

SEASON 2022/2023

“*In this crowded world, the surfer can still seek and find the perfect day, the perfect wave, and be alone with the surf and his thoughts.*”

– John Severson, Surfer Magazine, 1959

Much has changed in the surf world since John Severson wrote these words in 1959. You might have better luck finding a unicorn roaming the beach than empty waves on most coastlines, but in the mountains it's a different story.

With creativity, a few extra steps, or an early start, the wilderness experience is still alive and well for the motivated mountain explorer. If you are fixated on how quickly the resort gets tracked out, or how crowded the backcountry trailheads are, you're either stuck in the past or you're just being lazy.

The journey to make groundbreaking products parallels this quest to find solitude in the mountains. To leave the tracks behind and make innovative gear requires courage, commitment and humility because failure is more common than success when trying to do things that have never been done.

And just like summit attempts, some product ideas must be abandoned along the way. Getting turned around high in the mountains or pushing back a product launch is never fun, but the knowledge gained in failure is often more beneficial than what you might have learned topping out. Failure also makes it that much sweeter when the summit is reached or a new product is brought to life on another day.

Our dedication to developing only game changing gear reflects our belief that the world doesn't need more products - the world needs better products. Too much modern day gear is disposable and made without regard to it's impact on the planet. We strive to change

that reality by producing gear that balances the three founding pillars of our design ethos - performance, durability and sustainability.

So often we hit only two out of three - a high performance topsheet material with a heavy carbon footprint, or an amazing ultralight fabric that might not live up to daily use and abuse. Navigating these challenges, and the inevitable defeats, is the foundation of our test, tweak and repeat design process. We don't stress the defeats because when it comes to product development there is no hard and fast timeline. New product concepts are conceived and tested on skintracks and chairlifts around the world, but new models are only born when they meet the rigorous quality and sustainability standards that define our brand.

All the new outerwear, splitboards, snowboards and bindings in this catalog are our successful summit pushes. They are the dream lines that have been achieved through hard work, teamwork, and trust in the design process.

We're honored to share these product summits with you and we can't wait to see where you take them. Because where they go from here, and what further summits and dream lines they unlock, is now up to you.

Jeremy Jones

Fun hoggin' freestyler

The new **Tweaker** is a freestyle focused true twin that's built to pop ollies, toss tricks, and carve creative lines in any terrain.

Ultimate performance for kids

The **Ultra Prodigy** is our new all-mountain directional twin built for hard-charging kids whose skills on two edges defies their age.

Introducing Women's Outerwear

Movement focused, sustainably made all-weather outerwear designed for women. This is outerwear for hard charging women who want to look and feel their best whether skinning up, riding down or celebrating after.

Meet the Orion

New playful freeride binding, designed for fun focused freeriders who are looking for a comfortable and durable freeride binding with a freestyle friendly medium soft flex.

Razor sharp resort ripper

Shaped in collaboration with Robin Van Gyn, the completely redesigned **Airheart 2.0** is a hard charging directional twin built for expert all-mountain riders.

Energetic, ride anything split

The new **Stratos Split** is an all-conditions, all-terrain splitboard built for ripping turns, slashing gullies and boosting airs in the backcountry.

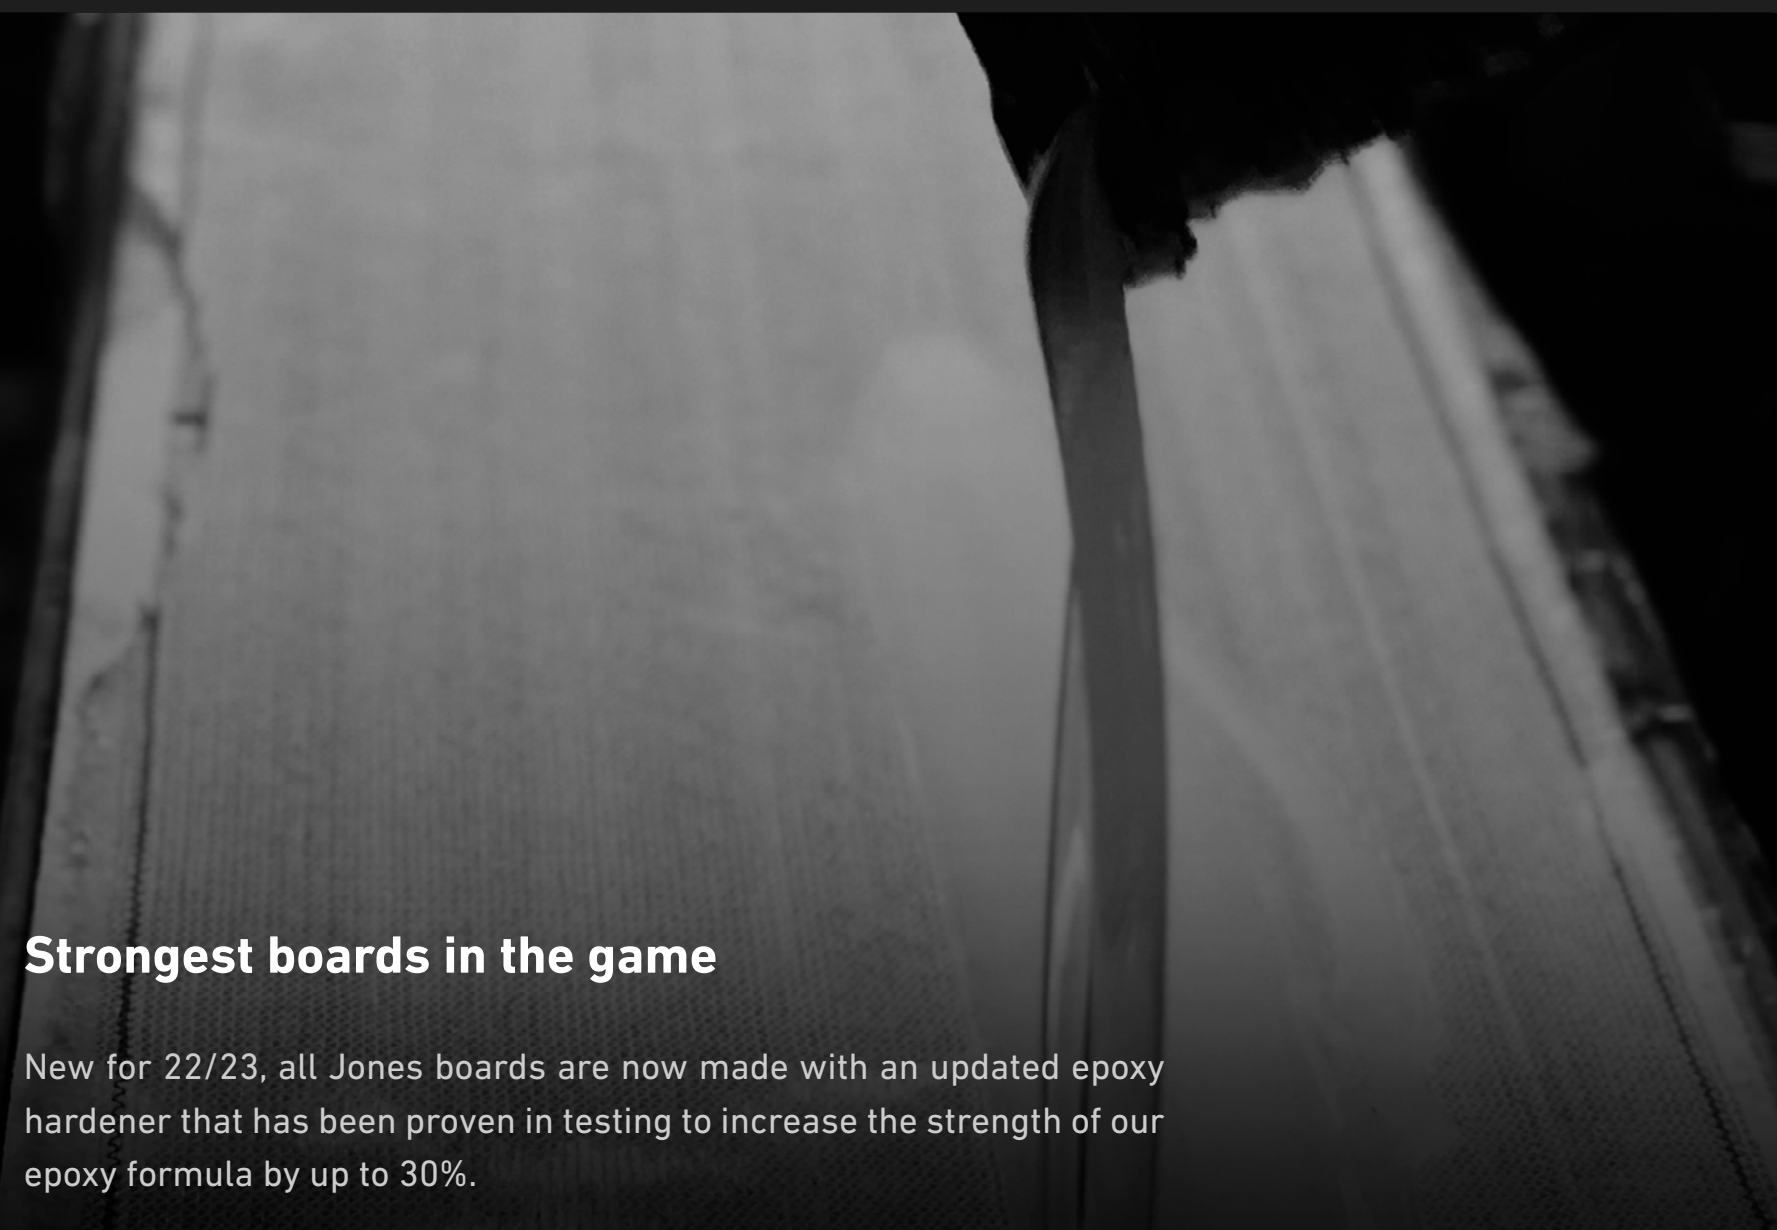

Redesigned Surf Series

Surf's up! Get barreled in the 2023 Surf Series that features redesigned surf cambered Mind Expanders and a new look inspired by Christenson surfboard graphics.

Ultralight, all-terrain split

The new **Ultra Stratos Split** is a dynamic and versatile ultralight splitboard built for extending your range and pushing your riding potential in all-conditions.

Strongest boards in the game

New for 22/23, all Jones boards are now made with an updated epoxy hardener that has been proven in testing to increase the strength of our epoxy formula by up to 30%.

Meteorite - Surf Series

A new collaboration with Chris Christenson. The Surf Series Meteorite model features a 3 degree canted footbed and a Power Spine Ankle Strap for added turn response.

Equipment
you can trust.

Instruments of stoke

Innovative designs for limitless riding progression

Every board in the Jones line is a unique, high-performance design that rides the mountain in its own way. All shred equally hard, but no two models ride the same. Our 2022/23 collection is our most complete offering yet. From daily driver directional freeride boards to surf-inspired pow sticks, choose from 29 solid models and 14 splitboards, all backed by a 2+1 year warranty.

There are many paths to progression, but the goal is always the same - to evolve, explore and break new ground. Rules and preconceived ideas are dangerous in this game. Progression takes an open mind and the belief that what is not possible today will be possible tomorrow through hard work and testing.

Equally critical to the planting of the seed in the mountains is the growth of the roots in the factory. Once an idea is born it is imperative to nurture the concept with the engineers because they are the ones who will evolve the idea and turn it into reality.

At the end of this cycle, new products are born and new ground is gained. Is the time and money spent on development worth it? This question is never asked. The price of not shooting for the stars is too high.

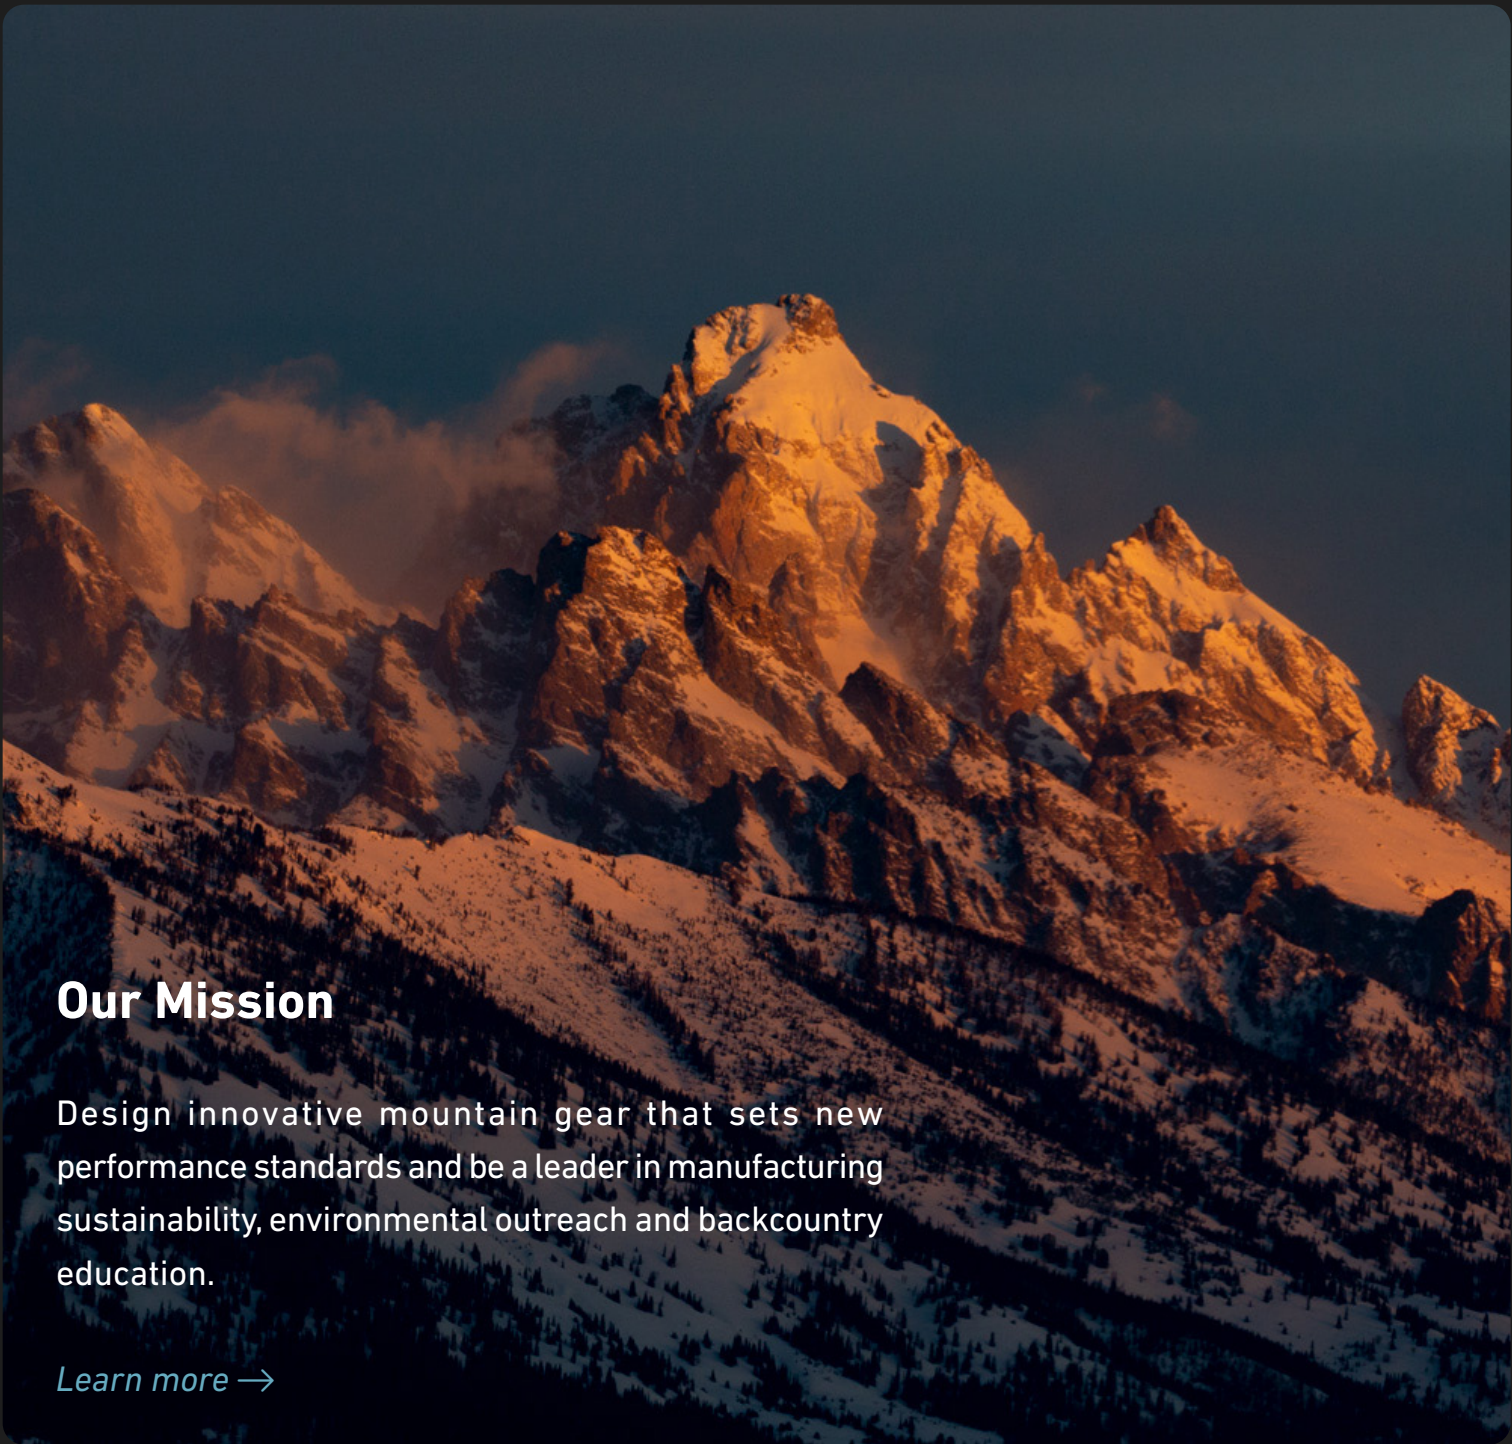

There are no shortcuts to great product.

Built by the sun

As of May 2020, all Jones snowboards and splitboards are made with 100% solar power! The switch to 100% solar allowed us to make an 89% reduction in kilograms of CO₂ for our snowboard and splitboard production cycle compared to non-solar powered production.

How Green Is Your Board - Life Cycle Assessment

No way around it. Building snowboards will always have an environmental impact. We recently completed a Life Cycle Assessment (LCA) that calculated the approximate carbon footprint of every stage of a Jones board's lifecycle - from sourcing raw materials, to manufacturing, to shipping, to throwing a retired board away.

