive four-way stretch soft touch fabric developed with Teijin that offers groundbreaking 20K waterproof / 40K breathability. Made with 100% recycled polyester, 40D knitted face fabric and PFC-free DWR.

Mountain Surf Parka NEW

ALL-CONDITIONS VERSATILITY, EVERY DAY COMFORT

Ideal for all-day adventures in any conditions

The Mountain Surf Parka is the super comfortable, do everything jacket for shredders who want to ride-it-all. The parka features a relaxed fit and a high performance, body mapped fabric layout that uses two unique recycled polyester fabrics. The hood and arms, where you most often get wet, are made with rugged, abrasion resistant 20K waterproof / 20K breathable ripstop fabric, and the torso, where temperature regulation is critical, is made with four-way stretch 20K waterproof / 20K breathable fabric. The Parka is also lightly insulated with Primaloft Bio and lined with 100% recycled stretch polyester for those chilly mornings waiting for first chair or leaving the trailhead before dawn. From frigid storm days to warm bluebird days, the Mountain Surf Parka offers the warmth and breathability to ride hard and stay dry any day of the season.

Neckwarmers

Jones neckwarmers are made with Repreve, a unique 100% recycled lightweight polyester. Repreve is primarily made from recycled plastic bottles and is certified to contain 80% post-consumer recycled content (plastic bottles) and 20% pre-consumer recycled polyester content (factory material scraps).

New for 2022, we added a new heavier quality, which is made of 92% recycled polyester and 8% Elastan.

BACKPACKS

Modern designs, made for movement.

When you are one with your pack in fit and function it is a game changer. You move faster and conserve energy to ride stronger when your food and water are close at hand and your gear is locked down tight. We live and breathe backcountry snowboarding so we design our packs to be perfect for what we do. Jones packs are built to feel like a natural extension of your body as you move through the mountains. The DSCNT packs and the Minimalist were designed for riding dynamic technical terrain. They include all the features you need for efficient backcountry travel contained in a modern shape that disperses weight evenly over your entire torso to keep your center of gravity tight.

Packs features

Front and sides

- 1 Avy tools pocket *
- 2 Fleece lined goggle pocket *
- 3 Main pocket *
- 4 Side split-ski carry *
- 5 Vertical board carry *
- 6 Helmet holder *
- 7 Internal zipper pocket with key clip *
- 8 Ice axe loops *

* Available on: All Backpacks

DSCNT 32L

Ideal for long technical backcountry tours

The DSCNT 32L is designed for long tours and technical objectives that demand you carry the full kit. Featuring a streamlined rectangular shape that evenly distributes weight and volume over the center of your torso, the DSCNT 32L is built for both ascent and descent performance. The main compartment will easily swallow crampons, food, water and layers with separate accessory pockets and sleeves to organize your avy tools, skins, goggles, helmet, camera and keys. When it comes time to bootpack, vertical board carry straps plus side ski-carry straps allow multiple options for carrying your board and a back panel zipper to the main pocket provides access to your gear even with the board attached. The DSCNT 32L is built with PVC-free 450D nylon.

PACK FEATURES & TECHNOLOGY

- Avy Tools Pocket
- Fleece Lined Goggle Pocket
- A-frame Split-Ski Carry Mode
- Helmet Holder
- Internal Zipper Pocket with Key Clip
- Dual Ice Axe Loops
- Back Panel Cargo Access
- Thermo-Molded Foam Back Panel
- Dual Hip Belt Pockets
- Integrated Safety Whistle
- Ergonomic Comfort Shoulder Straps
- Hydro-Pocket with Insulated Sleeve
- Reflective Strap Accents
- Internal Aluminum Suspension Frame
- Hip Belt Gear Loop
- Avy Rescue Protocol Info Panel

DSCNT 32L R.A.S.

Ideal for long technical tours in avalanche prone terrain

The DSCNT 32L RAS pack is the ultimate tour pack for technical backcountry terrain. It has all the features of the DSCNT 32L pack plus the pockets that hold the MAMMUT Removable Airbag 3.0 system. The Removable Airbag 3.0 system allows you to use the pack with or without the airbag installed and utilizes compressed air instead of nitrogen so you can deploy the bag before a plane trip and then easily refill the canister at your destination (North American Canister Only). **Removable Airbag 3.0 system and canister sold separately by MAMMUT.**

PACK FEATURES & TECHNOLOGY

- Avy Tools Pocket
- Fleece Lined Goggle Pocket

DSCNT 25L

Ideal for intermediate backcountry tours

The DSCNT 25L is a mid-size touring pack designed to hold everything you need for a basic backcountry mission. The pack's contoured profile is purposefully designed for ascent/descent performance and keeps the weight of your gear evenly distributed in the center of your torso. The DSCNT 25L's highlight features include a main pocket with dual internal accessory pockets and a hydration sleeve, a dedicated avy tools pocket, a fleece lined goggle pocket, dual hip pockets, a stowable front panel helmet holder, a thermo molded back panel, reflective strap accents and a removable safety whistle. When it comes time to bootpack, vertical board carry straps plus side ski-carry straps allow multiple options for carrying your board. The DSCNT 25L is built with PVC-free 450D nylon.

DSCNT 19L

Ideal for sidecountry and quick tours

The DSCNT 19L pack is a sleek sidecountry and quick tour pack that's the perfect size for the bare essentials - avy tools, water, snacks and a layer. The pack's compact profile is designed to keep your center of gravity tight on the way down and your board locked to your back when you hit the bootpack. The DSCNT 19L's highlight features include a main pocket with an internal accessory pocket and avy tool sleeves, a fleece lined goggle pocket, a stow-able front panel helmet holder, a thermo molded back panel, a hydration sleeve, reflective strap accents and a removable safety whistle. All of the board straps and the hip belt can also be tucked away for streamlined use off the slopes. The DSCNT 19L is built with PVC-free 450D nylon.

Escape board bag

Ideal for road trips, bus, train and quick plane travel

The Escape Board Bag is a fully padded bag designed for basic travel trips with your shred gear. The Escape has room for multiple boards and surely more gear than you can fit under most airline's bag weight limit. The zippered exterior pocket is prime to hold a jacket, skins or any accessories you want quick access to and there's an ID pocket to keep your name on your hard earned equipment. Carrying the Escape through terminals and on to connecting boats, buses, taxis or trains is easy with dual side carry handles and a removable shoulder strap. The Escape is available in one size and fits up to a 166cm board.

PACK FEATURES & TECHNOLOGY

- Fully Padded Shell
- Water Resistant PVC-free Exterior Fabric
- Zippered Exterior Pocket
- Exterior ID Window Pocket
- Removable Shoulder Strap
- Side Carry Handle

SPECS

Size: H-20 / W-30 / D-170 - Fits up to a 166cm board
Weight: 1.28 kg
Color: Black
Fabric: PVC Free 600D Polyester

Adventure board bag

Ideal for long distance and plane travel

The Adventure Board Bag is a lightweight, fully padded roller bag built to carry your board and shred gear on long distance travel trips. The main compartment has compression straps to keep 1-2 boards locked down tight and a zippered pocket inside the top lid to hold gloves, goggles or apparel. Oversized wheels and a skid plate keep the Adventure rolling smooth through airport terminals or city streets and four exterior handles provide multiple options for carrying or lifting. The Adventure Board Bag is available in one size and fits up to a 166cm board.

PACK FEATURES & TECHNOLOGY

- Fully Padded Shell
- Water Resistant PVC-free Exterior Fabric
- Zippered Interior Pocket
- Exterior ID Window Pocket
- Top and Side Carry Handles
- Oversized Wheels and Skid Plate

Expedition board bag

Ideal for travellers and international explorers

The Expedition Board Bag is a fully padded roller bag built to carry multiple boards and gear to any snowy location on the planet. It's lightweight, high volume and tricked out with just the right amount of pockets and handles to handle any travel challenge you throw at it. The main compartment has reinforced straps to secure 2-3 boards plus two removable pouch pockets for carrying boots, bindings and avy gear. Small items can be stashed in the dual zippered pockets on either side of the top lid. On the exterior, dual compression straps keep your load solid and six carry handles allow you to pick it up from any side. Oversized wheels and a skid plate keep the Expedition rolling smooth from the terminal to the city streets. The Expedition is available in one size and fits up to a 166cm board.

BAG FEATURES & TECHNOLOGY

- Fully Padded Shell
- Water Resistant PVC-free Exterior Fabric
- Main Pocket Board Straps
- (2) Removable Pouch Pockets
- Zippered, Mesh Interior Pocket
- Zippered Exterior Pocket
- Exterior ID Window Pocket
- Dual Compression Straps
- Removable Shoulder Strap
- Dual Side, Top and End Carry Handles
- Oversized Wheels

BINDINGS

The ultimate balance of comfort and response

SKATETECH

Feel the power in every turn.

Don't let your energy go to waste. If you want to ride stronger you need a binding that directs every movement you make to your board edges with maximum efficiency and pinpoint accuracy. Jones bindings featuring SKATETECH technology are designed to deliver lightning fast response and supreme comfort for unmatched all-day performance.

REDUCE

*Foot fatigue
and board chatter*

ENHANCE

*Board control
and edge hold*

CUSTOMIZE

*Response
and dampening*

“ When I first tried SKATETECH (NOW Bindings) prototype bindings back in 2009, I tested them against the leading traditional binding on two identical boards with the same tune, same stance. I instantly felt the difference: more control, less chatter, less foot pain. Once I felt the power of SKATETECH, there was no going back. ”

— Jeremy Jones

3D Flex Fit toe straps

Low profile and grippy 3D Flex Fit toe straps that dynamically stretch to fit any shape boot. The spider web inspired design is comfortable, durable and responsive.

Hanger 3.0 NEW

New binding hanger design featuring a wider bushing footprint that's closer to the edges for enhanced board connection and faster energy transfer. The Hanger 3.0 is also lighter weight and has a lower inner lateral wall for better ankle mobility and high volume boot fit.

Intelligent straps NEW

New Hinge Connectors keep your ankle strap out of the way when you step in to strap in, and new Curved Ladders make it easy to line up the buckle and quickly ratchet down.

Power Spine ankle straps NEW

New two-part molded ankle strap with a wider bottom section for flexible comfort and a stiffer center spine for unmatched response. Flip-it Strap compatible (Freeride mode + Surf Mode).

Hanger 2.0

Hanger pivots on the Kingpin like a lever allowing lightning fast edge-to-edge energy transfer. True baseless design that delivers the most even board flex of any binding on the market.

Mid-wide strap

The Flip-It Mid-wide strap has a moderate size profile for balanced response and tweak-ability. It's built around a 3D-injected core for solid support and a foam wrap for even pressure distribution and lateral flexibility.

Features

Asym buckles

Bombproof buckles made from aircraft-grade alloy featuring ultra-strong levers and springs. Triple action ratchet design increases speed of entry and release.

4X4, 2x4, EST/Channel Disk NEW

All Jones bindings include a mounting disc compatible with traditional 4x4 inserts, 2x4, and the EST/Channel mounting system.

Foot pillows

Comfort Foam foot pillow

Full length EVA foam footbed that maximizes binding comfort while minimizing foot fatigue. The 3D molded footbed surface offers supreme traction for any boot tread pattern and prevents snow build-up.

Response Tri-Foam foot pillow

Premium full length foam footbed made with three different densities of EVA foam. The heel + toe are soft for max comfort, the center is mid-stiff for precise response and the bottom of the footbed is stiff for solid support.

Boot fit

MEN'S	SMALL	MEDIUM	LARGE
US	5-7.5	7-10.5	10-13
EU	36.5-40	39-43.5	43-47
MD	23.5-25.5	25-28.5	28-30.5

WOMEN'S	SMALL	MEDIUM
US	5.5-8.5	8.5-10
EU	36.5-40	39-42.5
MD	23.5-25.5	25-27.5

Durability

Designed for durability. Lifetime warranty on binding Hanger and Post. One year warranty on all other binding components.

Freeride mode vs Surf mode

Jones bindings offer customizable dampening and response by switching between Surf Mode and Freeride Mode. Surf Mode lets you tweak harder, while Freeride Mode keeps you locked in for maximum response. Switch modes by changing the bushings from soft (Surf Mode) to hard (Freeride Mode) and adjusting the Flip-It ankle straps. The Flip-It strap allows you to interchange the ankle straps between the left and right binding to create custom response. Ride with the ankle straps in Freeride mode for more lateral support and board response or flip the straps into Surf Mode for solid heel support, but more ankle flexibility for getting loose.

Freeride mode

- Position the wide half of the strap above the buckle for more lateral support and board response.
- Use Hard Bushings for maximum board response.

Surf mode

- Position the wide half of the strap below the buckle for solid heel support but more ankle flexibility for getting loose.
- Use Soft Bushings for a looser, more dynamic surf feel.

SKATETECH

Patented

The components of the SKATETECH design mimic the function of a skateboard truck. The "Hanger" acts as a lever that transfers energy input from the straps to the "Bushings" and onto the board edges. The "Kingpin" acts as the fulcrum for the "Hanger" and magnifies the energy transfer through leverage. Traditional bindings lose energy when the baseplate flexes and bends unevenly. The energy loss forces you to crank your straps tighter and ride with more forward lean to gain the same control. Uneven pressure and tight straps lead to more foot fatigue and pain. By evenly pivoting over the "Post", the middle of your board flexes more uniformly and your energy inputs are focused directly on your edge. Your feet stay more relaxed and more comfortable because the bindings transfer power to the board with less work.

① Hanger 2.0 and 3.0

Hanger pivots on the Kingpin like a lever allowing lightning fast edge-to-edge energy transfer. True baseless design that delivers the most even board flex of any binding on the market.

② Kingpin

The Kingpin is the fulcrum that the Hanger pivots on. Design magnifies energy transfer and enhances board response through leverage.

③ Post

The Post attaches the hanger to the kingpin and is the connection between binding and board.

④ Bushings

Bushings are the primary binding contact point and offer customizable response and dampening (Surf Mode and Freeride Mode).

Riding flat

SKATETECH bindings feature a built-in dampening system for ultimate control bombing flat on your base. The baseplate rests on rubber bushings that absorb vibrations as you ride over rough snow. The binding also follows your every foot movement without altering the flex of the board and offers unmatched board feel for making micro edge adjustments as you ride flat.

Unmatched turn power

Power is transmitted directly to the edge

When you make a hard heel or toe turn the force you place on your straps and highback is transferred directly to your edge through the hanger, kingpin and post. **By using the mechanical advantage of this pivot and lever system SKATETECH binding are the most responsive bindings in the world. Once on edge, you are locked in.**

No comparison to traditional bindings

Power is transmitted through the center disk.

When you make a hard heel or toe turn on traditional bindings the pressure you place on your straps goes into the fixed center disk and forces the binding baseplate to bend before power is delivered to the edges. **Energy is concentrated at the center of the board with traditional rigid baseplates which decreases potential turn power compared to SKATETECH bindings.**

Surf Series

Meteorite

NEW

THE DYNAMIC ALL-MOUNTAIN BINDING

Ideal for all-terrain cruising, freestyle and surf slashing

SKATE TECH

The new Meteorite binding is designed for the all-mountain rider that wants a stable and comfortable binding with a tweak-able medium soft flex. The Meteorite delivers precision response thanks to SKATE TECH technology that transfers your energy directly to your edges. The Meteorite's Dynamic Flex highback is stiff in the center for solid support and softer on the sides for friendly maneuverability. The Meteorite can be set up in Surf mode or Freeride mode by switching bushing and swapping the Flip-It ankle straps. Surf mode offers maximum tweak-ability, Freeride mode offers maximum response. To keep your boots locked in with no strap bite, the Meteorite features our stitched Flip-It Mid-Wide Straps that have a 3D-injected core for solid support and a foam wrap for even pressure distribution and lateral flexibility.

BINDING FEATURES

- Dynamic Flex Highback
- 3D Flex Fit Toe Straps
- Mid-Wide Flip-It Ankle Straps
- Asym Buckles
- Tool-less Strap Adjustment
- Hinge Connector Strap Attachment + Pre-curved Ladders
- Nylon, 50% Glass Fiber Post

THE POWERFUL AND PRECISE ALL-MOUNTAIN BINDING

Ideal for all-terrain freestyle and freeriding

SKATE TECH

The Mercury binding is designed for the all-mountain rider who needs supreme edge control and comfort balanced with a more maneuverable, medium stiff flex. The Mercury will respond instantly to your every move thanks to SKATE TECH technology that transfers your energy directly to your edges. The Mercury's Control Flex highback offers solid support while absorbing chatter and eliminating calf-bite. The Mercury can be set up in Surf mode or Freeride mode by switching bushing and swapping the Flip-It ankle straps. Surf mode offers maximum tweak-ability, Freeride mode offers maximum response. New for 21/22, the Mercury features our new Hanger 3.0 and Power Spine Ankle Straps. The wide bottom section of the Power Spine Strap is softer for enhanced comfort and the center spine is stiffer for ultimate response.

Apollo

UPDATED

THE ULTIMATE FREERIDE BINDING

Ideal for technical freeriding and high speed carving

SKATETECH

The Apollo binding is designed for the expert freerider who demands unmatched edge control, response and comfort. What sets the Apollo apart is the Flax Carbon highback that features a wide upper section that locks in your boot top on toe side turns. Matching the ultra responsive highback with SKATETECH technology offers a binding that will react to your every muscle twitch with lightning fast accuracy. The Apollo can be set up in Surf mode or Freeride mode by switching bushings and swapping the Flip-It ankle straps. Surf mode offers maximum tweak-ability, Freeride mode offers maximum response. New for 21/22, the Apollo features our new Hanger 3.0 and Power Spine Ankle Straps. The Hanger 3.0 is wider for high volume boots and has an expanded bushing footprint for even better energy transfer. The wide bottom section of the Power Spine Strap is softer for enhanced comfort and the center spine is stiffer for ultimate response.