High powered binding to board connection

SkateTech x Traction Tech = unreal response and edge grip

Jones SkateTech bindings and Jones Traction Tech edges are designed to work together. Matching the two technologies unlocks a new level of confidence boosting board feel in any snow condition. SkateTech drives power to your edges and Traction Tech locks you into turns of any size, shape or speed.

Traction Tech

Traction Tech Edges have 3 distinct sidecut points that work like a serrated knife to grip the snow without slipping. There is a point in front of each foot and one in the center of the board.

SKATE TECH

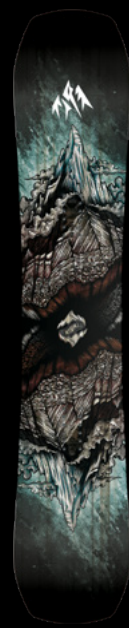

The SkateTech binding pivot system transfers muscle energy to your edges with maximum efficiency. Lean forward and step on the gas, or lean back and pump the brakes, SkateTech drives movements directly to your edges using mechanical advantage.

Power Plates

Wood core design featuring specially positioned dual-layer plates on both sides of the insert packs that help transfer energy, enhance board response and improve edge impact durability.

The bottom layer of the Power Plate is made from super responsive and sustainable Bamboo.

The top layer is made from rubber to improve dampening and reduce edge chatter under your bindings.

Designed to align with SkateTech bindings to unlock even more turn power.

STRONGEST BOARDS IN THE GAME.

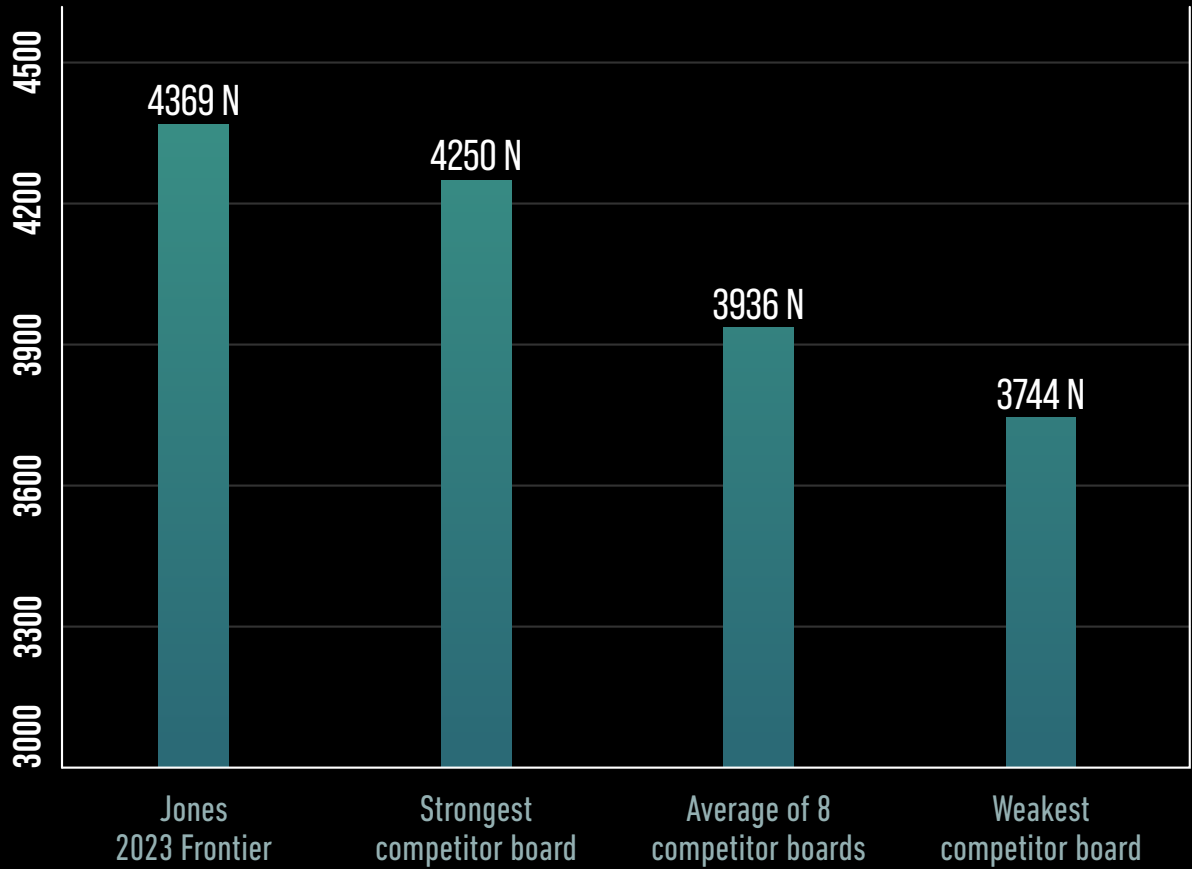

New epoxy formula increases board strength by up to 30%.

Epoxy is the lifeblood of any snowboard or splitboard. It's the glue that holds all the board materials together and epoxy performance plays a critical role in determining a board's feel, flex, durability and sustainability. All Jones boards are made with 100% bio-resin epoxy. Bio-resin offers the same performance and durability as standard 100% petroleum based epoxy resin, but it has a 33% smaller carbon footprint because it's made with 27% plant-based carbon.

Bio-resin epoxy has a two-part formula - resin and hardener. When mixed, the hardener cures the resin and unlocks the full strength of the epoxy's bonding potential. New for 22/23, all Jones boards are now made with an updated epoxy hardener that has been proven in testing to increase the strength of our epoxy formula by up to 30%. Stronger epoxy bonding directly translates to improved board durability and overall board strength.

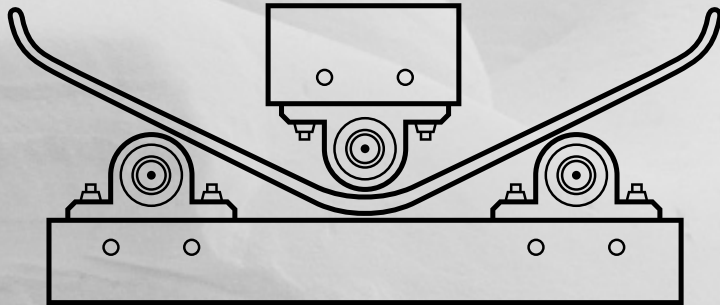

3-Points Load Test results:

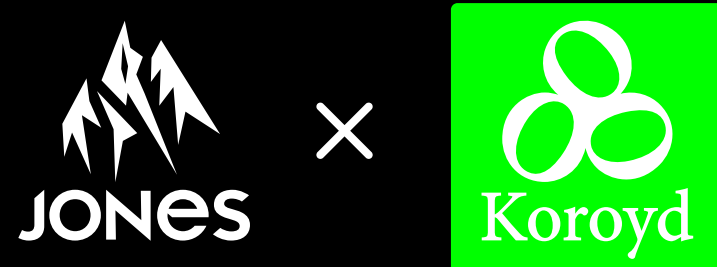

Load (N) per board

In side-by-side testing using an industry standard three-point load test, Jones boards built with the new hardener were the strongest boards of any major brand on the market. The strongest competitor's board we tested failed with 5% less force, and the weakest competitor's board we tested failed with 20% less force. Most other brand's boards failed with 15% less force.

Durability is one of the pillars of the Jones design ethos because we want you riding stronger for longer and less boards in the landfill. Our new bio-resin epoxy formula is a major step in our never ending pursuit of producing the strongest and most responsibly built boards in the world.

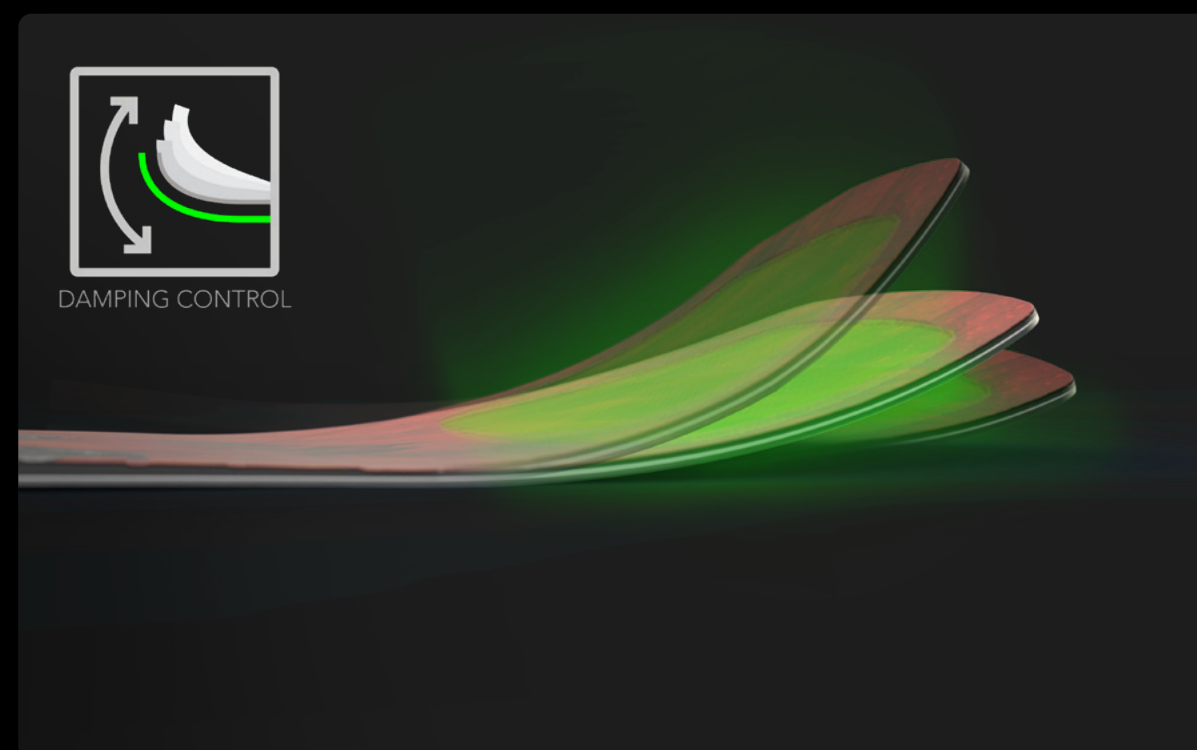

Performance without compromise

Award-winning engineered core developed for the aerospace industry

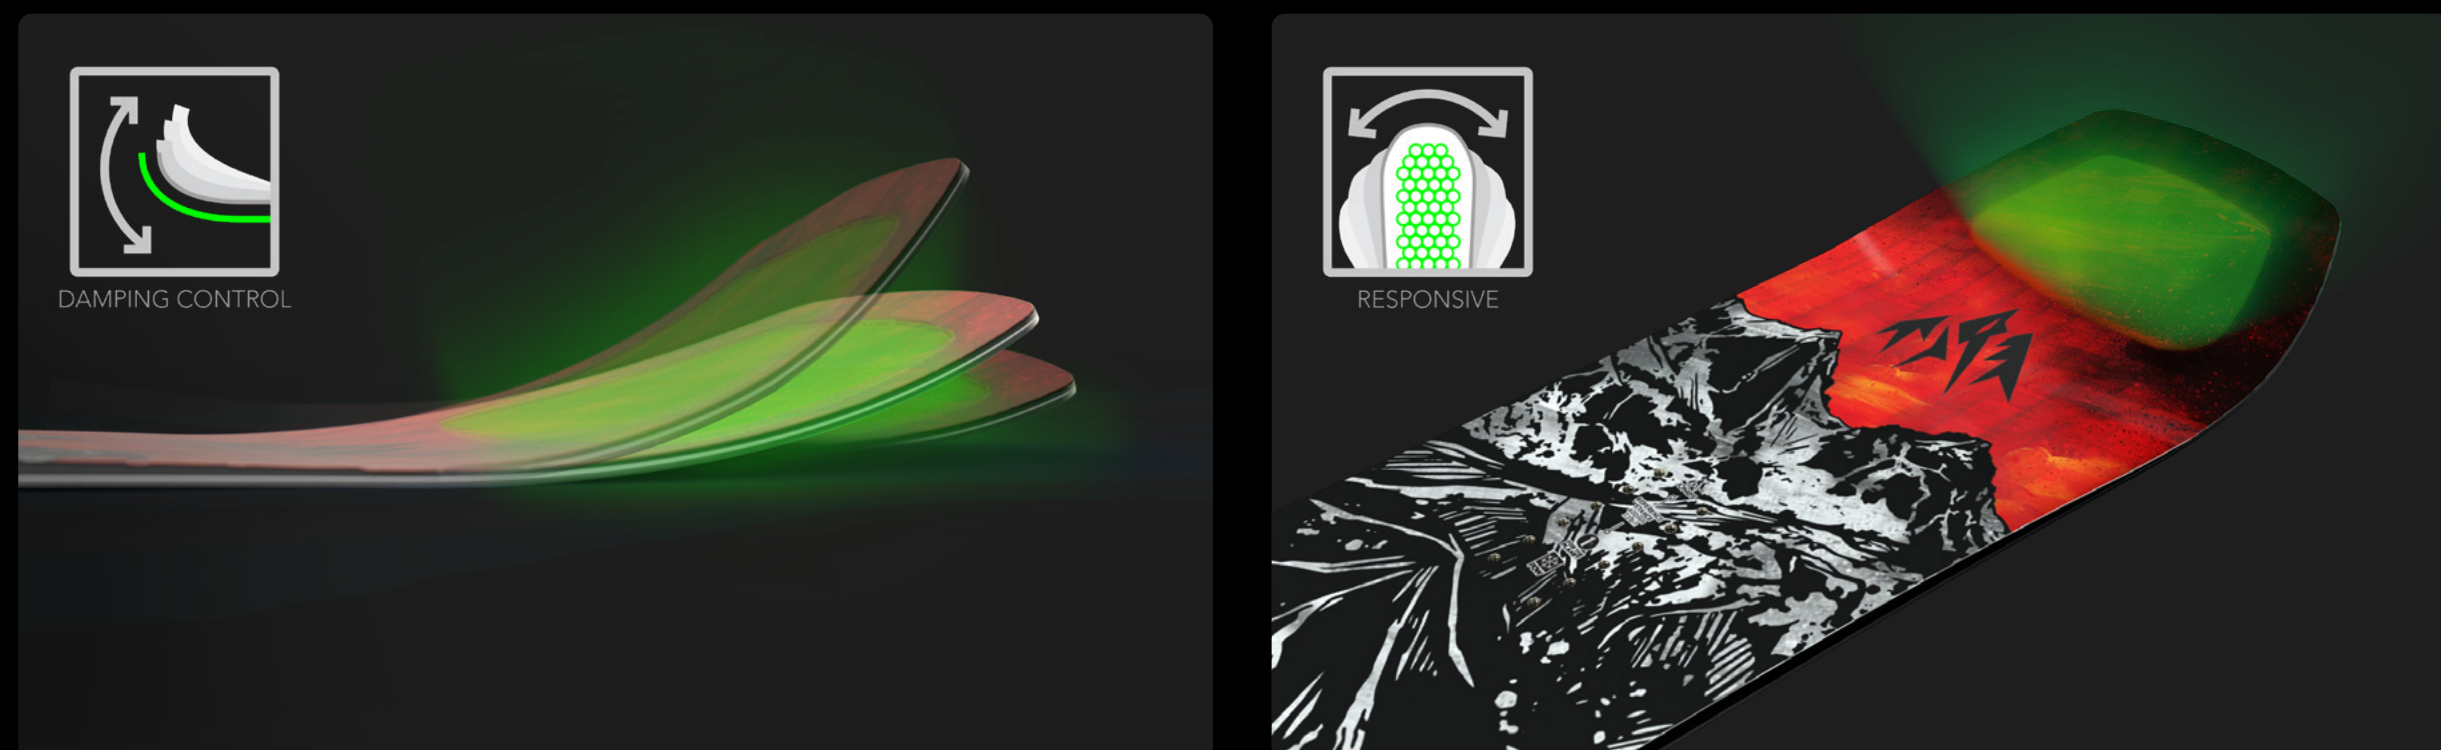

Koroyd is the lightest, most advanced synthetic core material we've ever tested. Koroyd absorbs vibrations and adds response at a fraction of the weight which enhances control and confidence.

Koroyd's performance is consistent at temperatures down to -50°C.

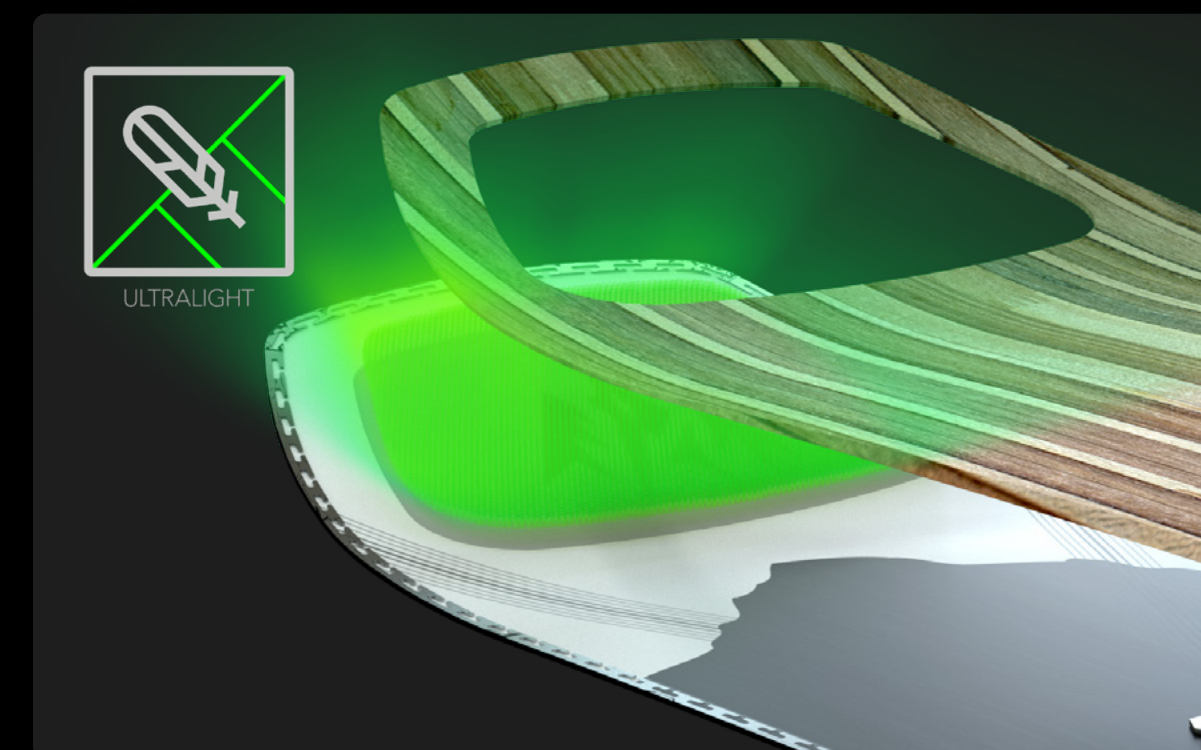

The Ultimate Damping Control System

Koroyd's welded tubes absorb vibrations through controlled, reversible elasticity of the tubes. This increased damping reduces chatter and allows for a smoother ride in all conditions.