BINDING FEATURES

SPLITBOARD POLES

Advanced ascent gear, built to last.

Collapsible poles are the four-wheel drive of your backcountry ascent gear. They keep you from slipping and sliding as you ascend the skintrack and give you solid balance in the bootpack.

Tech highlights

Scraper Grip

The Jones exclusive Scraper Grip has a hard plastic snow scraper built into an ergonomic EVA foam grip. Use the scraper to remove ice from your base and topsheet on the way up or down. The extended foam handle offers secure grip for multiple hand positions.

Snow Claw Basket 2.0

Our Snow Claw 2.0 baskets deliver exceptional traction on firm or soft snow and are easy to plant on any slope angle thanks to a unique basket attachment that floats relative to the pole shaft. The new Snow Claw baskets are stiffer for the firm days and have 25% more surface area for the super deep days. Baskets interlock with pole tips for a tighter pole package when strapped to your pack.

Floating Basket

Dynamic basket design that grips the snow at any slope angle by floating relative to the pole shaft at a maximum angle of 32°.

Talon

THE SIMPLE, SOLID POLE

Ideal for freestyle, freeriding and surf slashing

The Talon poles are ultra durable three-section collapsible poles designed for a lifetime of backcountry use and abuse. The Talon features our dual-density Scraper Grip that has a hard plastic snow scraper built into a comfortable EVA foam grip. The scraper can be used for de-icing your base before dropping in or knocking snow off your split skis on the ascent. The Snow Claw 2.0 baskets deliver exceptional traction on firm or soft snow and are easy to plant on any angle slope thanks to a unique basket attachment that floats relative to the pole shaft. The Talon's pole sections are made with 7075-T6 aluminum for maximum durability and the usable length is 105-135cm. Collapsed length is 61cm and the baskets interlock with the pole tips for a tighter package when strapped to your pack. Talon poles are covered by a three-year warranty. Made in Austria.

POLES FEATURES & TECHNOLOGY

- 3x Part Adjustable Pole
- Recycled Aluminum 7075-T6
- Dual Density Scraper Grip
- Ergonomic Padded Strap
- Powerlock 3.0 Mechanism
- Snow Claw Baskets 2.0 / Floating Basket

Talon Pro

THE STIFF, ULTRALIGHT POLE
Ideal for backcountry touring and extended expeditions

The Talon Pro Poles are ultralight three-section collapsible poles designed to offer unmatched performance and minimal carry weight. The Talon Pro features our dual-density Scraper Grip that has a hard plastic snow scraper built into a comfortable EVA foam grip. The scraper can be used for de-icing your base before dropping in or knocking snow off your split skis on the ascent. The Snow Claw 2.0 baskets deliver exceptional traction on firm or soft snow and are easy to plant on any angle slope thanks to a unique basket attachment that floats relative to the pole shaft. The Talon Pro's upper two sections are made with carbon to keep the poles light and stiff while the lower section is made with Titanal for added durability. The usable length of the Talon Pro poles is 105-135cm. Collapsed length is 61cm and the baskets interlock with the pole tips for a tighter package when strapped to your pack. Talon Pro poles are covered by a three-year warranty. Made in Austria.

CLIMBING SKINS

Skintrack proven.

All it takes is one hour in the skin track to realize the importance of solid climbing skins. High performance skins will not only deliver you to dream lines, but they will get you back to the trailhead safe and sound. Jones skins are made in Switzerland by Pomoca, one of the most trusted manufacturers in the industry. We've tested our skins over hundreds of hours in the skintrack and stand by both models as the premier splitboard skins in the world.

Jeremy Jones  Andrew Miller

Tech highlights

Made in Switzerland

Jones skins are made in Switzerland by one of the most innovative and trusted skin manufacturers in the world, POMOCA. For the last 40 years POMOCA has produced industry leading skins for high altitude ski mountaineering and randonee racing.

Glide Tech

Glide Tech coating reduces friction on each skin fiber so neither super-cold fresh snow or wet, hot snow will stick to the skin and rob energy-saving glide.

Rubber Safer Skins

Jones skins are laminated with a rubber backing that prevents skins from getting waterlogged. Drier skins are safer as they are less likely to lose adhesion to your skis in critical situations.

70% Mohair / 30% Nylon

Jones Nomad and Nomad PRO climbing skins are both made with a blend of 70% natural mohair fiber and 30% synthetic nylon. The mohair offers unmatched glide and a supple skin feel while the nylon improves grip and water repellency.

Grip Tech

Grip Tech skins are made with a special material that works well under dynamic tension and has a high resistance to twisting and abrasion.

Ever Dry (bluesign® approved)

Jones skins are treated with EVER DRY anti-glopping treatment. The coating keeps the skins from absorbing moisture and prevents snow/ice build-up under the skin.

Nomad

Ideal for backcountry touring and wilderness exploration

Jones Nomad Climbing Skins are premium splitboard skins that offer the ideal balance of glide, grip and durability. The Nomad skin fibers are 70% Mohair and 30% Synthetic Nylon. The natural mohair fibers deliver exceptional glide in any snow condition because they remain soft and flexible at any temperature. The nylon fibers provide extra traction when the skin track gets steep or icy and improved durability over 100% Mohair skins. Nomad skins are PFC-free and are coated with Bluesign-approved EVER DRY 3.0 Anti-glopping treatment to improve performance in wet snow. Jones Nomad PRO Skins are also laminated with RUBBER SAFER SKIN backing. This rubber layer keeps the skin from absorbing water and makes the skins easier to pull apart. Nomad skins are available in two models: Trim-To-Fit with Universal Tail Clip and Pre-Cut with Quick Tension Tail Clip. The Quick Tension Tail Clip adjusts in seconds, provides the perfect skin tension and is compatible with all Jones splitboards 2016 and newer.

Universal Tail Clip:

Trim-To-Fit Skin
Skin size: 140mm x 1450mm
Fits all Splitboard brands

Quick Tension Tail Clip:

Pre-Cut Skin / Nine Pre-Cut sizes
Fits all 2016 and newer Jones splitboards
(except Youth Splits)

SKINS TECHNOLOGY

- Rubber Safer Skins
- Ever Dry
- Grip Tech
- 70% Mohair & 30% Nylon

SKINS PACKAGE INCLUDES

Quick Tension Tail Clip:

One pair skins with Quick Tension Tail Clips attached / Two Backing Sheets / Skin Bag / Cheat Sheet

Universal Tail Clip:

One pair skins / One pair Universal Tail Clips / Four Rivets / Two Backing Sheets / Skin Cutter / Cheat Sheet / Skin Bag

Nomad Pro

Ideal for all-seasons, all-conditions backcountry touring

Jones Nomad PRO Skins are the ultimate high performance splitboard skins in any snow condition. The Nomad Pro skin fibers are a blend of 70% Mohair and 30% Synthetic Nylon fibers. This combination of natural and synthetic fibers provides the perfect balance of glide, grip and durability. Nomad Pro skins are PFC-free and have been coated with both Bluesign-approved EVER DRY 3.0 Anti-glopping treatment to improve wet snow performance and GLIDE TECH treatment which helps maintain the glide for the lifetime of the skin. Jones Nomad PRO Skins are also laminated with RUBBER SAFER SKIN backing. This rubber layer keeps the skin from absorbing water and makes the skins easier to pull apart. Nomad PRO skins are available in two models: Trim-To-Fit with Universal Tail Clip and Pre-Cut with Quick Tension Tail Clip. The Quick Tension Tail Clip adjusts in seconds, provides the perfect skin tension and is compatible with all Jones splitboards 2016 and newer.

Universal Tail Clip:

Trim-To-Fit Skin
Skin size: 140mm x 1450mm
Fits all Splitboard brands

Quick Tension Tail Clip:

Pre-Cut Skin / Nine Pre-Cut sizes
Fits all 2016 and newer Jones splitboards
(except Youth Splits)

INSTRUMENTS OF STOKE

Innovative designs for limitless riding progression

Every board in the Jones line is a unique high-performance design that rides the mountain in its own way. All shred equally hard, but no two models ride the same. Our 2021/22 collection is our most complete offering yet. From daily driver directional freeride boards to surf-inspired pow sticks, choose from twenty-five solid models and twelve splitboards all backed by a 2+1 year warranty.

At the end of this cycle, new products are born and new ground is gained. Is the time and money spent on development worth it? This question is never asked. **The price of not shooting for the stars is too high.**

No shortcut to great product.
Test, tweak, repeat.

ECO-PERFORMANCE

Performance focused, eco conscious

Balancing the qualities of performance, durability and sustainability is one of the most difficult aspects of snowboard design. We strive to use as many sustainable materials as possible, but we trust our lives to these boards so we must value performance foremost. Durability is a critical aspect of snowboard sustainability as the longer a board lasts, the less waste goes to the dump. This ECO-Performance design philosophy is the foundation upon which everything we make is made. We test new materials and production processes against these criteria and strive to make the most sustainable products possible without sacrificing performance or durability.

100% Solar energy

For our 2019/2020 snowboard line, standard electricity accounted for approximately 35% of the carbon footprint of our production cycle. By installing a massive solar array in May 2020, and switching our factory to 100% solar power, we reduced the carbon footprint of our 2020/2021 production cycle by 89%!

Using 100% solar power at our snowboard factory has saved over 350,000 Kg of CO₂ and electricity now accounts for only 6% of our production carbon footprint. The savings are equal to driving around the globe 27 times in an average car!

Factory audited: Health, Safety and Quality, Environmental Mgmt Systems.
Signed Jones Code of Conduct.

Free of harmful chemicals, respecting REACH and California Prop 65

857 KM

Recycled Sidewalls used

If we put them next to each other, the length of our recycled sidewalls spans the same distance from San Francisco to San Diego.

110,000 m²

Plastic topsheets saved

Put side by side, the area would represent 16 European soccer fields.

18,000 kg

Solvent varnish solved

The equivalent mass of 30 compact cars.

High powered binding to board connection

Skate Tech x Traction Tech = unreal response + edge grip

Jones SkateTech bindings and Jones Traction Tech edges are designed to work together. Matching the two technologies unlocks a new level of confidence boosting board feel in any snow condition. SkateTech drives power to your edges and Traction Tech locks you into turns of any size, shape or speed.

Traction Tech

Traction Tech Edges have 3 distinct sidecut points that work like a serrated knife to grip the snow without slipping. There is a point in front of each foot and one in the center of the board.

SKATE TECH

The SkateTech binding pivot system transfers muscle energy to your edges with maximum efficiency. Lean forward and step on the gas, or lean back and pump the brakes, SkateTech drives movements directly to your edges using mechanical advantage.

POWER PLATES

New wood core design featuring specially positioned dual-layer plates on both sides of the insert packs that help transfer energy, enhance board response and improve edge impact durability.

The bottom layer of the Power Plate is made from super responsive and sustainable Bamboo.

The top layer is made from rubber to improve dampening and reduce edge chatter under your bindings.

Designed to align with SKATETECH bindings to unlock even more turn power.

3D CONTOUR BASES

3D Contour Bases on splitboards

Feel the flow, up and down.

Select Jones splitboards now feature 3D Contour Bases. These models offer cutting edge board performance in variable backcountry snow conditions.

Making splitboards with 3D Contour Bases has been a monster undertaking. When we thought of the idea a couple years back we questioned whether it would ever be possible. Thanks to the full commitment of our engineers, we solved our biggest manufacturing challenge yet. The dream is now a reality and splitboard performance just took a huge leap forward. Once I started riding a new Solution with a 3D Contour Base I could not go back.

— Jeremy Jones

Available on: Solution, Ultra Solution, Ultracraft Split, Youth Solution and Mountain Twin Split

100%

of our snowboards
feature 3D Contour Bases

Free friction snowboarding

Next level technology for ultimate response.

Nobody wants a choppy and rough run. The descents you dream about are dynamic and smooth. Inspired by the rounded bottom contours of surfboards, 3D Contour Bases are designed to make every run smoother and every turn more effortless by reducing the drag of the board tips. 3D Contour Bases enhance glide and improve float helping you ride faster and with better flow.

"On a surfboard, the subtle shaping of the nose is what makes the entry into a turn so smooth and fluid. The feeling of an effortless surf turn is what inspired the development of our 3D Contour Bases. Instead of having to abruptly tip the board into a turn, 3D Contour Bases let you roll your edge into a turn. I've been on a quest to design a snowboard that offers the free friction glide and edge-to-edge fluidity of a surfboard for years. 3D Contour Bases cracked the code on how to achieve this next level of board performance."

— Jeremy Jones

Glide

3D Contour Bases enhance glide. The smooth radius of the nose and tail edges reduce friction at the contact points. With less friction and catch in the tips you can maintain more speed.

Flow

3D Contour Bases deliver unmatched turn flow and fluidity. Just like the nose and tail on a surfboard, the rounded tip and tail edges eliminate catch as you transfer pressure edge-to-edge. Turn initiation is effortless because you can roll the board on to the edge instead of tip the board on to the edge. Once on edge, camber and Traction Tech lock in your turn.

Float

When a board has good float it should feel effortless to keep your nose up through pow, crud or crust. 3D Contour Bases improve float by reducing the "plow effect" of your nose and tail edges. Instead of plowing through the snow, the rounded edges smoothly deflect the snow to the sides of the board which pops your nose up without having to lean back and burn out your back leg.

① Center

The center of the board is perfectly flat with no spoon bevel on the edges between the contact points. The flat base allows instantaneous edge engagement between the feet when you lean into a turn.

② Contact point

The spoon bevel starts at the contact point. The bevel increases very gradually so there is not an abrupt transition between the flat center of the board and the raised tip and tail edges.

③ Nose and tail edges

The spoon bevel is most defined at the tip and tail of the board. The rounded edges at the tips reduce edge catch and drag.

Riding flat

When riding flat, the spoon bevel on the edges is not engaged, but it does help smoothly deflect snow away from the nose of the board.

Turn initiation

As you begin to make a turn the spoon bevel helps you smoothly roll the board on to your edge with less friction and edge drag.

Mid-turn

In the middle of a turn camber and traction tech keep you locked onto your edge in the center of the board while the spoon bevel reduces the "plow effect" of your nose and tail edges.

The unique riding personality of each board in our collection demanded we develop multiple 3D Contour Base designs. Not every model would benefit from the same amount of spoon bevel. Each 3D Contour Base design is matched to the attitude of the board.

3D Contour Base 3.0

Freeride focused 3D Contour Base featuring a 7mm of spoon bevel in the nose and 0 to 7mm of spoon bevel in the tail. Spoon bevel starts at the rocker point.

DRAWING OF THE FLAGSHIP, SIZE 161

3D Contour Base 2.0

Moderate 3D Contour Base featuring an even balance of 4mm spoon bevel in the nose and 4mm spoon bevel in the tail. Spoon bevel starts at the rocker point.

DRAWING OF THE AVIATOR, SIZE 158

3D Contour Base 1.0

Subtle yet effective 3D Contour Base featuring an even balance of 2mm spoon bevel in the nose and 2mm spoon bevel in the tail. Spoon bevel starts just after the rocker point.

DRAWING OF THE FRONTIER, SIZE 159

Shape Tech

1 Blunt Nose

"How a board glides in powder, crust, corn or any snow more than an inch deep, is dictated by it's front contact point and just past it. Next time you are in soft snow watch how much snow comes over the corner of the nose near the contact point. The billowing snow coming out from behind the tip means you are plowing through it which is obviously slowing you down. By adding a blunt nose you get the float benefits of a much longer nose without the 'snow plow' rounded tip and it's extra swing weight."

— Jeremy Jones

2 Boltless Bridge

The Boltless Bridge eliminates split clip attachment hardware from the base of the board by re-profiling the wood core at the clips. The wood core under the clips is thicker providing better torsional stiffness and a more powerful connection at the split clips.

3 Traction Tech

Like a serrated knife slicing into the snow, Traction Tech improves your edge grip by adding multiple contact points along the running length of your board.

Traction Tech is a critical feature for rockered boards. Rocker improves glide in mixed conditions, but the decreased edge contact makes it harder to really lock into your turns and hold a solid edge. Traction Tech is crucial to offset the edge drift of rocker.

— Jeremy Jones

Traction Tech 3.0

Traction Tech 3.0 features three bumps per edge (front binding, board center, back binding). The middle bump is slightly bigger than the outside bumps for better grip.

4 Inner Edge Traction Tech

Inner edge Traction Tech improves splitboard edge grip on ascent. Three side cut "bumps" on each side of your binding keep you locked in on icy skin tracks no matter which way you are traversing.

5 Progressive Sidecut

At the far ends of the sidecut, the radius is incrementally increased as the edge reaches the contact point. Gradually increasing the sidecut radius towards the contact point delivers smoother turn initiation and exit as the edge tracks in and out of the snow with a less abrupt transition.

6 Quick Tension Tail

Built-in climbing skin tension system using pre-cut notch that eliminates the need for a traditional skin tail clip.