All-Terrain Response

A lower swing weight allows for quicker, smoother turns and increased board response. With more maneuverability comes more confidence at speed in any terrain.

Ultralight Strength

The Koroyd core features the world's thinnest walled tubes at <0.06mm thick, resulting in a structure which is 95% air and up to 75% lighter than standard wooden cores.

Available on: Aviator 2.0, Project X, Ultracraft Split, Ultra Solution, the all new Ultra Stratos Split and Airheart 2.0.

3D Contour Bases

3D Contour Bases on splitboards

Feel the flow, up and down.

Select Jones splitboards now feature 3D Contour Bases. These models offer cutting edge board performance in variable backcountry snow conditions.

” JEREMY JONES

Making splitboards with 3D Contour Bases has been a monster undertaking. When we thought of the idea a couple years back we questioned whether it would ever be possible. Thanks to the full commitment of our engineers, we solved our biggest manufacturing challenge yet. The dream is now a reality and splitboard performance just took a huge leap forward. Once I started riding a Solution with a 3D Contour Base I could not go back.

100%

of our snowboards feature
3D Contour Bases.

Available on: Solution, Ultra Solution, Ultracraft Split, Mountain Twin Split, Ultra Stratos Split, Stratos Split, Women’s Solution and Youth Solution.

” JEREMY JONES

On a surfboard, the subtle shaping of the nose is what makes the entry into a turn so smooth and fluid. The feeling of an effortless surf turn is what inspired the development of our 3D Contour Bases. Instead of having to abruptly tip the board into a turn, 3D Contour Bases let you roll your edge into a turn. I've been on a quest to design a snowboard that offers the free friction glide and edge-to-edge fluidity of a surfboard for years. 3D Contour Bases cracked the code on how to achieve this next level of board performance.

3D Contour Bases

Free friction snowboarding

Next level technology for ultimate response.

Nobody wants a choppy and rough run. The descents you dream about are dynamic and smooth. Inspired by the rounded bottom contours of surfboards, 3D Contour Bases are designed to make every run smoother and every turn more effortless by reducing the drag of the board tips. 3D Contour Bases enhance glide and improve float helping you ride faster and with better flow.

Glide

3D Contour Bases enhance glide. The smooth radius of the nose and tail edges reduce friction at the contact points. With less friction and catch in the tips, you can maintain more speed.

Flow

3D Contour Bases deliver unmatched turn flow and fluidity. Just like the nose and tail on a surfboard, the rounded tip and tail edges eliminate catch as you transfer pressure edge-to-edge. Turn initiation is effortless because you can roll the board on to the edge instead of tip the board on the edge. Once on edge, camber and Traction Tech lock in your turn.

Float

When a board has good float, it should feel effortless to keep your nose up through pow, crud or crust. 3D Contour Bases improve float by reducing the “plow effect” of your nose and tail edges. Instead of plowing through the snow, the rounded edges smoothly deflect the snow to the sides of the board, which pops your nose up without having to lean back and burn out your back leg.

① Center

The center of the board is perfectly flat with no spoon bevel on the edges between the contact points. The flat base allows instantaneous edge engagement between the feet when you lean into a turn.

Riding flat

When riding flat, the spoon bevel on the edges is not engaged, but it does help smoothly deflect snow away from the nose of the board.

② Contact points

The spoon bevel starts at the contact point. The bevel increases very gradually so there is not an abrupt transition between the flat center of the board and the raised tip and tail edges.

Turn initiation

As you begin to make a turn the spoon bevel helps you smoothly roll the board on to your edge with less friction and edge drag.

③ Nose and tail edges

The spoon bevel is most defined at the tip and tail of the board. The rounded edges at the tips reduce edge catch and drag.

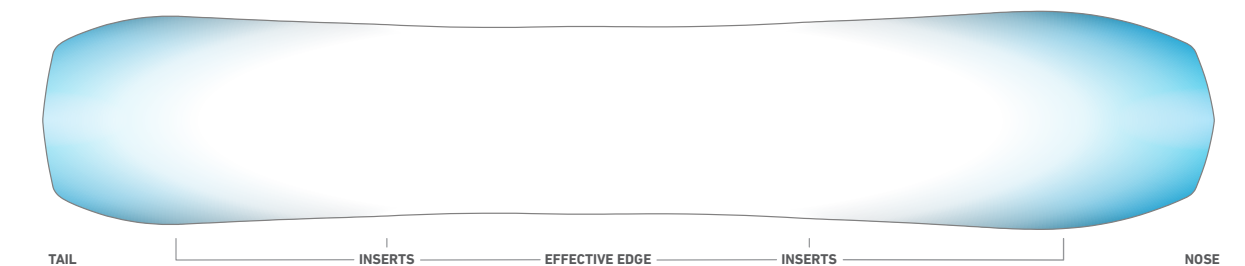

Mid-turn

In the middle of a turn camber and traction tech keep you locked onto your edge in the center of the board while the spoon bevel reduces the “plow effect” of your nose and tail edges.

The unique riding personality of each board in our collection demanded we develop multiple 3D Contour Base designs. Not every model would benefit from the same amount of spoon bevel. Each 3D Contour Base design is matched to the attitude of the board.

3D Contour Base 3.0

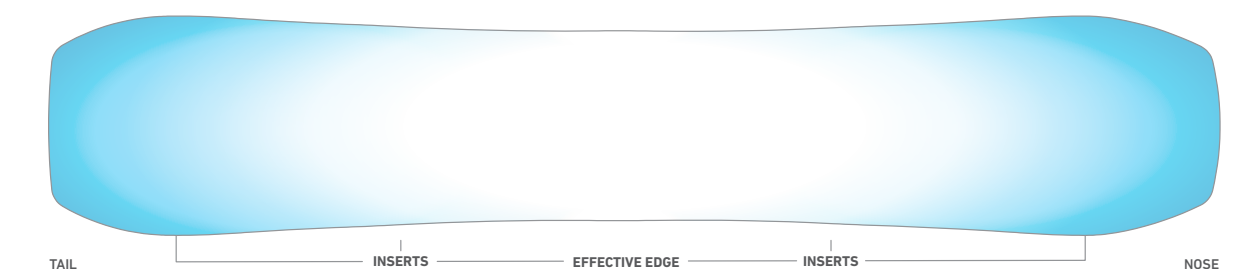

Freeride focused 3D Contour Base featuring 7mm of spoon bevel in the nose and 0 to 7mm of spoon bevel in the tail. Spoon bevel starts at the rocker point.

Drawing of the Flagship, size 161

3D Contour Base 2.0

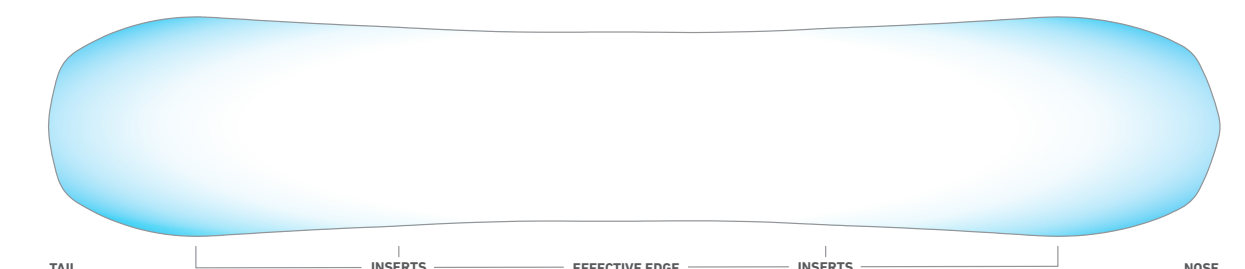

Moderate 3D Contour Base featuring an even balance of 4mm spoon bevel in the nose and 4mm spoon bevel in the tail. Spoon bevel starts at the rocker point.

Drawing of the Aviator 2.0, size 158

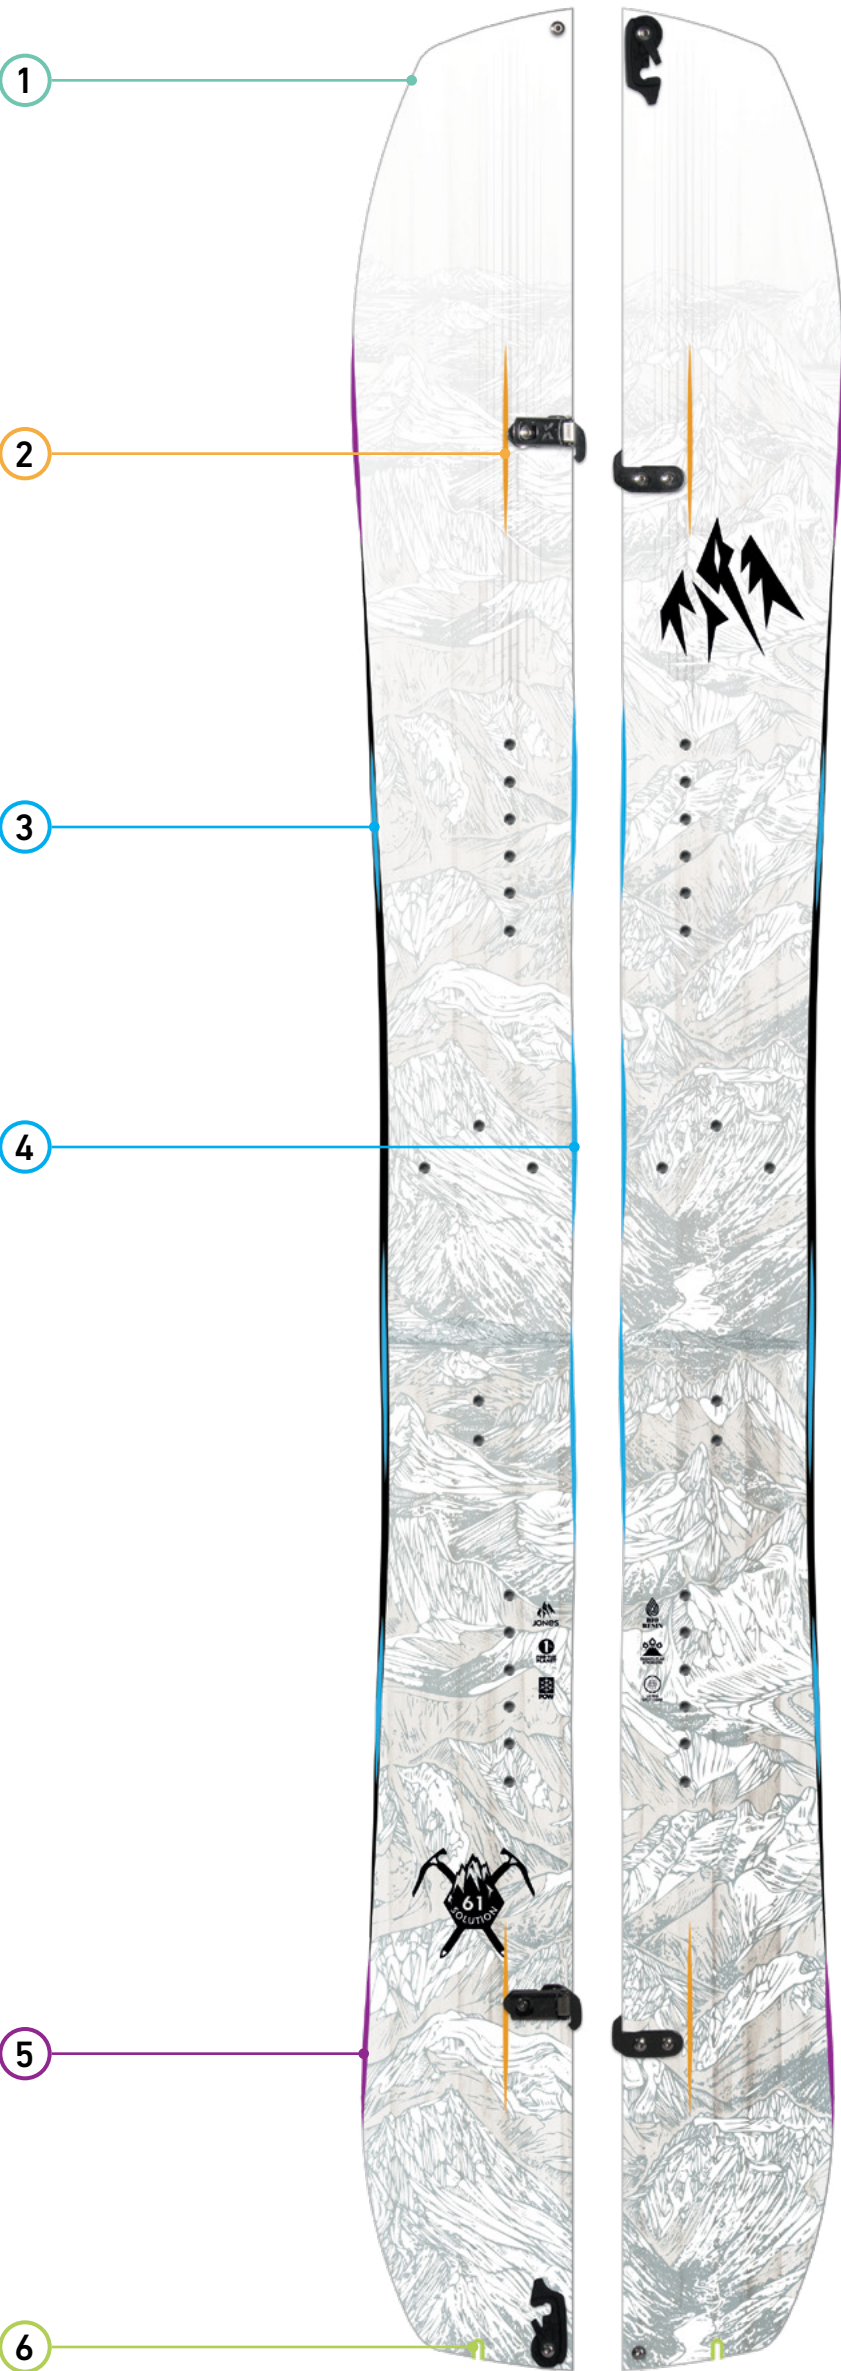

3D Contour Base 1.0

Subtle yet effective 3D Contour Base featuring an even balance of 2mm spoon bevel in the nose and 2mm spoon bevel in the tail. Spoon bevel starts just after the rocker point.

Drawing of the Frontier, size 159

Shape Tech

1 Blunt nose

“How a board glides in powder, crust, corn or any snow more than an inch deep, is dictated by it’s front contact point and just past it. Next time you are in soft snow watch how much snow comes over the corner of the nose near the contact point. The billowing snow coming out from behind the tip means you are plowing through it which is obviously slowing you down. By adding a blunt nose you get the float benefits of a much longer nose without the ‘snow plow’ rounded tip and it’s extra swing weight.”

– Jeremy Jones

2 Boltless Bridge

The Boltless Bridge eliminates split clip attachment hardware from the base of the board by re-profiling the wood core at the clips. The wood core under the clips is thicker providing better torsional stiffness and a more powerful connection at the split clips.

3 Traction Tech

Like a serrated knife slicing into the snow, Traction Tech improves your edge grip by adding multiple contact points along the running length of your board.

“Traction Tech is a critical feature for rockered boards. Rocker improves glide in mixed conditions, but the decreased edge contact makes it harder to really lock into your turns and hold a solid edge. Traction Tech is crucial to offset the edge drift of rocker.”

– Jeremy Jones

Traction Tech 3.0

Traction Tech 3.0 features three bumps per edge (front binding, board center, back binding). The middle bump is slightly bigger than the outside bumps for better grip.

4 Inner Edge Traction Tech

Inner edge Traction Tech improves splitboard edge grip on ascent. Three side cut “bumps” on each side of your bindings keep you locked in on icy skin tracks no matter which way you are traversing.

5 Progressive Sidecut

At the far ends of the sidecut, the radius is incrementally increased as the edge reaches the contact point. Gradually increasing the sidecut radius towards the contact point delivers smoother turn initiation and exit as the edge tracks in and out of the snow with a less abrupt transition.

6 Quick Tension Tail

Built-in climbing skin tension system using pre-cut notch that eliminates the need for a traditional skin tail clip.