Insert Packs

Carve Pack

Allows more centered stance option for riding firm snow. **Available on:** Mind Expander · Ultra Mind Expander · Women's Mind Expander · Storm Wolf

Float Pack

Allows super setback stance for deep pow days. **Available on:** Flagship · Ultra Flagship · Women's Flagship · Stratos · Women's Stratos

Freeride/Freestyle Pack

Allows option to center or set back stance on sidecut as conditions demand. **Available on:** Mountain Twin · Ultra Mountain Twin · Twin Sister · Mind Expander Twin

Profiles

Christenson Surf profiles

Custom tip/tail rocker profile designed by surf shaper Chris Christenson for the Mind Expander, Mountain Surfer and Storm Chaser. The nose rocker starts just inside of the front inserts and the tail rocker starts just at the back inserts. When you weight the tail of the board the nose ramps up out of the snow for insane float on the deepest days. These subtle rocker contours match a Christenson surfboard rocker profile.

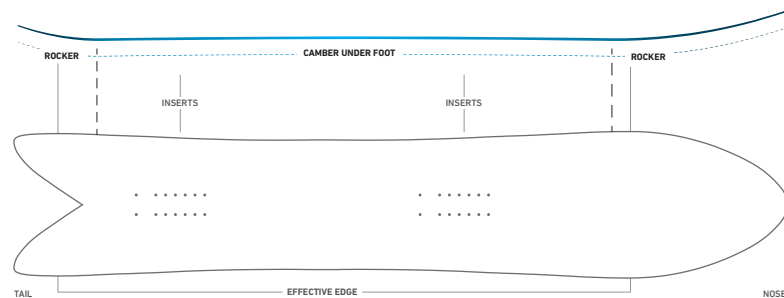

Christenson Surf Rocker

Available on: Mind Expander • Mind Expander Split • Storm Chaser • Storm Chaser Split
Women's Mind Expander • Mini Mind Expander • Mountain Surfer

Christenson Surf Camber / Rocker

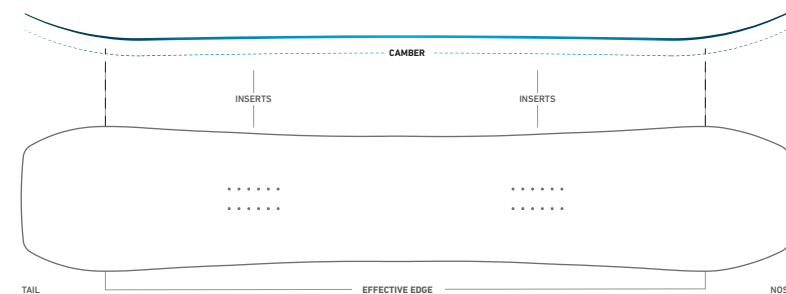

Drawing of the Storm Wolf, size 168

Available on: Storm Wolf • Ultra Mind Expander • Mind Expander Twin

True Camber NEW

A traditional full camber profile that offers the insane edge response of camber without the usual hang-ups. The camber radius tapers into the beveled 3D contour base at the tips which releases the edges where they like to hook and balances the pop and directional stability of camber with a looser, less-catchy feel.

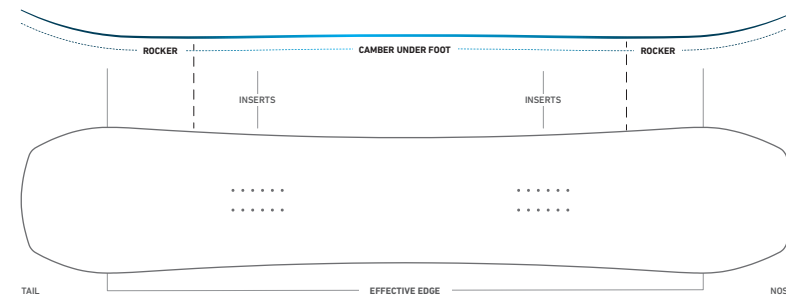

Drawing of the Aviator 2.0, size 158

Available on: Aviator 2.0

CamRock

A unique rocker/camber flex pattern defined by evenly balanced tip and tail rocker and camber between the bindings. CAMROCK improves freestyle finesse by keeping your tips playful while maintaining the power and pop of camber underfoot.

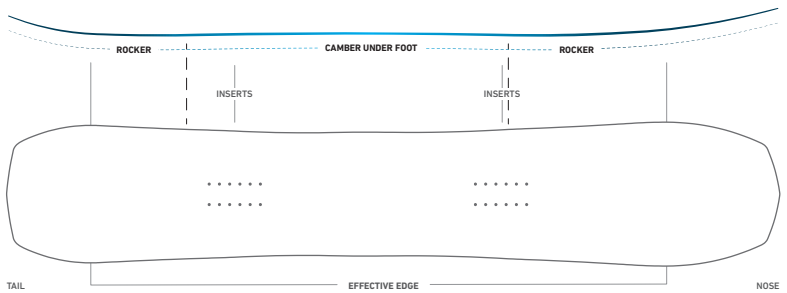

Drawing of the Mountain Twin, size 157

Available on: Ultra Mountain Twin • Mountain Twin • Mountain Twin Split • Twin Sister

Directional Rocker

A hybrid rocker/camber flex pattern defined by more tip rocker than tail rocker and camber between the bindings. The rockered tip floats the board's nose and improves maneuverability while the camber underfoot provides edge hold and response. A slightly rockered tail maintains the power and stability of a traditional board but helps keep the tail catch-free initiating turns and landing switch.

“ My experience is that most falls in freeriding start from the nose of the board – you either go over the bars in powder, the nose gets caught under a weird crust and tosses you, or you hit a hard tranny at the contact point of the tip and get bucked. Directional Rocker eliminates most of these falls.

– Jeremy Jones

Big feet? We’ve got you covered.

The Big Horn Series identifies the boards in the Jones line designed for riders with big feet. These boards have a 26.3 cm or wider waist width for added performance on steep and hard snow. If you wear size US 11 boots or larger, look for the Big Horn sizes of most board models.

Performance without compromise

Award-winning engineered core developed from the aerospace industry

Koroyd is the lightest, most advanced damping core material we've ever tested. Koroyd absorbs vibrations and adds response at a fraction of the weight which enhances control and confidence.

Koroyd's performance is consistent at temperatures down to -50°C.

DAMPING CONTROL

The Ultimate Damping Control System

Koroyd's welded tubes absorb vibrations through controlled, reversible elasticity of the tubes. This increased damping reduces chatter and allows for a smoother ride in all conditions.

RESPONSIVE

All-Terrain Responsiveness

A lower swing weight allows for quicker, smoother turns and increased responsiveness. With more maneuverability comes more confidence at speed on any terrain.

ULTRALIGHT

Ultralight Strength

The Koroyd core features the world's thinnest walled tubes at <0.06mm thick, resulting in a structure which is 95% air and up to 75% lighter than standard wooden cores.

Ingredients

Built with the finest tech and materials.

100% of our adult models feature high-end materials, construction technologies and sustainable manufacturing process. We accept no compromises in producing the most durable and sustainable snowboarding gear.

Bases

100% Sintered bases

All Jones adult models feature Sintered bases. Our bases are made out of Ultra-High Molecular Weight polyethylene and are super durable and wax absorbant.

Ultra Base

Jones exclusive base material that sets new performance standards. Lab results and snow testing show 25% better wax absorption, better glide in warm/wet snow and better durability for grinding. We've also doubled the amount of wax and mixed multiple wax types for a faster factory wax in a wider range of conditions.

Sintered 9000 Base

Made from Ultra-High Molecular Weight Polyethylene (UHMW-PE) and Carbon. This ultra-fast base is easy to repair thanks to the UHMW-PE.

Sintered 8000 Base

Super durable material made from Ultra High Molecular Weight Polyethylene (UHMW-PE) and carbon. Base is easily repairable, highly wax absorbent and wicked fast.

Extruded 5000 Base

Classic base material built for durability.

Clips

100% compression bases

All Jones splitboards feature Karakoram Clips, which deliver unmatched compression.

Karakoram Ultra Clips 3C with Tip-Lock NEW

All new Karakoram Ultra Clips 3C featuring a three point tension system. **Ultralight and exclusive to Jones, these clips redefine split clip technology.** They are also adjustable so you can maintain even compression as your splitboard ages.

Karakoram Ultra Clips 2.0 with Tip-Lock NEW

Redesigned Karakoram Ultra Clips 2.0 are lighter weight, clamp tighter and have a smaller footprint than the original Ultra clip. They are also adjustable so you can maintain even compression as your splitboard ages.

Karakoram Ultra Clips NEW

ULTRA clips are the strongest, lowest profile splitboard clips in the world. They deliver unmatched compression between board halves and they are adjustable so you can maintain even compression as your splitboard ages.

Karakoram Tip-Lock Tip Clips

Every splitboarder knows the feeling - you drop into a firm line and your tip clip pops open! Never again. Using Active Joining Technology, the Karakoram Tip-Lock Tip Clips quickly lock and clamp the tips of your splitboard with the flick of a lever.