Insert Packs

Carve Pack

Allows more centered stance option for riding firm snow. **Available on:** Mind Expander, Ultra Mind Expander, Women’s Mind Expander, Storm Wolf

Float Pack

Allows super setback stance for deep pow days. **Available on:** Flagship, Ultra Flagship, Women’s Flagship, Stratos, Women’s Stratos

Freeride/Freestyle Pack

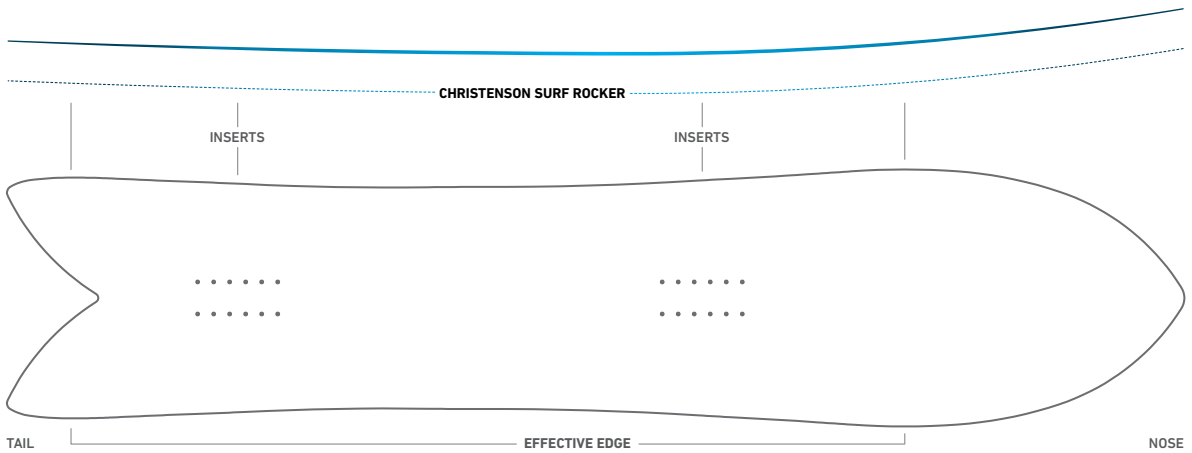

Allows option to center or set back stance on sidecut as conditions demand. **Available on:** Mountain Twin, Ultra Mountain Twin, Twin Sister, Mind Expander Twin

Profiles

Christenson Surf profiles

Custom tip/tail rocker profile designed by surf shaper Chris Christenson for the Mountain Surfer and Storm Chaser. The nose rocker starts just inside of the front inserts and the tail rocker starts just at the back inserts. When you weight the tail of the board the nose ramps up out of the snow for insane float on the deepest days. These subtle rocker contours match a Christenson surfboard rocker profile

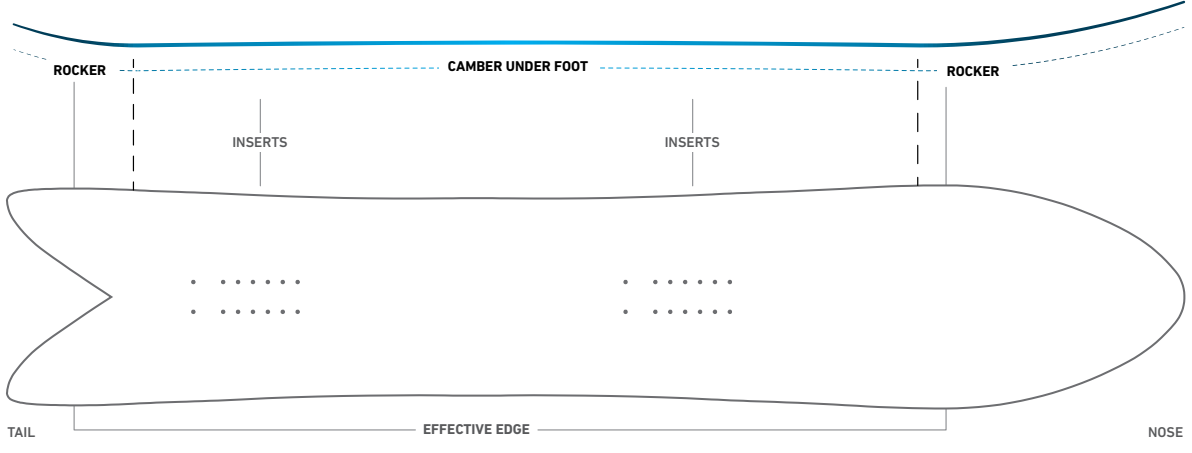

Christenson Surf Rocker

Drawing of the Storm Chaser, size 147

Available on: Storm Chaser ▫ Storm Chaser Split ▫ Mountain Surfer ▫ Mini Mind Expander

Christenson Surf Camber / Rocker

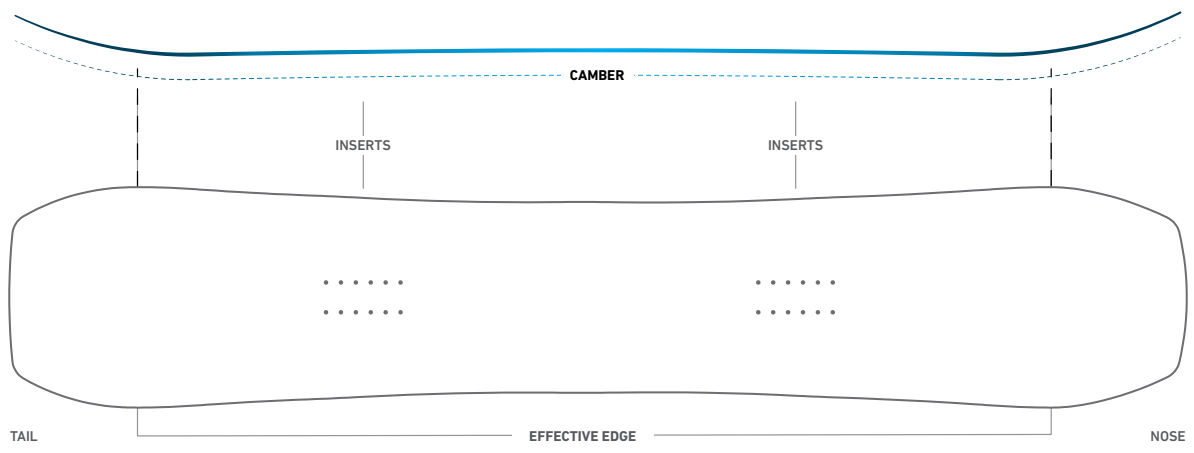

Drawing of the Storm Wolf, size 168

Available on: Storm Wolf ▫ Ultra Mind Expander ▫ Mind Expander Twin Mind Expander ▫ Mind Expander Split ▫ Women's Mind Expander

True Camber

A traditional full camber profile that offers the insane edge response of camber without the usual hang-ups. The camber radius tapers into the beveled 3D Contour Base at the tips which releases the edges where they like to hook and balances the pop and directional stability of camber with a looser, less-catchy feel.

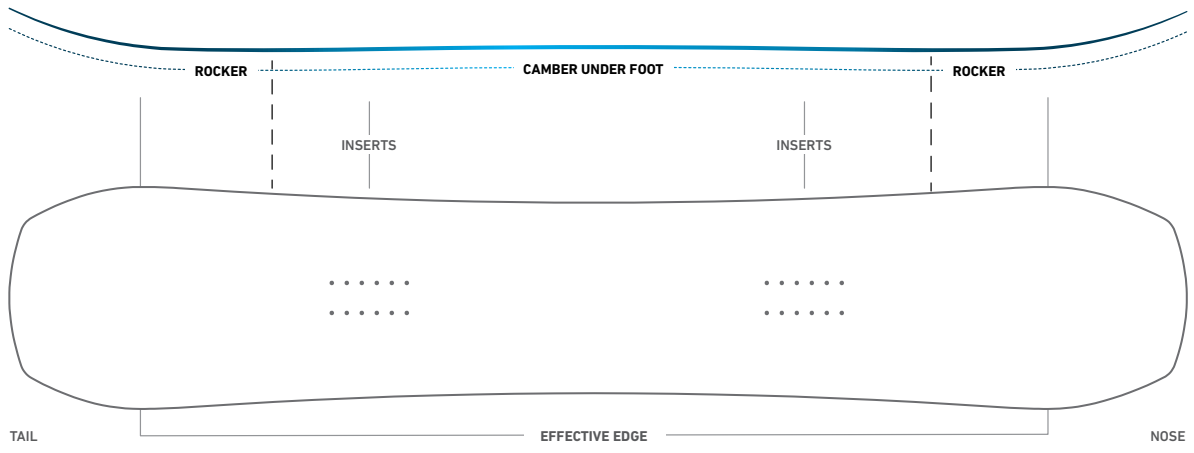

Drawing of the Aviator 2.0, size 158

Available on: Aviator 2.0 ▫ Airheart 2.0 ▫ Tweaker

CamRock

A unique rocker/camber flex pattern defined by evenly balanced tip and tail rocker and camber between the bindings. CamRock improves freestyle finesse by keeping your tips playful while maintaining the power and pop of camber underfoot.

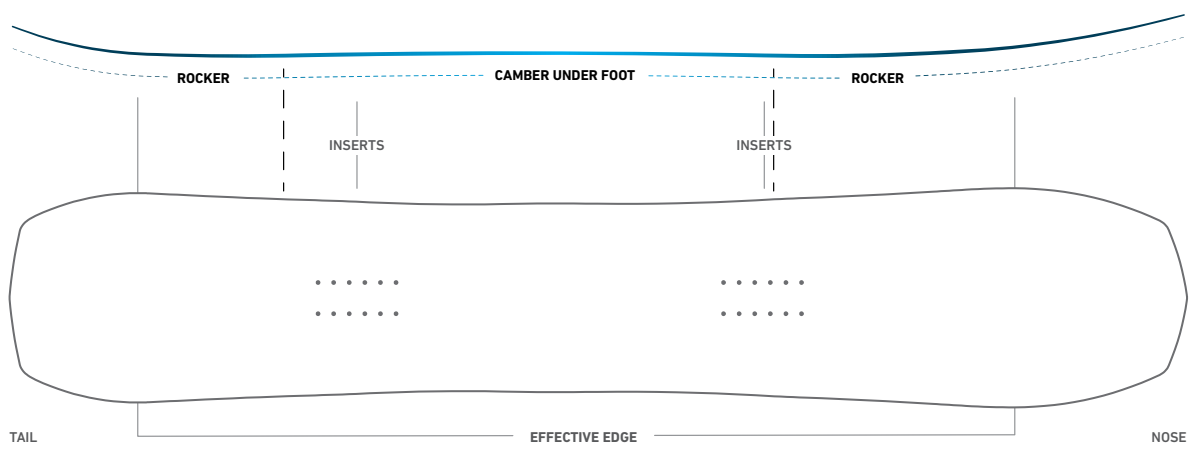

Drawing of the Mountain Twin, size 157

Available on: Ultra Mountain Twin ▫ Mountain Twin ▫ Twin Sister Mountain Twin Split

Directional Rocker

A hybrid rocker/camber flex pattern defined by more tip rocker than tail rocker and camber between the bindings. The rockered tips floats the board's nose and improves maneuverability while the camber underfoot provides edge hold and response. A slightly rockered tail maintains the power and stability of a traditional board but helps keep the tail catch-free initiating turns and landing switch.

” JEREMY JONES

My experience is that most falls in freeriding start from the nose of the board – you either go over the bars in powder, the nose gets caught under a weird crust and tosses you, or you hit a hard tranny at the contact point of the tip and get bucked. Directional Rocker eliminates most of these falls.

Drawing of the Hovercraft, size 156

Big feet? We've got you covered.

The Big Horn Series identifies the boards in the Jones line designed for riders with big feet. These boards have a 26.3 cm or wider waist width for added performance on steep and hard snow. If you wear size US 11 boots or larger, look for the Big Horn Series sizes of most board models.

Ingredients

Built with the finest tech and materials.

100% of our adult models feature high-end materials, construction technologies and sustainable manufacturing process. We accept no compromises in producing the most durable and sustainable snowboarding gear.

Bases

100% sintered bases

All Jones adult models feature sintered bases. Our bases are made out of Ultra-High Molecular Weight polyethylene and are super durable and wax absorbent.

Ultra Base

Jones exclusive base material that sets new performance standards. Lab results and snow testing show 25% better wax absorption, better glide in warm/wet snow and better durability for grinding. We've also doubled the amount of wax and mixed multiple wax types for a faster factory wax in a wider range of conditions.

Sintered 9000 base

Premium base material made from Ultra-High Molecular Weight Polyethylene (UHMW-PE) and carbon. Base is highly wax absorbent, easy to repair and wicked fast.

Sintered 8000 base

Super durable base material made from Ultra-High Molecular Weight Polyethylene (UHMW-PE) and carbon. Base is easy to repair, easy to wax and super fast.

Extruded 5000 base

Classic base material that is super durable and easy to repair.

Clips

100% Karakoram split clips

All Jones splitboards feature premium Karakoram Clips that deliver unmatched compression and board lock.

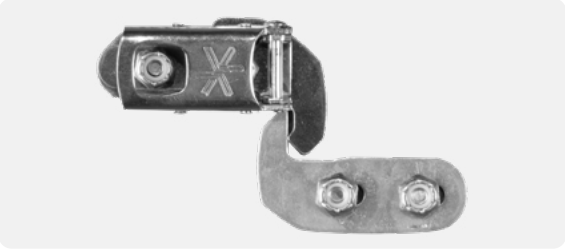

Karakoram Ultra Clips 3C with Tip-Lock

Karakoram Ultra Clips 3C feature a three point tension system. Ultralight and exclusive to Jones, these clips redefine split clip technology. They are also adjustable so you can maintain even compression as your splitboard ages.

Karakoram Ultra Clips 2.0 with Tip-Lock

Karakoram Ultra Clips 2.0 are lighter weight, clamp tighter and have a smaller footprint than the original Ultra Clip. They are also adjustable so you can maintain even compression as your splitboard ages.

Karakoram Ultra 1.0 Clips

Karakoram Ultra Clips 1.0 remain some of the strongest and lowest profile split clips in the world. They deliver rock solid board lock and they are adjustable so you can maintain even compression as your splitboard ages.

Karakoram Tip-Lock tip clips

Every splitboarder knows the feeling – you drop into a firm line and your tip clip pops open! Never again. Using Active Joining Technology, the Karakoram Tip-Lock tip clips quickly lock and clamp the tips of your splitboard with the flick of a lever.

Woodcores

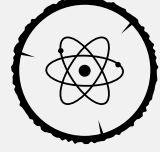

100% sustainably sourced woodcores

All Jones woodcores are made with sustainably sourced wood. Every piece of wood we use in every board comes from a responsibly managed forest.

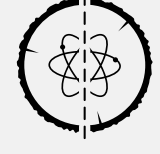

Fusion Core

The Fusion Core is our lightest wood core yet. Core is made from mostly paulownia with specifically positioned pockets of poplar for improved durability and response.

Ultra Core

Dual density premium wood core made of mostly paulownia with specially positioned poplar stringers for better durability and turn power.

Ultra Split Core

Dual density premium wood core made of mostly paulownia with specially positioned poplar stringers for better durability and turn power.

Power Core

Triple-density full wood core featuring hardwood bamboo stringers for added pop and durability plus paulownia for weight savings.

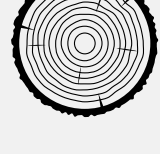

Control Core

Dual-density full premium wood core featuring a 2:1 paulownia to poplar stringer ratio that keeps core light but ultra damp.

Control Split Core

Dual-density full premium wood core designed specifically for splitboards 2:1 paulownia to poplar stringer ratio keeps core light yet ultra damp.

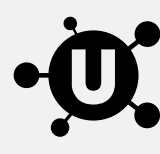

Classic Core

Full wood premium poplar core that offers fun pop, even flex and solid durability.

Construction

Next-level layups

We are laser focused on innovating how snowboards are made. Our most advanced boards feature our latest engineering breakthroughs.

Ultra Construction

Ultra Construction is the redefinition of what it takes to build a snowboard. We've tested every inch of the board to precisely position materials exactly where they are needed while eliminating all excess materials. Combining these innovative construction techniques with superlight wood cores and carbon fiber deliver revolutionary results. Jones Ultra boards are the lightest, yet most durable snowboards on earth.

Fusion Carbon

This cutting edge board lay-up process is the latest evolution of our previous Fusion Tech construction and reduces board weight and improves durability by combining board materials in two stages.

Koroyd®

Award-winning synthetic core material developed for the aerospace industry. Koroyd is the lightest and dampest core material we've ever tested. Koroyd absorbs vibrations and adds response at a fraction of the weight of wood which enhances board control and riding confidence.

Bamboo Surf Core

Re-designed triple density Bamboo Surf wood core that features primarily paulownia stringers with bamboo stringers positioned in the pocket of the sidecut for better edge response and turn power.

Fibers

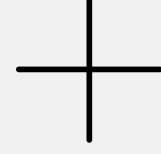

Premium laminates

Fibers are critical performance ingredients in snowboard constructions. We use both sustainable Flax fiber plus traditional Biax and Triax fiberglass.

Triax Fiberglass

Multi-axis, stitched fiberglass laminate that offers a precise and responsive ride in any terrain or snow conditions.

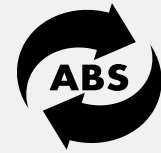

Biax Fiberglass

A dual-direction, dual-layer, stitched fiberglass laminate that provides a fun, forgiving and snappy ride.

Sidewalls

100% recycled sidewalls

Every Jones board ever made was built with 100% recycled sidewalls.

Recycled ABS

ABS Plastic is one of the necessary evils of snowboard production. We improve the sustainability of our snowboards by using only recycled plastic.

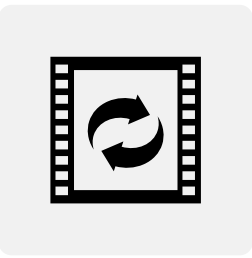

Recycled Rounded ABS

Rounded sidewall finish that improves board durability by protecting topsheet from chipping.

Topsheet

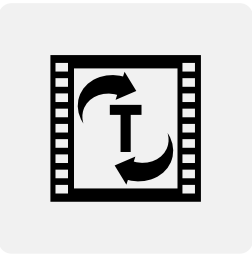

100% sustainably sourced topsheets

All adult Jones topsheets are made with materials that are sustainably sourced. The majority of our models feature ECO-plastic topsheets and several feature wood veneer topsheets.

Eco-Plastic Topsheet

Bio-plastic topsheet made from Castor beans. This eco-material is ultralight, chip/scratch resistant and water/snow repellent (snow sticks less to topsheet).

Textured Eco-Plastic Topsheet

Bio-plastic topsheet made from Castor beans featuring a subtle texture for added durability. This eco-material is ultralight, chip/scratch resistant and water/snow repellent (snow sticks less to topsheet).

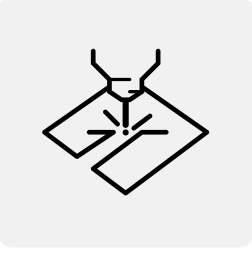

Engineered Wood Veneer

New composite wood veneer topsheets made from sustainable wood. Wood veneer topsheets dampen the ride and absorb board chatter.

Ash Wood Topsheet

Thin ash wood veneer layer that functions as both a protective topsheet and a global reinforcement layer. The thin wood stringers that make up the topsheet provide even flex and suck up chatter from uneven snow conditions.

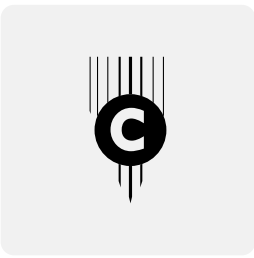

No Ink! Laser Engraved Graphics

The Hovercraft Series now features laser etched topsheet graphics that eliminate toxic inks.

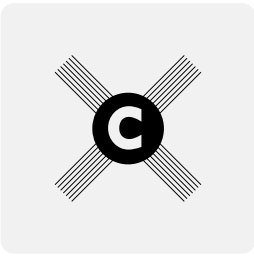

Reinforcements

The stringers we use match our Eco-performance design philosophy. The design of some models demand Carbon stringers, while several models feature sustainable Flax/Basalt stringers.

Web Fused Carbon

Carbon stringer pack that blends different widths of carbon matched to the specific needs of the board model. Made in the USA, EXCLUSIVE for Jones.

Carbon Stringers

Carbon stringers add torsional stiffness for improved response and increased pop. Carbon layer keeps flex profile dimensionally stable for a consistent ride for the lifetime of the board.

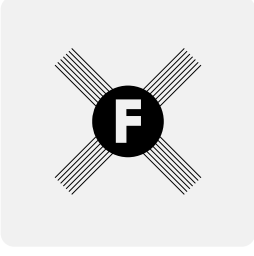

Basalt Power Stringers

Sustainable stringer made with 100% natural fibers. Basalt stringers improve torsional response and transfer power from under your feet to the tips of the board to help eliminate nose and tail chatter.

Flax/Basalt Power Stringers

Jones exclusive sustainable stringer made with 100% natural fibers. Composite Flax and Basalt stringer helps transfer power to the edges, improves torsional response and absorbs board chatter.