Woodcores

100% sustainably sourced woodcores

All Jones woodcores are made with sustainably sourced wood. Every piece of wood we use in every board comes from a responsibly managed forest.

Fusion Core

The Fusion Core is our lightest wood core yet. Core is made from mostly paulownia with specifically positioned pockets of poplar for improved durability and response.

Ultra Core

Dual density premium wood core made of mostly paulownia with specially positioned poplar stringers for better durability and turn power.

Ultra Split Core

Dual density premium wood core made of mostly paulownia with specially positioned poplar stringers for better durability and turn power.

Power Core

Triple-density full wood core featuring hardwood bamboo stringers for added pop and durability plus paulownia for weight savings.

Control Core

Dual-density full premium wood core featuring a 2:1 paulownia to poplar stringer ratio that keeps core light but ultra damp.

Control Split Core

Dual-density full premium wood core designed specifically for splitboards 2:1 paulownia to poplar stringer ratio keeps core light yet ultra damp

Classic Core

Full wood premium poplar core that offers fun pop, even flex and solid durability.

Construction

Next-level layups

We are laser focused on innovating how snowboards are made. Our most advanced boards feature our latest engineering breakthroughs.

Ultra Construction

Ultra Construction is the redefinition of what it takes to build a snowboard. We've tested every inch of the board to precisely position materials exactly where they are needed while eliminating all excess materials. Combining these innovative construction techniques with superlight wood cores and carbon fiber deliver revolutionary results. Jones Ultra boards are the lightest, yet most durable snowboards on earth.

Fusion Carbon

This cutting edge board lay-up process is the latest evolution of our previous Fusion Tech construction and reduces board weight and improves durability by combining board materials in two stages.

Koroyd NEW

Award-winning engineered core developed from the aerospace industry. Koroyd is the lightest, most advanced damping core material we've ever tested. Koroyd absorbs vibrations and adds response at a fraction of the weight which enhances control and confidence.

Bamboo Surf Core

Re-designed triple density Bamboo Surf wood core that features primarily paulownia stringers with bamboo stringers positioned in the pocket of the sidecut for better edge response and turn power.

Edges

100% recycled edges

From 2010 to 2022, every Jones board ever made was built with 100% recycled edges.

Oversized recycled edges

Oversized recycled steel edges for added durability and improved production sustainability.

Fibers

Premium laminates

Fibers are critical performance ingredients in snowboard constructions. We use both sustainable Flax fiber plus traditional Biax and Triax fiberglass.

Triax Fiberglass

Multi-axis, stitched fiberglass laminate that offers a precise and responsive ride in any terrain or snow conditions.

Biax Fiberglass

A dual-direction, dual-layer, stitched fiberglass laminate that provides a fun, forgiving and snappy ride.

Topsheet

100% sustainably sourced topsheets

All adult Jones topsheets are made with materials that are sustainably sourced. The majority of our models feature ECO-plastic topsheets and several feature wood veneer topsheets.

Eco-Plastic Topsheet

Bio-plastic topsheet made from Castor beans. This eco-material is ultralight, chip/scratch resistant and water/snow repellent (snow sticks less to topsheet)

Textured Eco-Plastic Topsheet

Bio-plastic topsheet made from Castor beans featuring a subtle texture for added durability. This eco-material is ultralight, chip/scratch resistant and water/snow repellent (snow sticks less to topsheet)

Engineered Wood Veneer

New composite wood veneer topsheets made from sustainable wood. Wood veneer topsheets dampen the ride and absorb board chatter.

Ash Wood Topsheet

Thin ash wood veneer layer that functions as both a protective topsheet and a global reinforcement layer. The thin wood stringers that make up the topsheet provide even flex and suck up chatter from uneven snow conditions.

No Ink! Laser Engraved Graphics NEW

The Hovercraft Series now features laser etched topsheet graphics that eliminate toxic inks.

Reinforcements

The stringers we use match our Eco-performance design philosophy. The design of some models demand Carbon stringers, while several models feature sustainable Flax/Basalt stringers.

Web Fused Carbon

Carbon stringer pack that blends different widths of carbon matched to the specific needs of the board model. Made in the USA, EXCLUSIVE for Jones.

Carbon Stringers

Carbon stringers add torsional stiffness for improved response and increased pop. Carbon layer keeps flex profile dimensionally stable for a consistent ride for the lifetime of the board.

Basalt Power Stringers

Sustainable stringer made with 100% natural fibers. Basalt stringers improve torsional response and transfer power from under your feet to the tips of the board to help eliminate nose and tail chatter.

Flax/Basalt Power Stringers

Jones exclusive sustainable stringer made with 100% natural fibers. Composite Flax and Basalt stringer helps transfer power to the edges, improves torsional response and absorbs board chatter.

Carbon Innegra Reinforcement

Carbon Innegra fiber forms an ultra-tough hybrid composite layer that dampens the board torsionally and from tip to tail. Made in the USA and featured on the Airheart and Storm Wolf.

Fiberglass Reinforcement

Fiberglass layer improve pop in nose and tail plus increases the longevity of the flex profile. This lightweight layer helps the board perform the same on day 100 as it did on day one - precise and playful.

Others

100% ready to shred

Jones boards are de-tuned, waxed and ready to ride straight out of the wrapper.

Wend Natural Wax

Jones boards are ready to shred straight out of the shop and are factory waxed with WEND natural wax.

Factory Tuned

All Jones Snowboards are factory de-tuned at the tip and tail so you can go right from the shop to the mountain.

Forever Flex

Forever Flex is a manufacturing process that helps stabilize the flex and rocker profile of a board for its lifetime. Our boards now finish the first stages of production slightly overbuilt and then we "break them in" using specialized machinery that mimics extreme riding use. By flexing the fresh board fibers and epoxy at the factory the materials settle in to their final arrangement within the board layup much the same as if you rode the board for 20 days. This process helps us narrow our production tolerances so the board you buy has a more accurate specified flex and rocker profile that will change less as you ride it more.

Sidewalls

100% recycled sidewalls

Every Jones board ever made was built with 100% recycled sidewalls.

Recycled ABS

ABS Plastic is one of the necessary evils of snowboard production. We improve the sustainability of our snowboards by using only recycled plastic.

Recycled Rounded ABS

Rounded sidewall finish that improves board durability by protecting topsheet from chipping.

Ultra Flagship

UPDATED

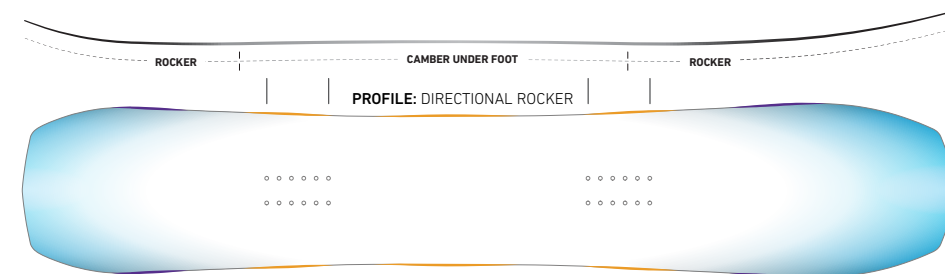

158 • 161 • 162W • 164 • 165W

ONLY FOR THE EXPERT FREERIDER

Ideal for high speed freeriding and freeride competitions

The Ultra Flagship is a seriously stiff, competition-ready freeride board designed to crush steep terrain at top speed. Built with Fusion Carbon construction, the Ultra Flagship features a 3D Contour Base 3.0, an Ash wood veneer topsheet plus multiple layers of carbon stringers that offer supreme stability at speed and eliminate chatter in rough snow. The Ultra Flagship's tapered shape sinks the tail in pow for better float and quicker turns and the Power Core and Traction Tech 3.0 edges deliver unmatched torsional response and edge control. The Ultra Base is the fastest base we've ever tested and comes factory waxed with multiple wax types for better glide in variable snow temperatures. **New for 21/22, the Ultra Flagship has Power Plates along the edges of the wood core on both sides of the inserts for less edge chatter and even more explosive response.**

THE FREERIDE FOUNDATION

Ideal for freeriding and fall line freestyle

The Flagship excels in technical terrain and is one the most confidence inspiring freeride boards on the planet. Featuring a directional rocker profile + Traction Tech 3.0 for unmatched edge grip on hard snow and a 3D Contour Base 3.0 for epic float in pow, the Flagship carves, stomps or straight lines with unbelievable precision. The Flagship's tapered shape sinks the tail in pow for better float and quicker turns, while the Engineered Veneer Topsheet, Flax/Basalt Power Stringers and Power Core add torsional response and reduce board chatter in rough snow. The Flagship also has Float Pack inserts that give you the option of super setback stance on the deepest days.