Fiberglass Reinforcement

Fiberglass layer improve pop in nose and tail plus increases the longevity of the flex profile. This lightweight layer helps the board perform the same on day 100 as it did on day one - precise and playful.

Others

100% ready to shred

Jones boards are de-tuned, waxed and ready to ride straight out of the wrapper.

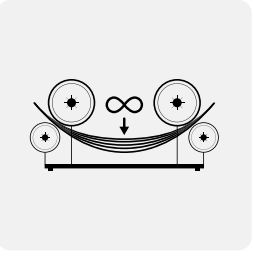

Wend Natural Wax

Jones boards are ready to shred straight out of the shop and are factory waxed with WEND natural wax.

Factory Tuned

All Jones Snowboards are factory de-tuned at the tip and tail so you can go right from the shop to the mountain.

Forever Flex

Forever Flex is a manufacturing process that helps stabilize the flex and rocker profile of a board for it's lifetime. Our boards now finish the first stages of production slightly overbuilt and then we "break them in" using specialized machinery that mimics extreme riding use. By flexing the fresh board fibers and epoxy at the factory the materials settle in to their final arrangement within the board layup much the same as if you rode the board for 20 days. This process helps us narrow our production tolerances so the board you buy has a more accurate specified flex and rocker profile that will change less as you ride it more.

Edges

100% recycled edges

From 2010 to 2023, every board ever made was built with 100% recycled edges.

Oversizes recycled edges

Oversized recycled steel edges for added durability and improved production sustainability.

High performance designs built for dynamic descents

Directional Freeride

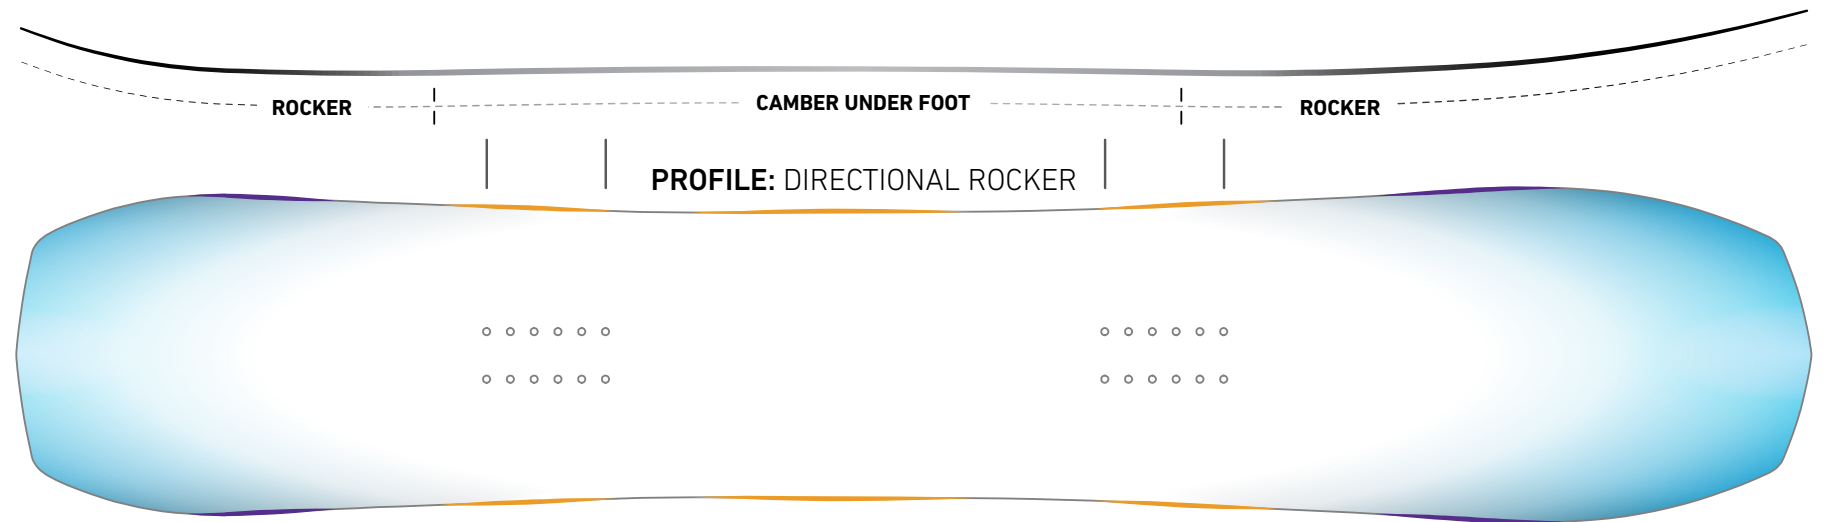

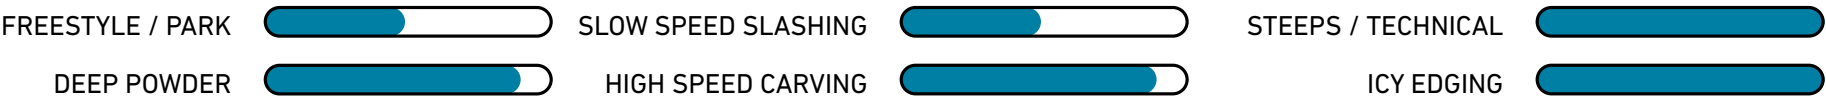

Ultra Flagship

ONLY FOR THE EXPERT FREERIDER

Ideal for high speed freeriding and freeride competitions

The Ultra Flagship is a seriously stiff, competition-ready freeride board designed to crush steep terrain at top speed. Built with Fusion Carbon construction, the Ultra Flagship features a 3D Contour Base 3.0, an Ash wood veneer topsheet plus multiple layers of carbon stringers that offer supreme stability at speed and eliminate chatter in rough snow. The Ultra Flagship's tapered shape sinks the tail in pow for better float and quicker turns and the Traction Tech 3.0 edges deliver exceptional edge control. For supreme torsional response the Ultra Flagship's Ultra Core has bamboo stringers along the edges, and for unmatched speed it's built with our fastest Ultra Base that comes factory waxed with multiple wax types for better glide in variable snow temperatures.

Flagship

THE FREERIDE FOUNDATION

Ideal for freeriding and fall line freestyle

The Flagship excels in technical terrain and is one the most confidence inspiring free ride boards on the planet. Featuring a directional rocker profile + Traction Tech 3.0 for unmatched edge grip on hard snow and a 3D Contour Base 3.0 for epic float in pow, the Flagship carves, stomps or straight lines with unbelievable precision. The Flagship's tapered shape sinks the tail in pow for better float and quicker turns, while the Engineered Veneer Topsheet, Flax/Basalt Power Stringers and Power Core add torsional response and reduce board chatter in rough snow. The Flagship also has Float Pack inserts that give you the option of super setback stance on the deepest days.

Ultra Solution

THE BACKCOUNTRY LINE BOMBER

Ideal for technical backcountry lines

The Ultra Solution is built for powerful riders who like to throttle turns at top speed and push the limits of what's possible in the backcountry. The Ultra Solution features a directional freeride shape, directional rocker profile and a stiff flex that makes it the most stable, damp and responsive split in the Jones line. For better float in pow, the Ultra Solution's tapered shape sinks the tail and the 3D Contour Base makes every turn more effortless. For added response the Ultra Solution is built with an Ash Veneer topsheet, 2x Carbon stringers and a new Ultra Core that has ultralight Koroyd sections in the nose and tail that absorb chatter at a fraction of the weight of wood. For added edge grip and torsional board lock, the Ultra Solution features Inner/Outer Traction Tech 3.0 and Karakoram 3C Clips that clamp together with a three point tension system.

Solution

THE ULTIMATE ALL-TERRAIN SPLITBOARD

Ideal for backcountry freeriding and wilderness exploration

The Solution is the ultimate all-terrain splitboard and delivers unrivaled backcountry performance in any snow condition. Featuring a directional freeride shape, directional rocker profile and a mid-stiff flex, the Solution is playful in soft snow, yet confidence inspiring on steep, hard snow. For better float in pow, the Solution's tapered shape sinks the tail and the 3D Contour Base makes every turn more fluid and effortless. For added response, the Solution is built with our premium Ultra core, Flax/Basalt Power stringers and an ECO-plastic topsheet. For added edge grip and torsional board lock, the Solution features Inner/Outer Traction Tech 3.0, plus Karakoram Tip-Lock clips that lock closed, and Karakoram Ultra Clips 2.0 that are smaller and lighter than the original Ultra clip design.

Project X

NEW SIZE

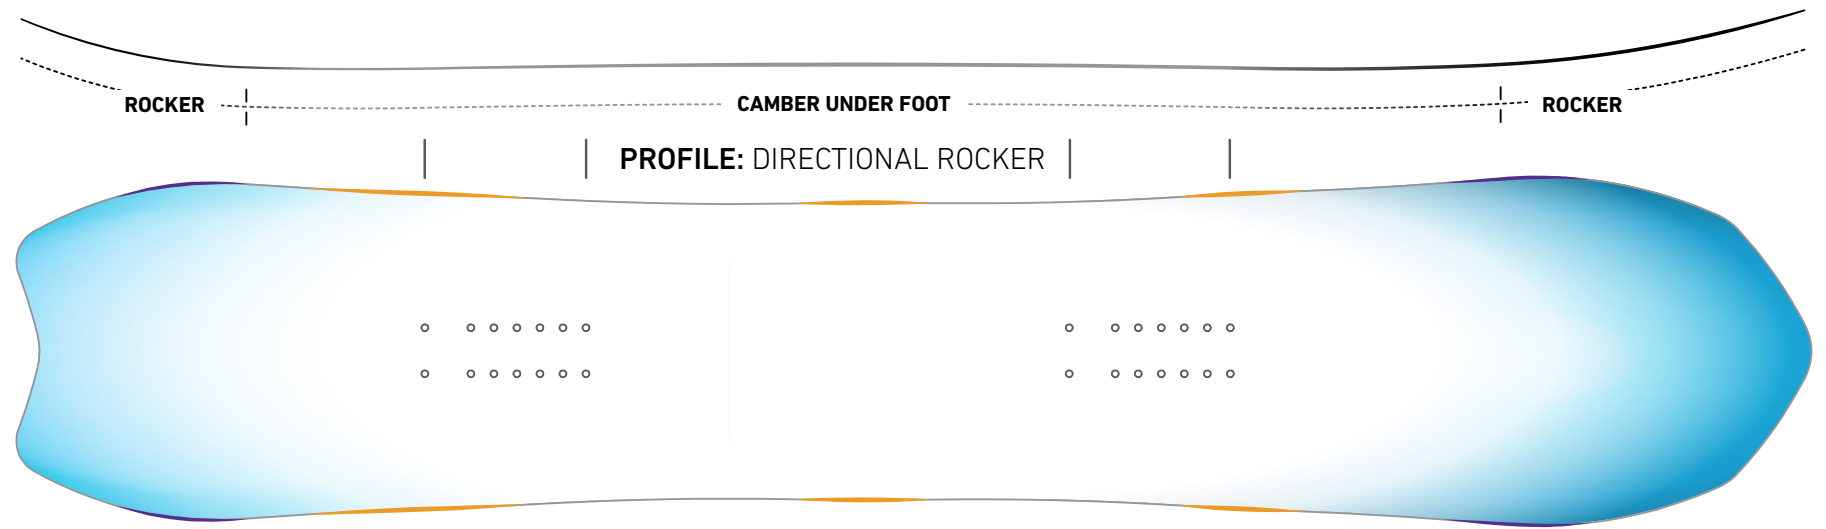

FLYWEIGHT ALL-MOUNTAIN RAZOR

Ideal for park, pipe and all-mountain charging

The Project X is a hybrid all-mountain board that rides smooth and powerful like a luxury sports sedan. It is the same shape as the Stratos, but it's built with ultralight, premium materials and Fusion Carbon construction. The tapered shape drops the tail in pow for more float and the 3D Contour Base, narrow sidecut and mid-stiff flex offer the perfect balance of turn performance and stability at speed. The directional rocker profile and Traction Tech 3.0 keep the Project X locked on edge accelerating into carves. The nose and tail sections of the Project X's Ultra core are built with Koroyd, an ultralight composite material that is lighter than any wood, but super damp and durable. The Project X also features two layers of Carbon stringers for insane pop and Float Pack inserts that offer a setback stance option for the deepest days.

Stratos

THE MODERN ALL-MOUNTAIN RIPPER

Ideal for all-conditions freeriding, freestyle and carving

The Stratos is a hybrid all-mountain board built with the body of a directional freeride board and the spirit of a freestyle board. The Stratos has a playful board feel thanks to a narrow sidecut and friendly flex, but the 10mm of taper and 3D Contour Base 3.0 give it the float and turn performance of a pow board. The directional rocker profile and Traction Tech 3.0 keep the Stratos locked on edge accelerating into carves and the textured Eco-plastic topsheet and Basalt stringers add torsional response and reduce board chatter in rough terrain. The Stratos also features Float Pack inserts that offer a setback stance option for the deepest days.

Ultra Stratos Split

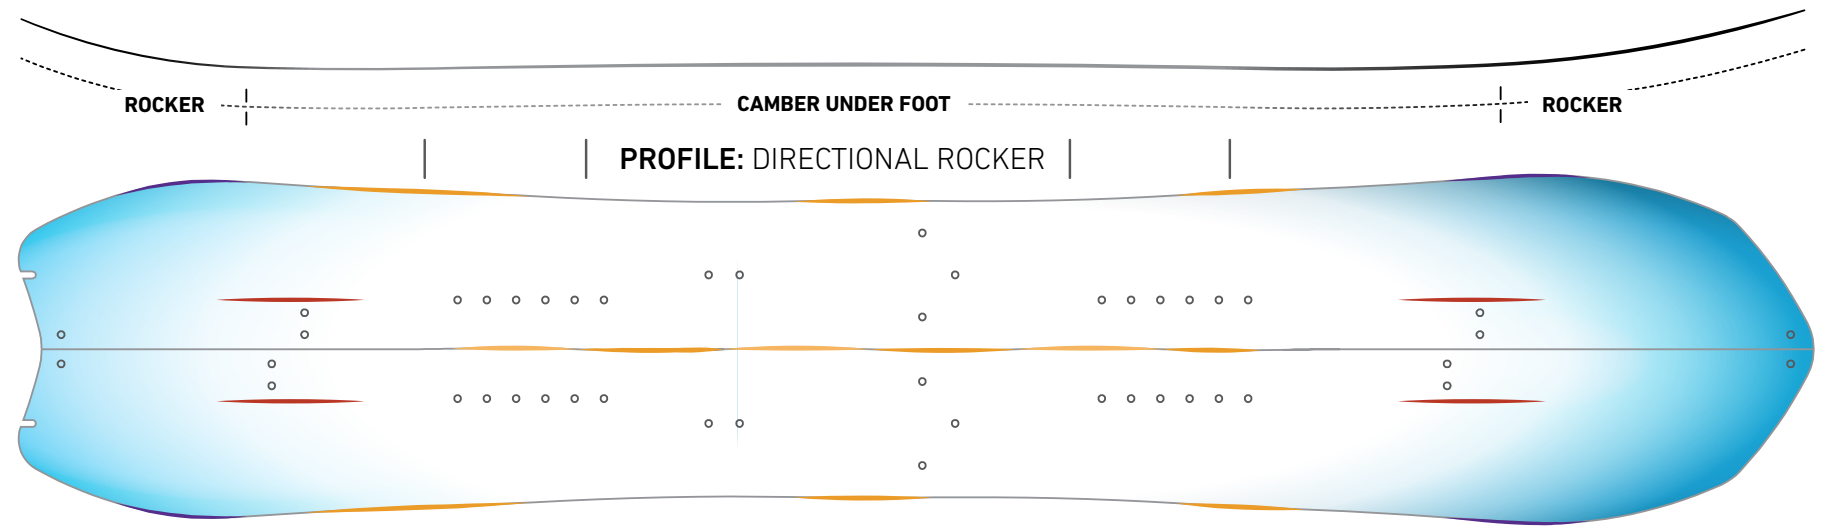

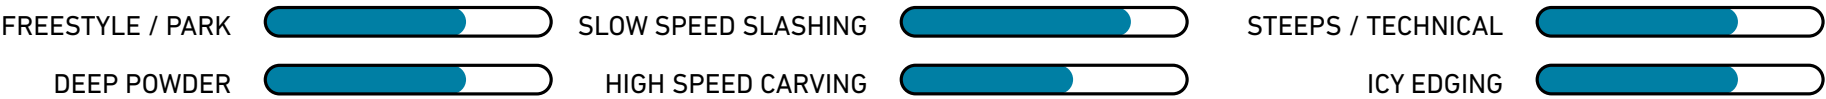

NEW MODEL

THE ULTRALIGHT, ALL-TERRAIN SPLITBOARD

Ideal for all-conditions touring and technical backcountry descents

The new Ultra Stratos Split is a dynamic and versatile ultralight splitboard built for extending your range and pushing your riding potential in all-conditions. Built with the body of a directional freeride board and the spirit of a freestyle board, the Ultra Stratos has an energetic board feel thanks to a narrow sidecut and a camber heavy directional rocker profile. For added float and quick edge-to-edge response, the Ultra Stratos features 10 mm of taper and a 3D Contour Base 3.0. The Ultra Stratos is built with our ultralight Fusion Carbon construction including a wood core made with two sections of Koroyd that absorb chatter at a fraction of the weight of wood. For added edge grip and unmatched torsional board lock, the Ultra Stratos Split features Inner/Outer Traction Tech 3.0, the Boltless Bridge, Karakoram Tip Lock Tip Clips and Karakoram 3C Clips that clamp together with a three point tension system. The Ultra Stratos Split is designed for expert splitboarders who tour in all snow conditions and whose eyes are drawn to creative lines full of terrain features.

Stratos Split

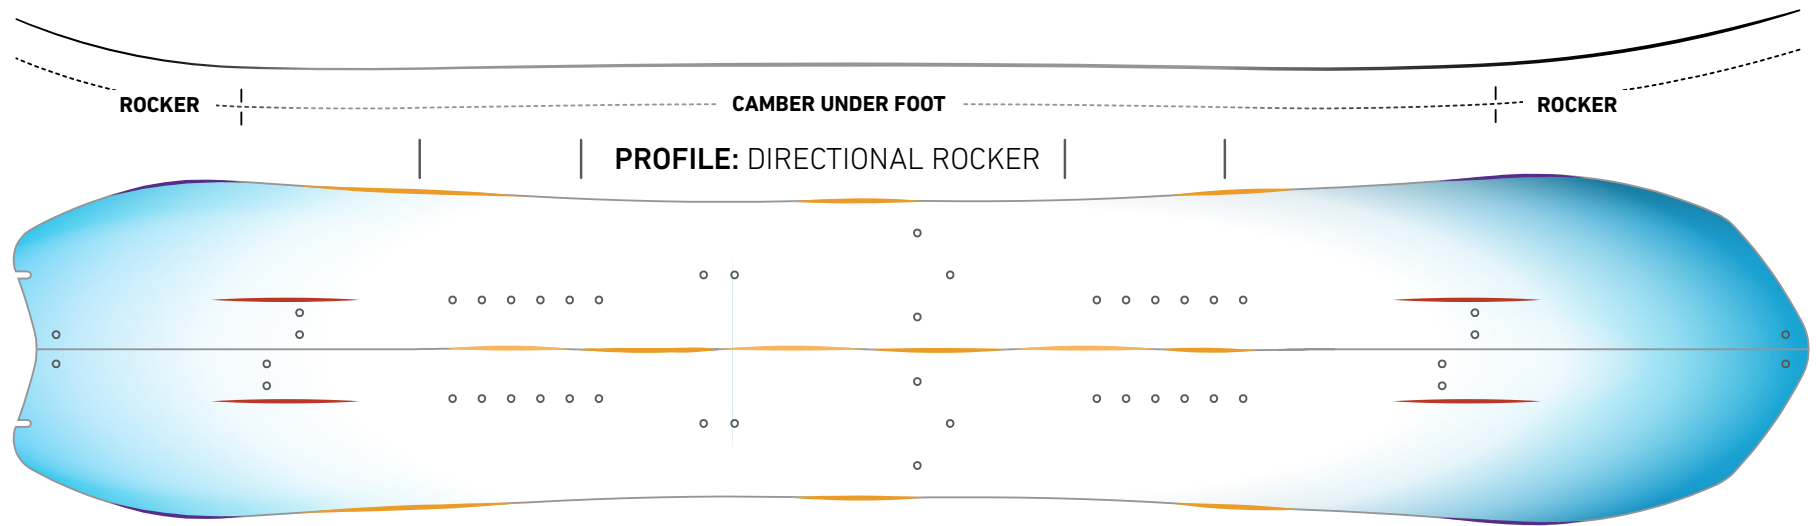

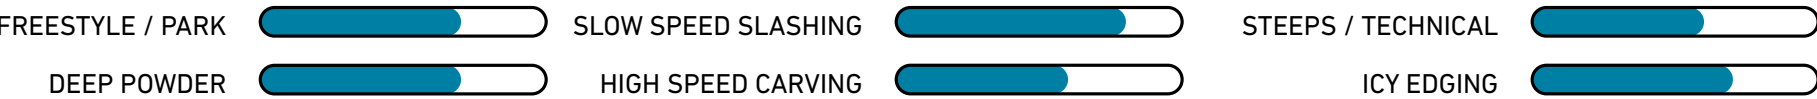

NEW MODEL

THE ENERGETIC, RIDE ANYTHING SPLITBOARD

Ideal for all-terrain touring and backcountry freestyle

The new Stratos splitboard is an all-conditions, all-terrain splitboard built for ripping turns, slashing gullies and boosting airs in the backcountry. A directional freeride shape blended with the board feel of a freestyle stick give the Stratos Split a remarkable energy on snow. The Stratos Split's energetic board feel is thanks to a narrow sidecut, friendly flex and camber heavy directional rocker profile, while 10mm of taper and a 3D Contour Base 3.0 keep the Stratos Split super quick edge-to-edge. For added response, the Stratos Split is built with our premium Ultra core, Flax/Basalt Power stringers and an ECO-plastic topsheet. For added edge grip and epic torsional board lock, the Stratos Split features Inner/Outer Traction Tech 3.0, the Boltless Bridge, and Karakoram Ultra Clips 2.0. Nimble and confident in any terrain, the Stratos Split makes you want to slice and dice your way down a run the most fun way possible.

Frontier

THE ALL-TERRAIN, SHRED EVERYTHING BOARD

Ideal for freeride, freestyle and backcountry pow

The Frontier is a directional freeride board designed to be the perfect daily driver for the playful all-mountain shredder. Featuring a floaty, freeride nose matched with a freestyle tail, the Frontier is ideal for pow days, park days and every day in between. The Frontier’s Directional shape, Directional Rocker profile and Traction Tech 2.0 edges provide confident stability riding through tech terrain or rough snow while the spooned nose+tail edges on the 3D Contour Base 1.0 reduce edge catch and make it easy to turn in tight terrain. The Frontier offers high performance without skimping on materials as it’s built with a Sintered 8000 base, an Eco-plastic topsheet and a Classic Core that is specially profiled between the feet for added pop.

Surf Series

Mountain Surfer

NEXT LEVEL SURF SLED

Ideal for powder surfing and backyard exploration

The Mountain Surfer is a next level powder board built to surf the earth without bindings. From backyard hills to full on backcountry descents, the Mountain Surfer offers a whole new perspective on riding powder. Surf shaper Chris Christenson and Jeremy Jones designed the Mountain Surfer's complex 3D contours using the same hydrodynamic principles Chris uses to design surf boards. The Mountain Surfer features a Spoon nose for float, a 3D center hull for improved glide and 3D stepped edges for turn precision. The Mountain Surfer has a sintered p-tex base, ABS sidewalls and a wood core but no metal edges or binding inserts. To keep you attached after a closeout barrel, the Mountain Surfer includes a foam deck pad and an eyebolt. The Mountain Surfer comes in two sizes: 142cm & 152cm.

FEATURES

- Christenson Surf Rocker
- Full poplar woodcore
- Wax sintered base
- Biax fiberglass
- White ABS sidewall
- Thin durable topsheet
- 3D pad with tail kick
- M6 insert for leash attachment
- M6 eyebolt included
- Premium coiled leash included

Storm Wolf

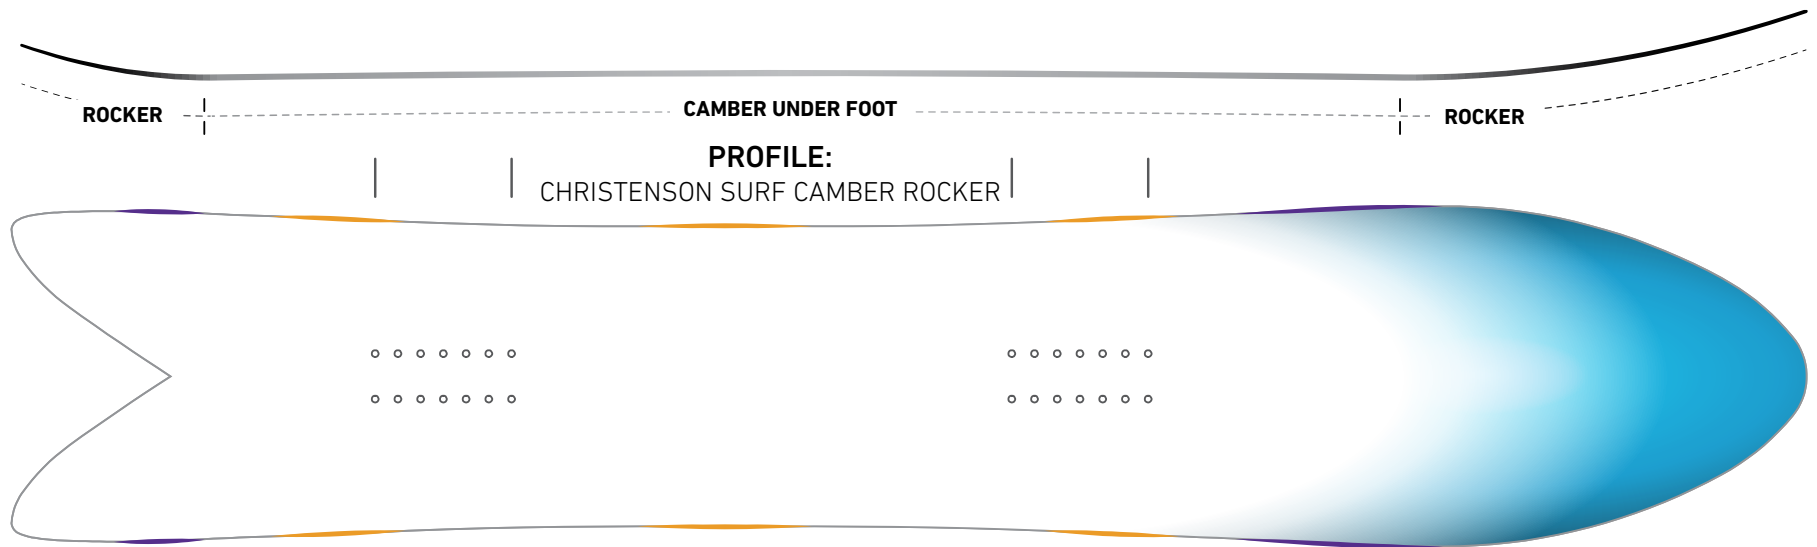

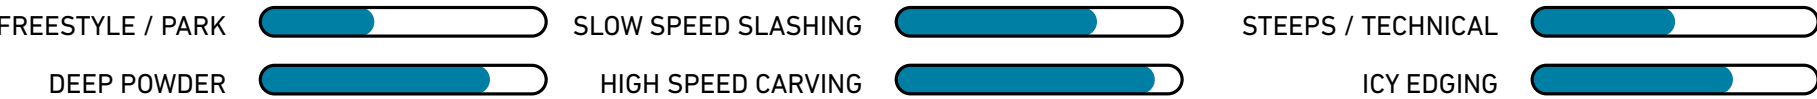

NEW SIZE

THE SLICING AND DICING SPEED ARROW

Ideal for high speed slashing in any condition

The Storm Wolf is a high powered swallowtail that blends the all-mountain versatility of a directional freeride board with signature Surf Series turn performance. Surfboard shaper Chris Christenson and Jeremy Jones designed this new model by combining the shape and profile of the current Storm Chaser and the retired Lone Wolf, hence the name. The Storm Wolf features a Surf Camber profile, long sidecut, mid-stiff flex, 3D Contour Base 3.0 and Traction Tech 3.5 edges. The Surf Camber profile, long sidecut and Traction Tech Edges keep you locked in railing turns at speed while the 3D Contour Base and tapered swallowtail shape help you break loose slashing gullies and transitions. To absorb chatter and punch through rough snow patches, the Storm Wolf construction includes new Flax/Basalt Power Stringers and an ECO-Plastic topsheet. **New for 22/23, we moved the stance inserts up 20mm to allow for a more centered stance and improve carving performance.**

Expand your mind, expand your mountain.

Mind Expander Collection

The surf-inspired alternative all-mountain board.
Expanded collection to fit riders of all sizes.

Ultra Mind Expander

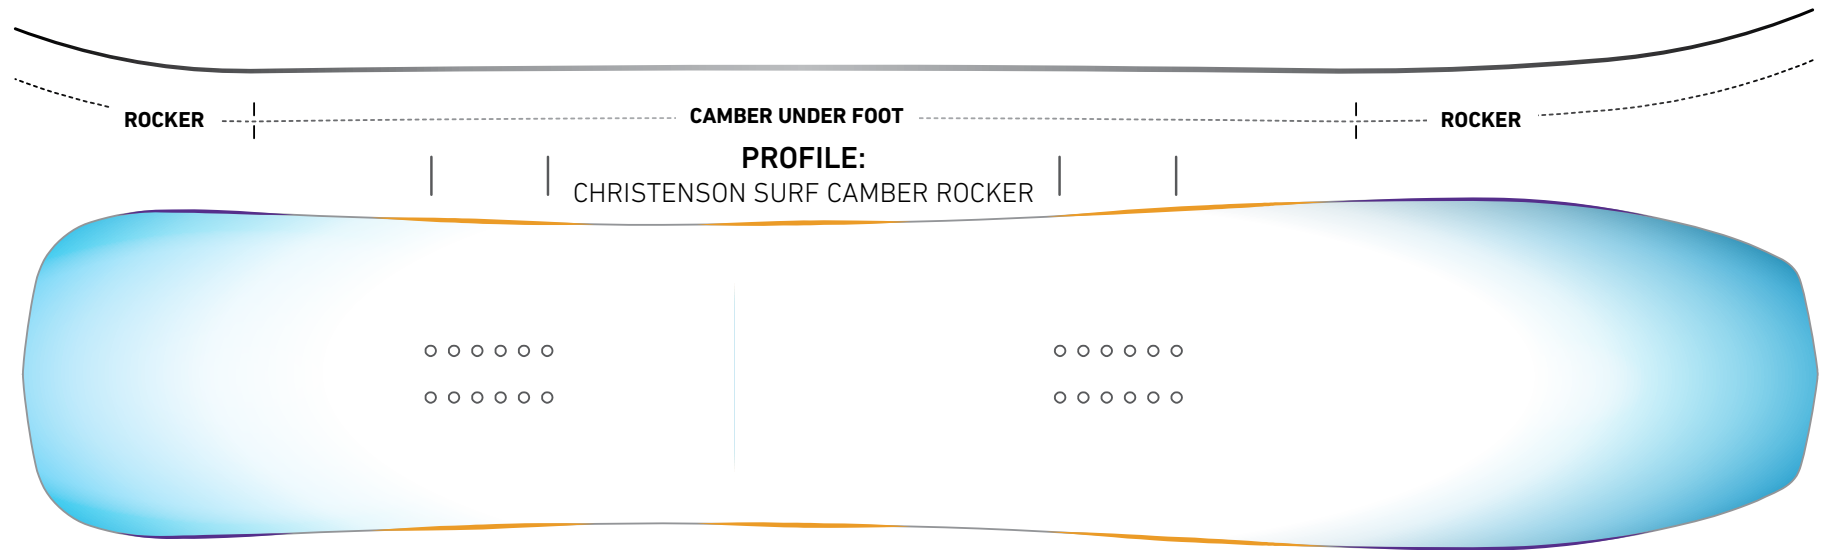

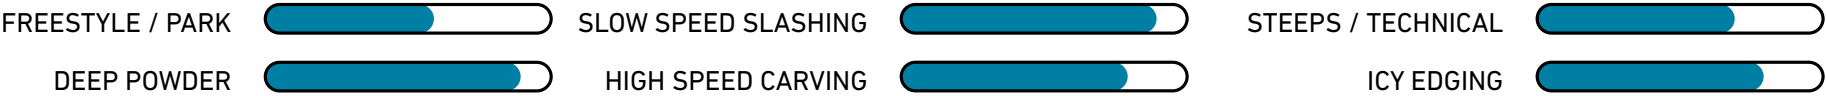

ALTERNATIVE ALL-MOUNTAIN CHARGER

Ideal for creative freeriding and freestyle

The Ultra Mind Expander is a super charged alternative all-mountain board designed for high speed slashing and freeriding. We stepped up the top speed of the playful Mind Expander by adding premium materials and a stiffer flex to the Ultra Mind Expander. The Surf Camber profile and Traction Tech 3.0 give the Ultra unmatched float and edge hold while the Ash wood veneer topsheet, Basalt Power stringers, Power Core and Triax Carbon Innegra suck up chatter in rough terrain. The Ultra shares the standard Mind Expander's 3D Contour Base 3.0 and hybrid directional shape. The blunted nose, full size tail and tight sidecut offer the nimble maneuverability of a directional board matched with the freestyle abilities of a directional twin. For added speed and stance options, the Ultra Mind Expander has a smoking fast Sintered 9900 base, and **new for 22/23, we moved the stance inserts up 20mm to allow a more centered stance and improve carving performance.**

Mind Expander Twin

NEW SIZES

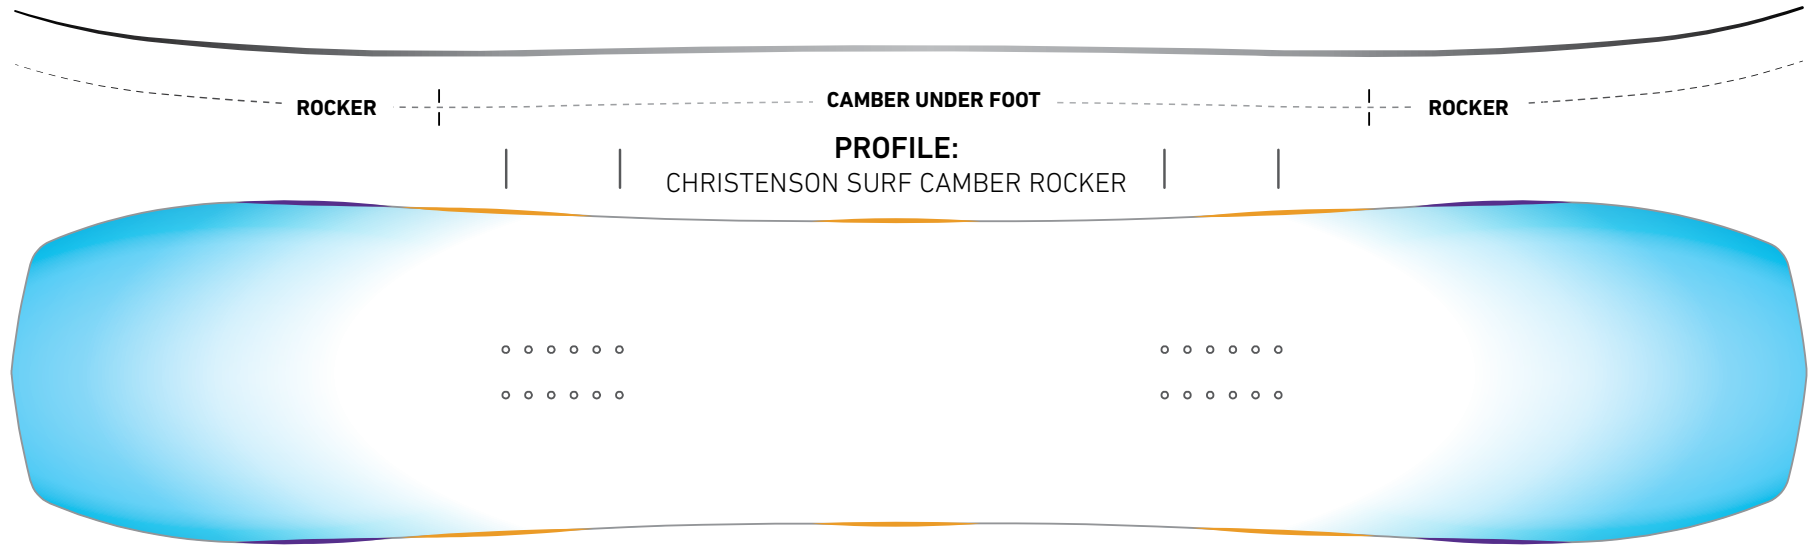

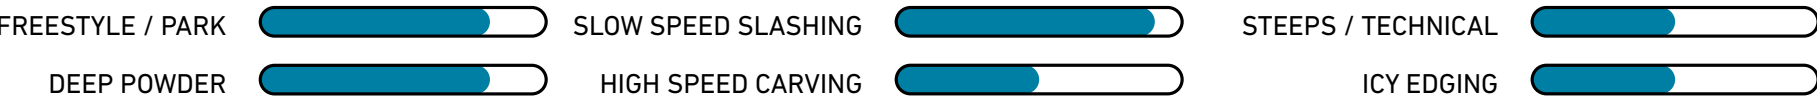

THE FLOATY FUN FREESTYLER

Ideal for slashing pow, poppin' pillows and tossin' tricks

The Mind Expander Twin is a hybrid Surf Series model that blends the playful, easy going board feel of the Mind Expander with the freestyle performance of a directional twin shape. The Mind Expander Twin's fun loving personality is defined by it's friendly flex, tight sidecut, Christenson Surf CAMBER profile and 3D Contour Base 3.0. The blunted, twin shape and 3D Contour Base make riding switch and buttering pow extra easy while the narrow sidecut and Surf Camber profile offer snappy turn response. For a damp ride and confident edge control on chop or ice, the Mind Expander Twin also features Flax/Basalt Stringers and Traction Tech 3.5 edges. Riders who live to bounce down the mountain hitting every terrain feature in sight will love this new alternative freestyle board.