THE BACKCOUNTRY LINE BOMBER

Ideal for technical backcountry lines

The Ultra Solution is built for powerful riders who like to throttle turns at top speed and push the limits of what's possible in the backcountry. The Ultra Solution features a directional freeride shape, directional rocker profile and a stiff flex that makes it the most stable, damp and responsive split in the Jones line. For better float in pow, the Ultra Solution's tapered shape sinks the tail and the 3D Contour Base makes every turn more effortless. For added response the Ultra Solution is built with an Ultra core, an Ash Veneer topsheet and 2x Carbon stringers. For added edge grip, the Ultra Solution features Inner/Outer Traction Tech 3.0. **New for 21/22, we've upgraded the Ultra Solution to the Karkoram 3C Clips - a Jones exclusive split clip with an ultralight, three point tension system.**

Project X

UPDATED

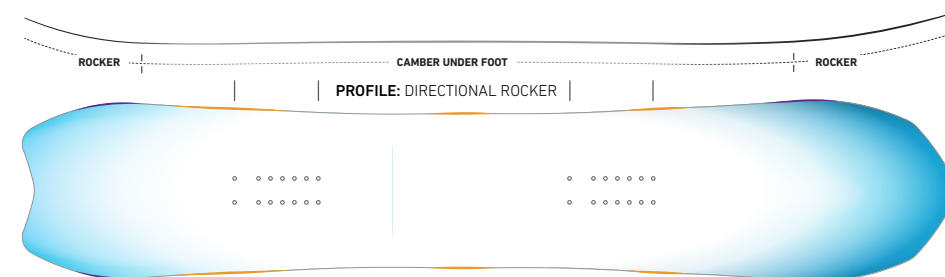

156

FLYWEIGHT ALL-MOUNTAIN RAZOR

Ideal for park, pipe and all-mountain charging

The Project X is a hybrid all-mountain board that rides smooth and powerful like a luxury sports sedan. It is the same shape as the Stratos, but it's built with ultralight, premium materials and Fusion Carbon construction. The tapered shape drops the tail in pow for more float and the 3D Contour Base, narrow sidecut and mid-stiff flex offer the perfect balance of turn performance and stability at speed. The directional rocker profile and Traction Tech 3.0 keep the Project X locked on edge accelerating into carves. **New for 21/22, the nose section of the wood core is built with Koroyd, an ultralight composite material that is lighter than any wood, but super damp and durable.** The Project X also features two layers of Carbon stringers for insane pop and Float Pack inserts that offer a setback stance option for the deepest days.

INSPIRED SHAPES FOR CREATIVE RIDERS

Surf Series

Mountain Surfer

142 • 152

NEXT LEVEL SURF SLED

Ideal for powder surfing and backyard exploration

The Mountain Surfer is a next level powder board built to surf the earth without bindings. From backyard hills to full on backcountry descents, the Mountain Surfer offers a whole new perspective on riding powder. Surf shaper Chris Christenson and Jeremy Jones designed the Mountain Surfer's complex 3D contours using the same hydro dynamic principles Chris uses to design surf boards. The Mountain Surfer features a Spoon nose for float, a 3D center hull for improved glide and 3D stepped edges for turn precision. The Mountain Surfer has a sintered p-tex base, ABS sidewalls and a wood core but no metal edges or binding inserts. To keep you attached after a closeout barrel, the Mountain Surfer includes a foam deck pad and an eyebolt. The Mountain Surfer comes in two sizes - 142cm and 152cm.

FEATURES

- Christenson Surf Rocker
- Full Poplar Woodcore
- Waxed Sintered Base
- Biax Fiberglass
- White ABS Sidewall
- Thin Durable Topsheet
- 3D Pad with tail kick
- M6 Insert for leash attachment
- M6 Eyebolt included
- Premium Coiled leash included

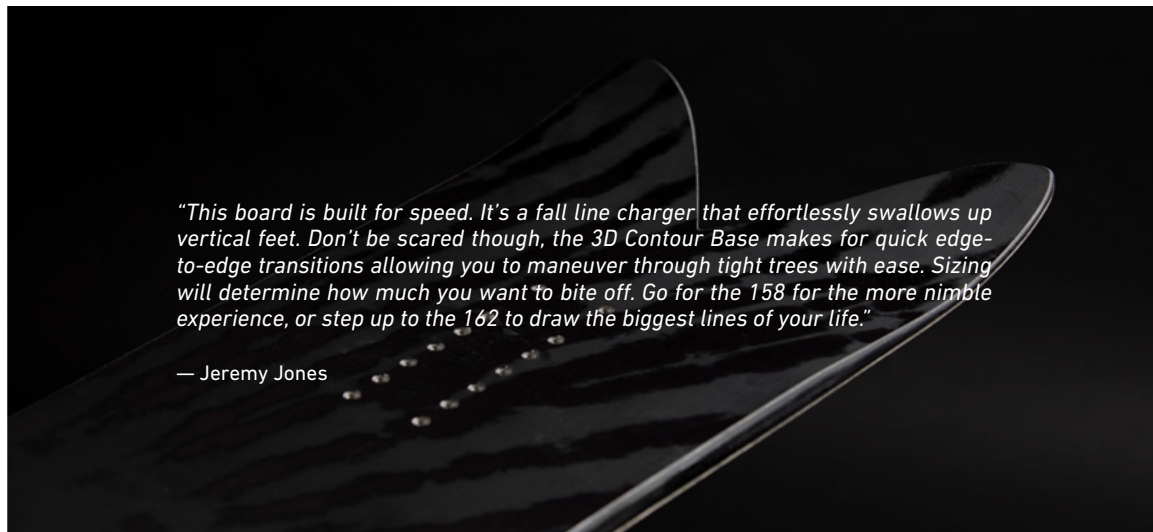

“

**THE NEW
STORM WOLF IS
LIKE BOLTING A
BUTTERFLY
TO A BULLET.**

— Chris Christenson

"This board is built for speed. It's a fall line charger that effortlessly swallows up vertical feet. Don't be scared though, the 3D Contour Base makes for quick edge-to-edge transitions allowing you to maneuver through tight trees with ease. Sizing will determine how much you want to bite off. Go for the 158 for the more nimble experience, or step up to the 162 to draw the biggest lines of your life."

— Jeremy Jones

Storm Wolf

NEW MODEL

158 • 162

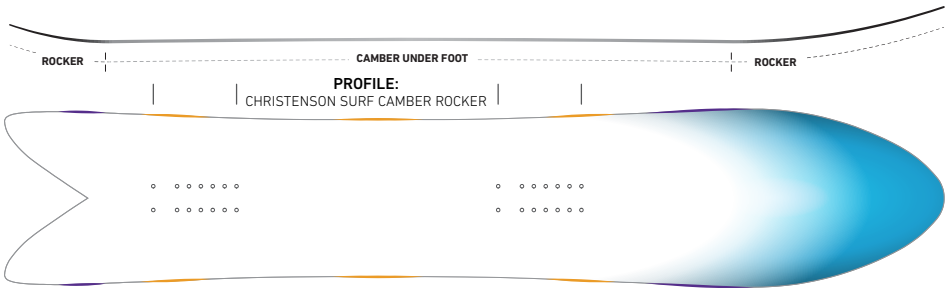

THE SLICING AND DICING SPEED ARROW

Ideal for high speed slashing in any condition

The new Storm Wolf is a high powered swallowtail that blends the all-mountain versatility of a directional freeride board with signature Surf Series turn performance. Surfboard shaper Chris Christenson and Jeremy Jones designed this new model by combining the shape and profile of the Storm Chaser and Lone Wolf, hence the name. The Storm Wolf features a Christenson Surf CAMBER profile, long sidecut, mid-stiff flex, 3D Contour Base 3.0 and Traction Tech 3.5 edges. The Surf Camber profile, long sidecut and Traction Tech Edges keep you locked in railing turns at speed while the 3D Contour Base and tapered swallowtail shape help you break loose slashing gullies and transitions. To absorb chatter and punch through rough snow patches, the Storm Wolf construction includes Carbon/Innegra reinforcement and an ECO-Plastic topsheet.

THE RE-IMAGINED, RE-ENGINEERED RESORT RAZOR

Ideal for high performance all-mountain charging and carving

The completely re-designed Aviator is a hard charging directional twin built for expert all-mountain riders who like to rail turns and stomp airs anywhere on the mountain. This new edition of the Aviator was designed in collaboration with Jones team riders Victor de la Rue and Jimmy Goodman. What sets the Aviator apart is its FULL CAMBER profile. Victor and Jimmy swear by the power of full camber for edging on steeps and landing tricks on the tail. The Aviator also features a 3D Contour Base 2.0, Triax Fiberglass, Carbon/Innegra Reinforcement, an ECO-Plastic topsheet and Traction Tech 3.5 edges. The 3D Contour Base starts after the contact point and helps eliminate edge catch and improve turn fluidity while the Triax fiberglass and Carbon Innegra layer under the Eco-Plastic topsheet suck up board chatter and offer supreme pop and lightning fast response to your every movement.