Mind Expander Split

NEW PROFILE

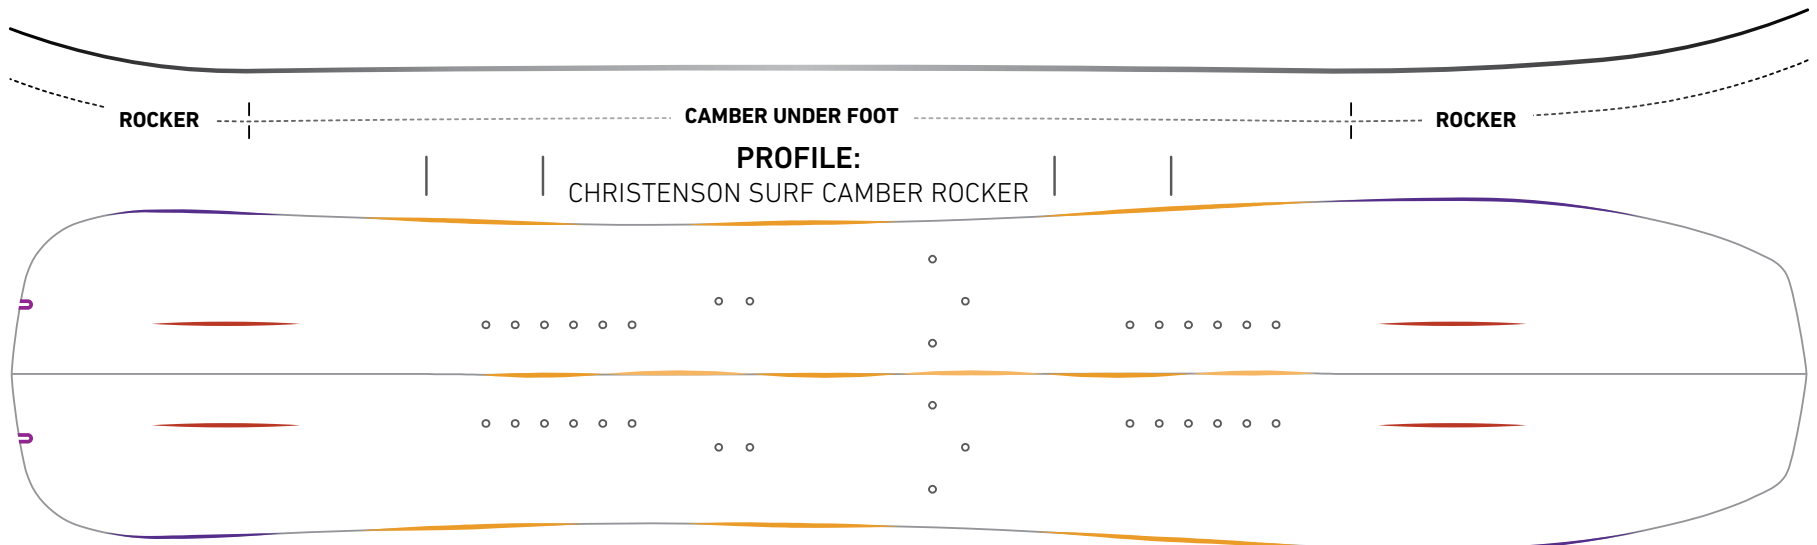

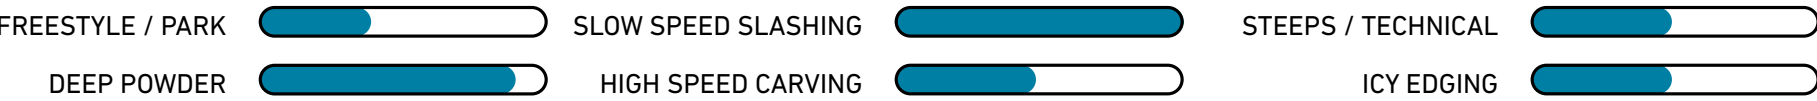

ALTERNATIVE BACKCOUNTRY SHREDDER

Ideal for trees, powder and backcountry surf slashing

The Mind Expander Split was built for the creative rider who weaves nimble and playful lines as they slash through the backcountry. Designed by surf shaper Chris Christenson and Jeremy Jones, the Mind Expander Split features a hybrid directional shape with a blunt nose for epic float in pow, a full size tail for legit freestyle performance, and a short sidecut for snappy turn potential. **New for 22/23, the Mind Expander Split now features a Surf Camber profile for better edge hold in variable conditions and the stance was moved forward 20mm for improved carving performance.** To keep the playful board feel, the Control Split Core has V-core profiling that gives the board a softer flex between the feet for easy turn initiation and a stiffer flex in the tips so you won't fold the nose. For enhanced grip on icy skintracks or firm descents the Mind Expander Split has Inner/Outer Traction Tech 1.0 edges, and for unmatched torsional board connection in ride mode, the Mind Expander Split features the Boltless Bridge plus Karakoram Ultra Clips 2.0 and Tip-Lock Tip Clips.

Storm Chaser

SURF-INSPIRED POWDER SLASHER

Ideal for surfing frozen waves and snorkel deep days

The Storm Chaser is a power packed swallowtail that offers magical float in pow and radical carving potential. Surfboard shaper Chris Christenson designed the rocker profile and base contours of the Storm Chaser by using the refined dimensions of his fastest gliding surfboards. The result is an explosively fast powder rocket that packs insane float into a nimble, short board. The ultra-wide waist width and 3D Contour Base 3.0 help maximize the float of the short running length and the Surf Rocker profile pops the nose even further out of the snow when you rock into a bottom turn. For a lively board feel, the Storm Chaser features a Bamboo Surf Core, and an ultra fast and durable Sintered 8000 base.

Storm Chaser Split

THE BACKCOUNTRY SURF SLASHER

Ideal for surfing frozen waves and snorkel deep days

The Storm Chaser Split unlocks access to those remote frozen swells and packs insane float into a short, but still high volume splitboard. The ultra-wide waist width maximizes the float of the shortened running length and the Surf Rocker profile pops the nose out of the snow when you step on the gas. The Storm Chaser's short sidecut will have you ripping tight tree runs like a GS course on even the deepest days. The unique shape is matched with Inner/Outer Traction Tech 1.0 edges for enhanced grip on icy skintracks or firm descents and the Boltless Bridge plus Karakoram Ultra Clips 2.0 and Tip-Lock Tip Clips for unmatched torsional board connection in ride mode. For a lively board feel, the Storm Chaser Split features a Control Split Core, and an ultra fast and durable Sintered 8000 base.

Directional All-Mountain

Tweaker

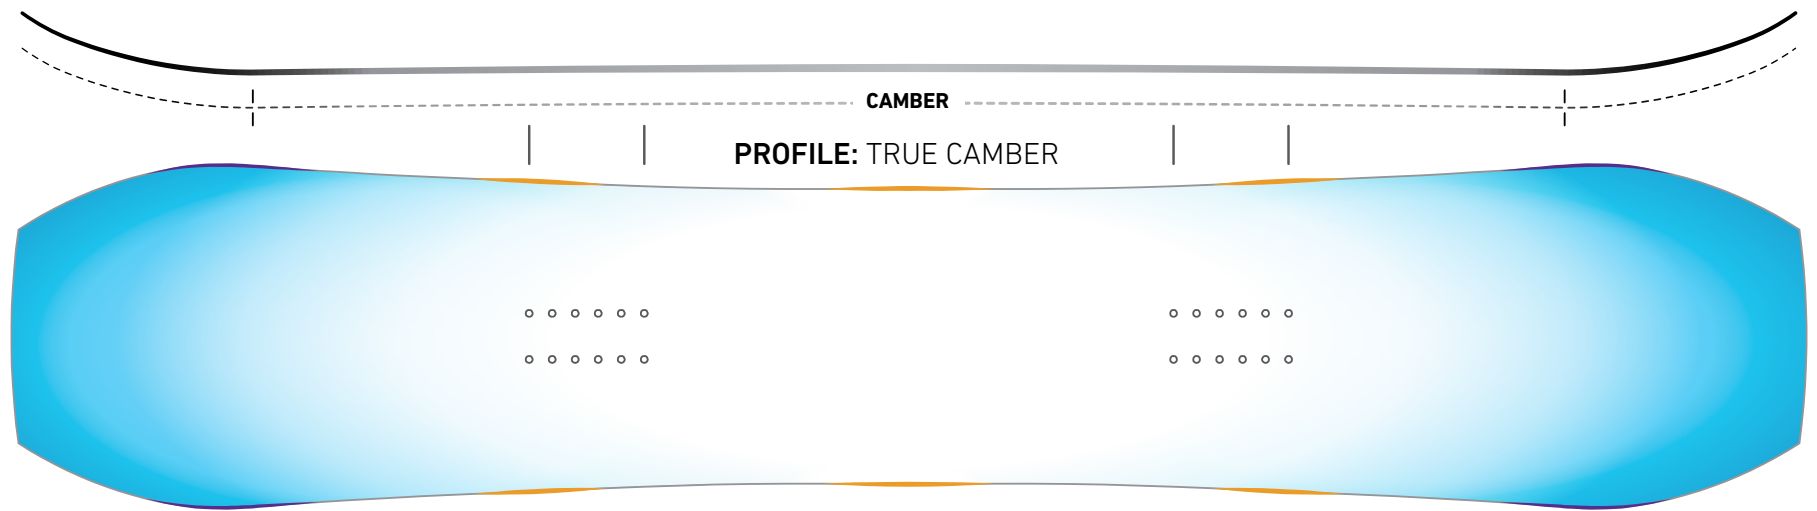

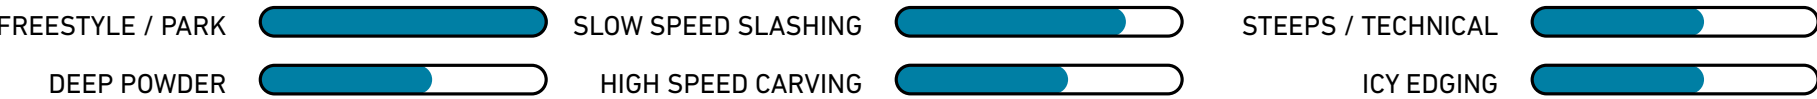

NEW MODEL

THE FUN HOGGIN’ FREESTYLER

Ideal for freestyle trickery and all-mountain ripping

The new Tweaker is a freestyle focused true twin that’s built to pop ollies, toss tricks, and carve creative lines in any terrain. A True Twin shape, buttery flex and True Camber profile give the Tweaker a playful, evenly balanced board feel, but don’t mistake the Tweaker for your average freestyle twin. The Tweaker’s unique double radius nose and tail profile maximise the running length of the blunted shape and offer amazing float, while the V-core profiling on the Tweaker’s Classic Core makes the flex softer between the feet for nimble maneuverability and stiffer in the tips for supreme stomp-ability. The Tweaker has Traction Tech 2.0 edges for added edge grip riding through rough snow, and the spooned nose and tail edges on the 3D Contour Base 3.0 reduce edge catch and make it easy to butter and board slide. Finished with a Sintered 8000 base and an Eco-plastic topsheet, the Tweaker is a durable and high performance modern manifestation of a timeless true twin snowboard shape.

Aviator 2.0

NEW SIZES

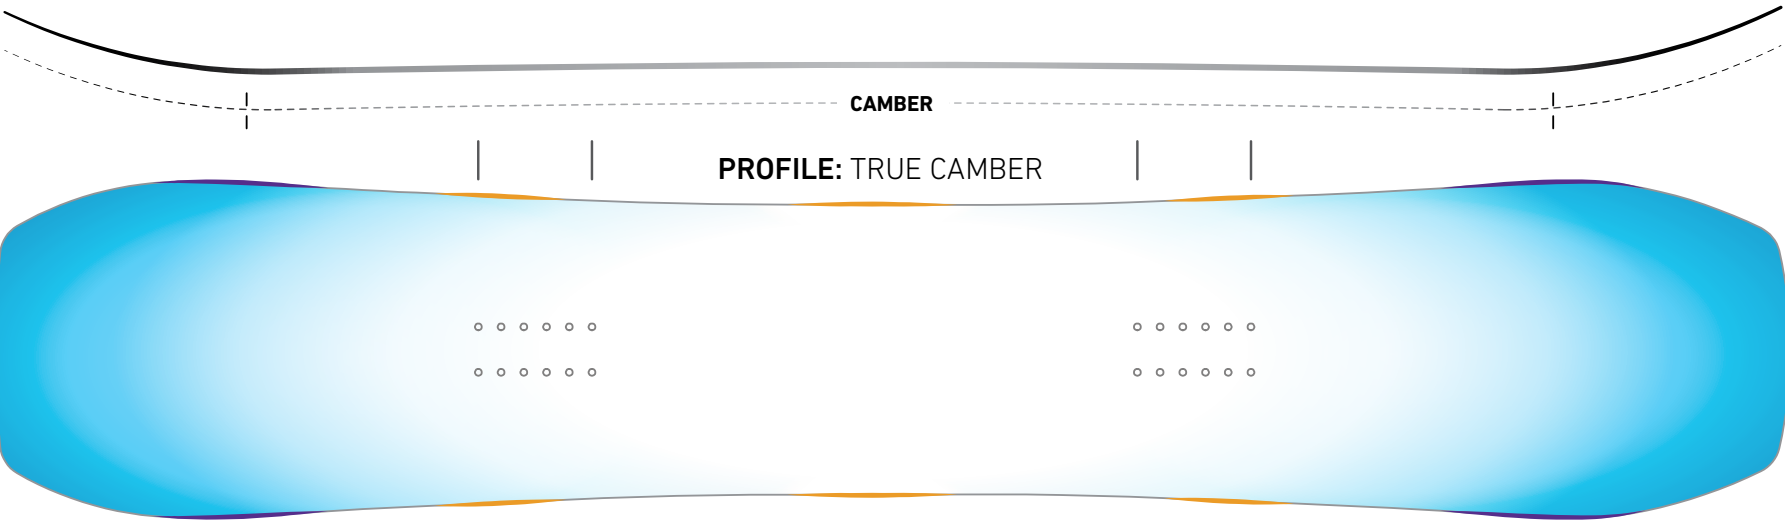

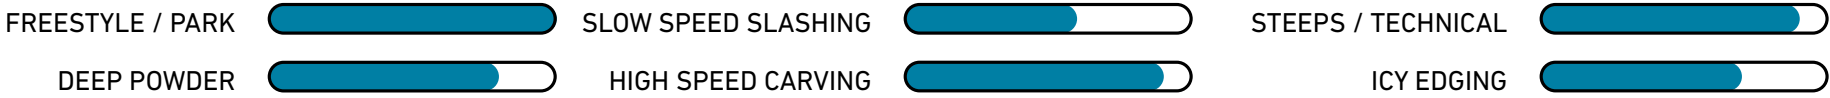

HIGH FLYING PERFORMANCE

Ideal for high performance all-mountain charging and carving

The Aviator 2.0 is a hard charging directional twin built for expert all-mountain riders who like to rail turns and stomp airs anywhere on the mountain. This Aviator was designed in collaboration with Jones team rider Victor de la Rue and Jimmy Goodman. What sets the Aviator apart is its TRUE CAMBER profile. Victor and Jimmy swear by the power of full camber for edging on steeps and landing tricks on the tail. The Aviator also features a 3D Contour Base 2.0, Sustainable Flax/Basalt stringers, an ECO-Plastic topsheet and Traction Tech 3.5 edges. The 3D Contour Base starts after the contact point and helps eliminate edge catch and improve turn fluidity while the Triax fiberglass and stringers under the Eco-Plastic topsheet offer supreme pop and lightning fast response. The Aviator’s Power Core includes a section of ultralight Koroyd in the nose that absorbs chatter at a fraction of the weight of wood.

Mountain Snowskate

THE SNOWY SIDEWALK SECRET WEAPON

Ideal for switching up your resort game and shredding the streets

The Mountain Skate is a premium snow skate that’s designed for riders of all abilities and built with cutting edge snowboard tech. The Mountain Skate’s sub deck offers both carving and freestyle performance thanks to the tapered directional twin shape, CamRock profile and 3D Contour Base 1.0. The construction of the sub deck is just like a miniature Jones board and features a FSC wood core, Biax fiberglass and recycled edges + sidewalls. The Top Deck is shaped like a concave skateboard deck and is also built with bomber snow-proven materials including a FSC wood core, Biax fiberglass and full wrap ABS sidewalls. For added traction, the top deck is lined with a full length foam pad, and for precise turn performance, the Mountain Skate has premium, aluminum snow skate trucks.

SUB DECK (SKI) FEATURES

- Directional Twin shape
- 10mm of taper nose to tail
- CamRock profile - rocker tips, camber between trucks
- 3D Contour Base 1.0 on tip and tail
- Blunt nose
- Progressive sidecut for smooth turn initiation
- Length: 115cm
- Industry leading standard truck insert pattern
- Snowboard construction

TOP DECK FEATURES

- Concave top contours with reinforced nose and tail kick
 - Directional Twin shape - nose 1cm longer than tail
 - Full length foam traction pad
 - Length: 91cm / 36in
 - Width: 24cm / 9.6in
 - Industry leading standard truck insert pattern
-
- Jones Trucks (Pivot)
 - Premium coiled leash included

Ultra Mountain Twin

THE FREERIDE FOCUSED TWIN

Ideal for slashing, jibbing and jumping

The Ultra Mountain Twin is a lean and mean directional twin freestyle board built with speed boosting, chatter sucking premium materials. It's designed for the expert freerider who likes to throw big tricks outside the terrain park. The Ultra Twin's shape features blunt tips for reduced swing weight, Traction Tech edges to keep you locked in on firm snow and a 3D Contour Base that makes every turn more effortless. Balanced rocker in the tip and tail deliver serious float in pow, while camber underfoot gives the Ultra Mountain Twin snap and hold on hard pack. The Sintered 9900 base provides the speed boost you need to go big off any feature and the Flax/Basalt Power Stringers plus Ash Veneer topsheet provide the stability to stomp. The Ultra Twin also has added stance options with the Freestyle/Freeride Stance Pack.