Mountain Snowskate

115

Art by Joseph Toney

THE SNOWY SIDEWALK SECRET WEAPON

Ideal for switching up your resort game and shredding the streets

The Mountain Skate is a premium snow skate that's designed for riders of all abilities and built with cutting edge snowboard tech. The Mountain Skate's sub deck offers both carving and freestyle performance thanks to the tapered directional twin shape, CamRock profile and 3D Contour Base 1.0. The construction of the sub deck is just like a miniature Jones board and features a poplar wood core, Biax fiberglass and recycled edges + sidewalls. The Top Deck is shaped like a concave skateboard deck and is also built with bomber snow-proven materials including a Poplar wood core, Biax fiberglass and full wrap ABS sidewalls. For added traction, the top deck is lined with a full length foam pad, and for precise turn performance, the Mountain Skate has premium, aluminum snow skate trucks.

SUB DECK (SKI) FEATURES

- Directional Twin shape
- 10 mm of taper nose to tail
- CamRock profile - rocker tips, camber between trucks
- 3D Contour Base 1.0 on tip + tail
- Blunt nose
- Progressive sidecut for smooth turn initiation
- Length: 115cm
- Industry standard truck insert pattern
- Snowboard construction

TOP DECK FEATURES

- Concave top contours with reinforced nose and tail kick
- Directional Twin shape - nose 1cm longer than tail
- Full length foam traction pad
- Length: 91 cm / 36 in
- Width: 24 cm / 9.6 in
- Industry standard truck insert pattern
- Jones Trucks
- Premium Coiled leash included

COLD SMOKE ROCKETSHIP

Ideal for resort pow, cat boarding and carving

The Ultracraft is a high performance alternative freeride board that carves piste and rips pow like a race board. Featuring the same shape as the Hovercraft, only built with premium materials, the Ultracraft has no top speed railing a turn in smooth snow. The rocker nose delivers epic float in pow while the stubby, stiff tail and long sidecut offer powerful board control when moving fast. The 3D Contour Base 3.0 features a spooned nose and tail edges for improved float plus turn fluidity. The Ultracraft also features our Ultra Core for lightweight pop and Basalt Power Stringers for supreme torsional response, reduced board chatter and improved sustainability. **New for 21/22, the Ultracraft is built with a super damp Ash Veneer topsheet.**

ONE OF THE LIGHTEST SPLITBOARDS ON EARTH

Ideal for expedition touring and high alpine assaults

The Ultracraft Splitboard is one of the lightest, most technically capable splitboards on the planet. Despite its feather weight, the Ultracraft is rock solid on descent as the directional rocker nose delivers epic float while the stubby, stiff tail offers powerful board control. The Ultracraft Split's 3D Contour Base makes every turn more effortless and the Fusion Carbon construction blends a **new wood core featuring ultralight Koroyd**, with multiple layers of carbon stringers to deliver our most damp and responsive Ultracraft Split yet. The Ultracraft Split also features the Boltless Bridge and Karakoram Tip Lock Tip Clips for unmatched torsional board lock, and **new for 21/22, a Jones exclusive split clip, the ultralight Karkoram 3C Clips that clamp together with a three point tension system.**

THE NIMBLE ALL-CONDITIONS RACER

Ideal for pow slashing, crud busting and slaloming trees

The Hovercraft is an alternative freeride board whose nimble maneuverability and diverse performance has earned it a cult following. It's unique, compact shape matches a short tail with a long sidecut so you can rip turns of any size. The Hovercraft is designed to be ridden shorter than your average freeride board as the trim shape packs serious surface area in a small package. For serious float in any snow condition, the Hovercraft features a directional rocker profile and a 3D Contour Base 3.0, and for added edge grip it has Traction Tech 3.0 edges. Fresh for 21/22, the Hovercraft has a new look with a refined Engineered Veneer Topsheet and a black + transparent base plus laser etched topsheet markings that eliminate all solvent inks. **Without any inks on the board, not even the sidewalls, the new Hovercraft is the most sustainably produced board we've ever made!**

THE NIMBLE BACKCOUNTRY RACER

Ideal for backcountry chutes, bowls and tree runs

The Hovercraft Split is purpose built to surf the earth and features a directional shape that truly shines in the backcountry. It's nimble, squat outline provides the float of a much longer board, and the short running length makes it super maneuverable in the tight trees and skinning up. The blunt nose and directional rocker of the Hovercraft keep you surfin' on top of the soft stuff, while the stiff tail keeps you stable through any unexpected crust. For added edge grip on icy skin tracks or firm descents, the Hovercraft Split features Inner/Outer Traction Tech 2.0 edges. Fresh for 21/22, the Hovercraft has a new look with a refined Engineered Veneer Topsheet and a black + transparent base plus laser etched topsheet markings that eliminate all solvent inks. **Without any inks on the board, not even the sidewalls, the new Hovercraft is the most sustainably produced board we've ever made!** We've also upgraded the Hovercraft Split's clips to the stronger and lighter Karakoram Ultra Clips 1.0.

Women's Stratos

NEW MODEL

146 • 149 • 152

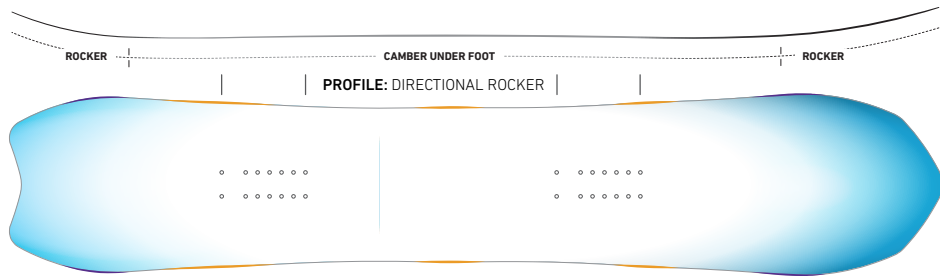

THE MODERN ALL-MOUNTAIN RIPPER

Ideal for all-conditions freeriding, freestyle and carving

The new Women's Stratos is a hybrid all-mountain board built with the body of a directional freeride board and the spirit of a freestyle board. The Stratos has a playful board feel thanks to a tight sidecut and friendly flex, but the 10mm of taper and 3D Contour Base 3.0 give it the float and turn performance of a pow board. The directional rocker profile and Traction Tech 3.0 keep the Stratos locked on edge accelerating into curves and the textured Eco-plastic topsheet and Basalt stringers add torsional response and reduce board chatter in rough terrain.

INSPIRED SNOWBOARDS FOR INSPIRED YOUTH.

Youth Series

I ride with kids all the time and the riding level of a kid who is putting in 20-50 days a year is really high. Their bodies are still made of rubber and they are not afraid to charge in mediocre conditions so in many ways their equipment demands are even greater than adults. Offering these committed young riders our hardest charging boards had to happen. The kids are the future and that the future will be better if the kids are charging! Now I just need to come to terms with the fact that the kids are going to be the ones doing the waiting at the bottom of the chairlift.

— Jeremy Jones

Youth Flagship

Art by Jeremy Collins

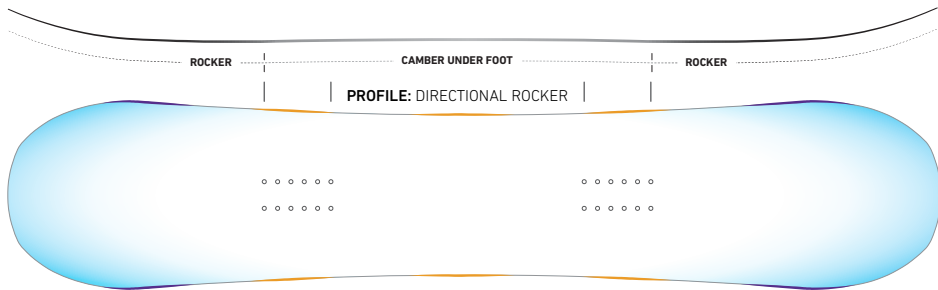

HIGH PERFORMANCE FOR KIDS

Ideal for freestyle, freeride, pow, corn or chop

The Prodigy is our all-mountain directional twin built for hard-charging kids. Most kids boards are made with very basic materials and are designed for first-time riders. Not the Prodigy. The Prodigy features the same premium materials and performance features as Jones' adult models and offers quick learning young riders a solid foundation to keep progressing their skills. The spooned nose+tail edges on the Prodigy's 3D Contour Base 1.0 allow for fluid 'no catch' turn initiation while the CamRock profile keeps the board floating in any snow condition. The Prodigy is also designed to be a little narrower than most other kids boards so small-footed riders can learn to rail turns with the board up on edge.