Mountain Twin

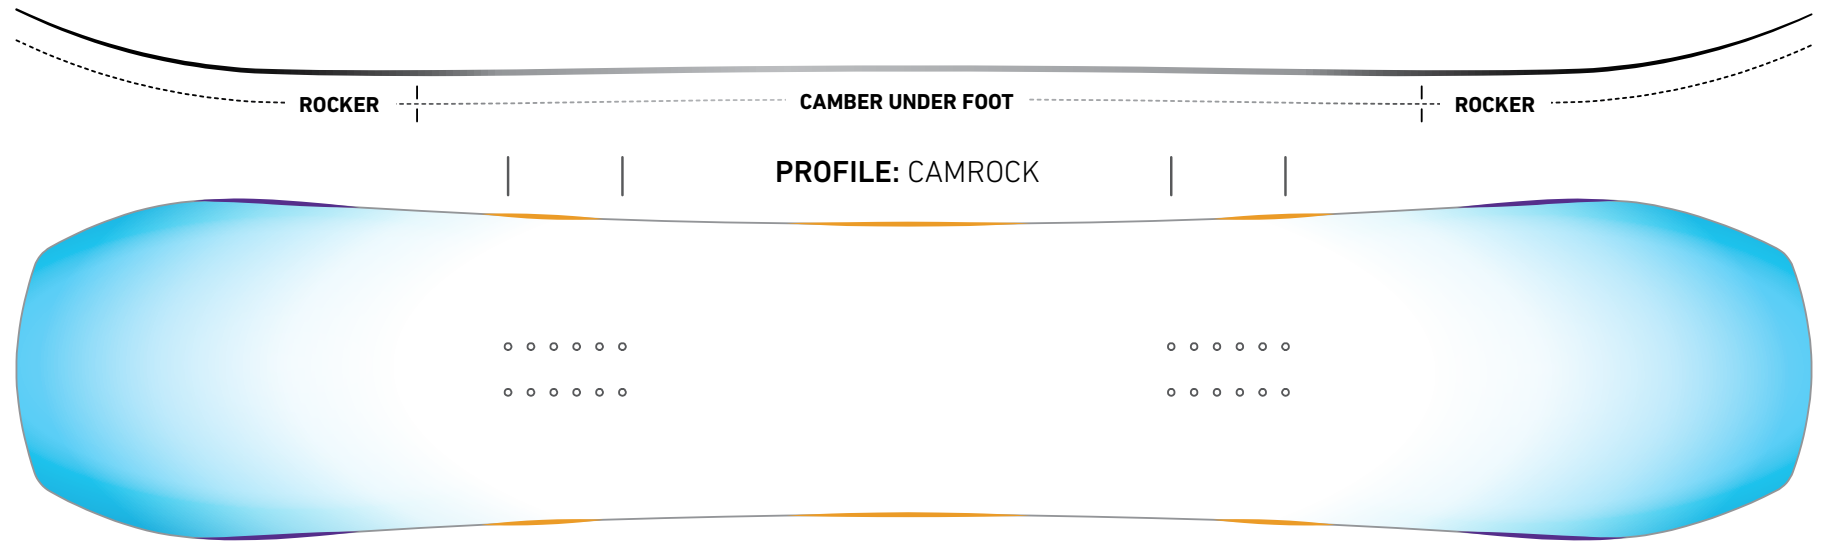

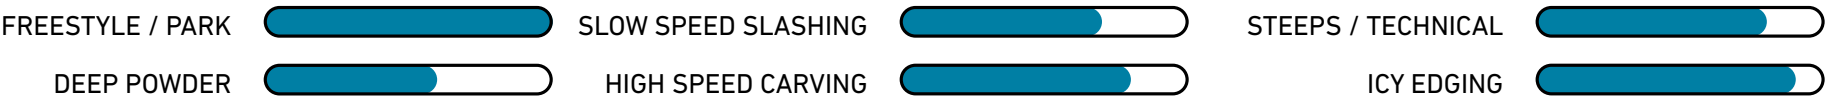

NEW SIZE

FREESTYLE MEETS FREERIDE

Ideal for slashing, jibbing and jumping

The Mountain Twin is a versatile directional twin designed for playful shredders who want one board that can ride-it-all. It's built to shred the whole mountain like it's an endless skatepark without sacrificing float in pow or stability for bombing lines. The Twin's shape features blunt tips for reduced swing weight, Traction Tech edges to keep you locked in on firm snow and a 3D Contour Base that makes every turn more effortless. With a mid-stiff twin flex and a CamRock profile the Mountain Twin excels at poppin' pillows and pressin' boxes while it's also an easy board to turn and finesse in tight terrain. To complete the performance package, the Mountain Twin has a super fast and durable Sintered 8000 base and added stance options with the Freestyle/Freeride Stance pack.

Ultracraft

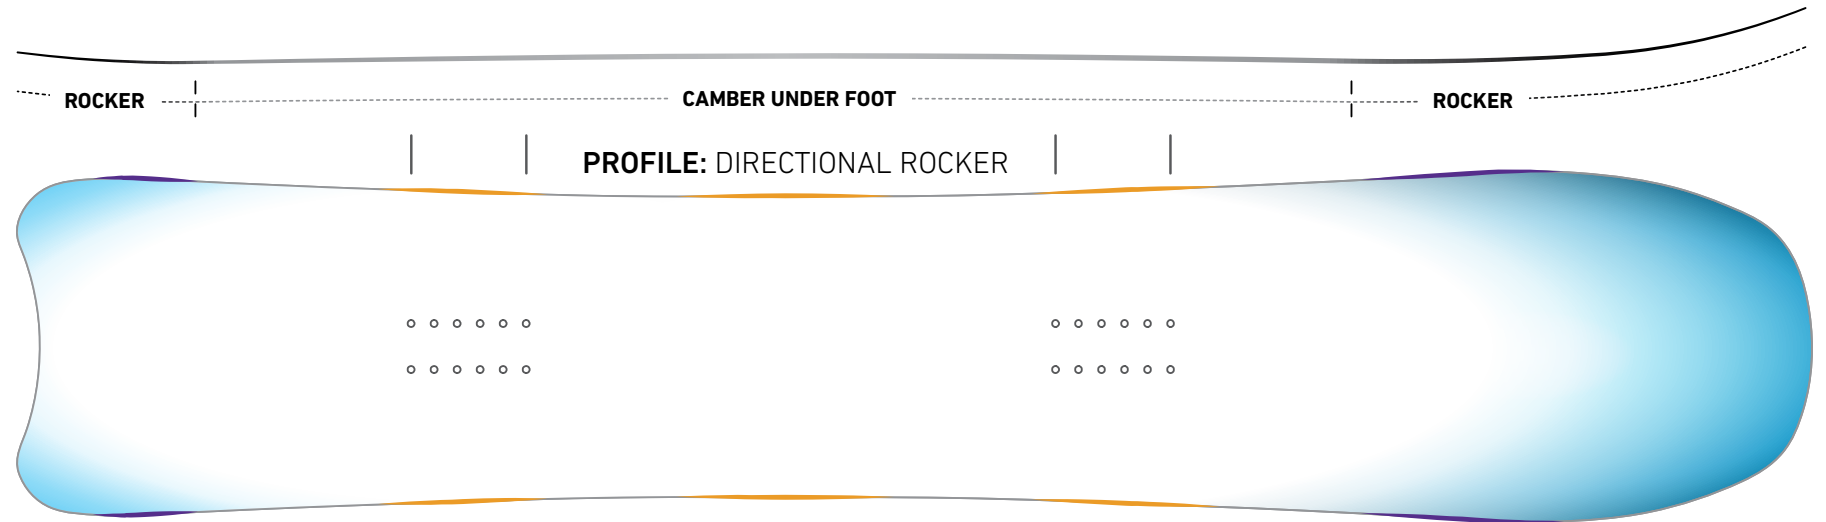

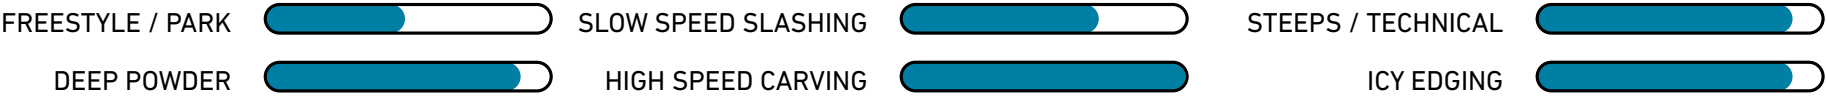

COLD SMOKE ROCKETSHIP

Ideal for resort pow, cat boarding and carving

The Ultracraft is a high performance alternative freeride board that carves piste and rips pow like a race board. Featuring the same shape as the Hovercraft, only built with premium materials, the Ultracraft has no top speed railing turns in smooth snow. The rocker nose delivers epic float in pow while the stubby, stiff tail and long sidecut offer powerful board control when moving fast. The 3D Contour Base 3.0 features spooned nose and tail edges for improved float plus turn fluidity. The Ultracraft also features our Ultra Core for lightweight pop and an Ash Veneer topsheet plus Basalt Power Stringers for supreme torsional response, reduced board chatter and improved sustainability.

Ultracraft Split

ONE OF THE LIGHTEST SPLITBOARDS ON EARTH

Ideal for expedition touring and high alpine assaults

The Ultracraft Splitboard is one of the lightest, most technically capable splitboards on the planet. Despite it's featherweight, the Ultracraft is rock solid on descent as the directional rocker nose delivers epic float while the stubby, stiff tail offers powerful board control. The Ultracraft Split's 3D Contour Base makes every turn more effortless and the Fusion Carbon construction blends a wood core featuring ultralight Koroyd in the nose and tail, with multiple layers of carbon stringers to deliver our most damp and responsive Ultracraft Split yet. The Ultracraft Split also features the Boltless Bridge and Karakoram Tip Lock Tip Clips for unmatched torsional board lock, and ultralight Karakoram 3C Clips that clamp together with a three point tension system.

Hovercraft

THE NIMBLE ALL-CONDITIONS RACER

Ideal for pow slashing, crud busting and slaloming trees

The Hovercraft is an alternative freeride board who’s nimble maneuverability and diverse performance has earned it a cult following. It’s unique, compact shape matches a short tail with a long sidecut so you can rip turns of any size. The Hovercraft is designed to be ridden shorter than your average freeride board as the trim shape packs serious surface area in a small package. For serious float in any snow condition, the Hovercraft features a directional rocker profile and a 3D Contour Base 3.0, and for added edge grip it has Traction Tech 1.0 edges. For added eco-performance the Hovercraft has an Engineered Veneer Topsheet and a black + transparent base plus laser etched topsheet markings that eliminate all solvent inks. Without any inks on the board, not even the sidewalls, the new Hovercraft is the most sustainably produced men’s board we’ve ever made.

Inspired snowboards for inspired youth

Youth Series

” JEREMY JONES

I ride with kids all the time and the riding level of a kid who is putting in 20-50 days a year is really high. Their bodies are still made of rubber and they are not afraid to charge in mediocre conditions, so, in many ways, their equipment demands are even greater than adults. Offering these committed young riders our hardest charging boards had to happen. The kids are the future and that future will be better if the kids are charging! Now I just need to come to terms with the fact that the kids are going to be the ones doing the waiting at the bottom of the chairlift.

Ultra Prodigy

NEW MODEL

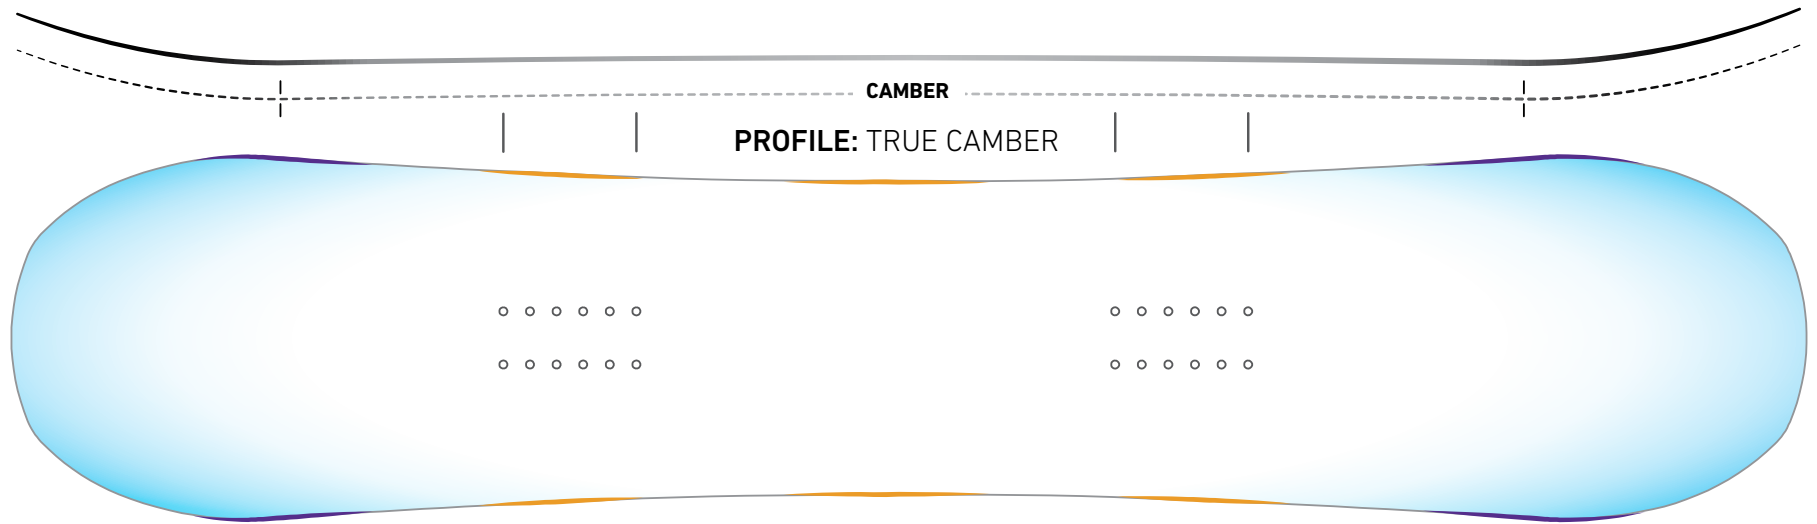

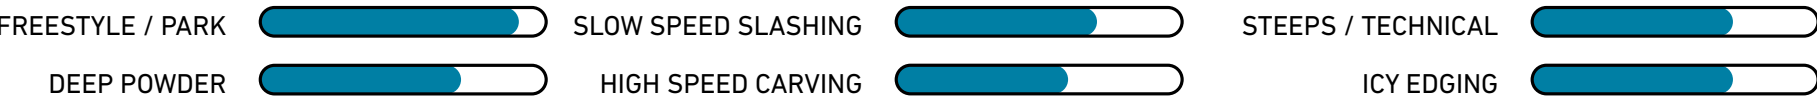

ULTIMATE PERFORMANCE FOR KIDS

Ideal for all-mountain freeriding and progressive youth freestyle

The Ultra Prodigy is our new all-mountain directional twin built for hard-charging kids whose skills and technical prowess on two edges defies their age. Super charged in every way, the Ultra Prodigy is the latest evolution of our belief that talented youth rippers deserve every bit of board performance that adults do. The Ultra Prodigy’s directional twin shape and True Camber profile offer versatile maneuverability everywhere from the trees to the terrain park, while the spooned nose+tail edges on the 3D Contour Base 1.0 allow for fluid ‘no catch’ turn initiation. The Ultra Prodigy is designed to be a little narrower than most youth boards so small-footed riders can learn to rail turns with the board up on edge. For racing around and beating parents down the mountain, the Ultra Prodigy has a Power Core, Basalt Power Stringers and a Sintered 8000 base. It’s also a little stiffer than the standard Prodigy for going big and riding fast.

Prodigy

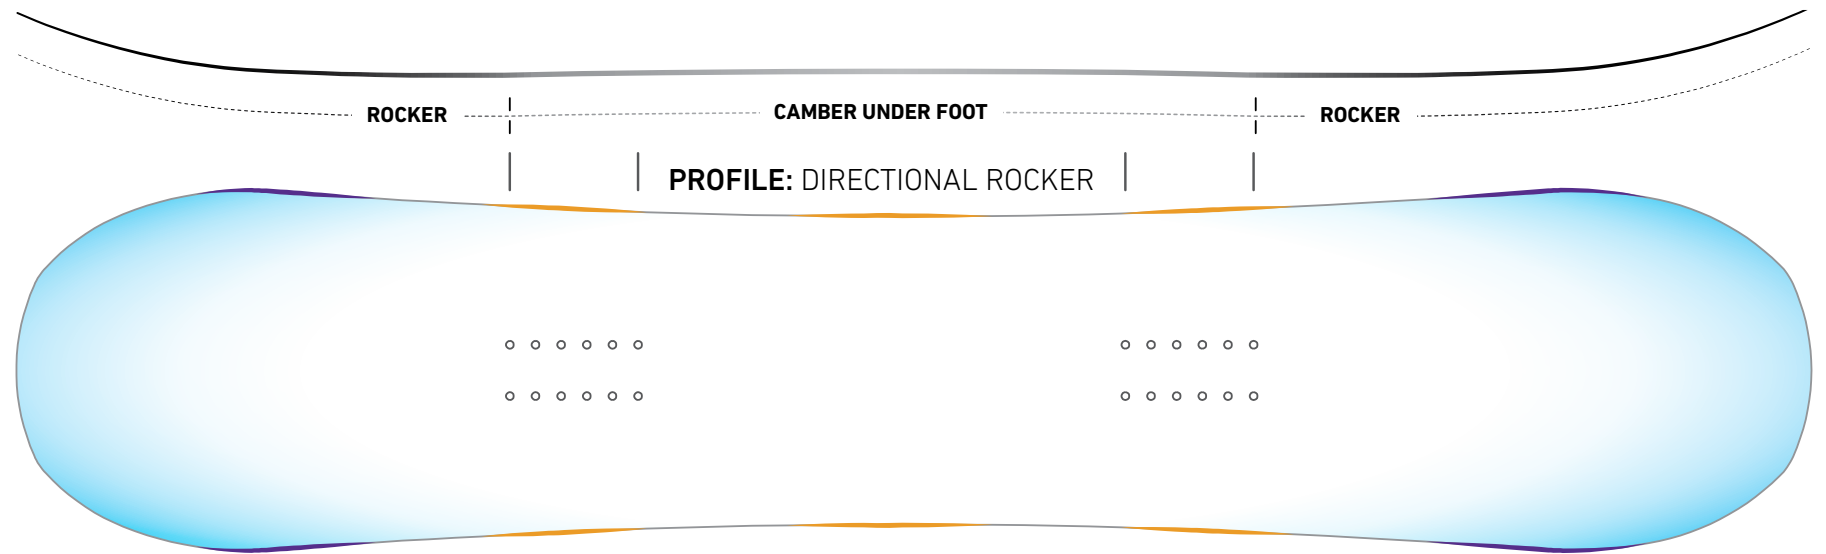

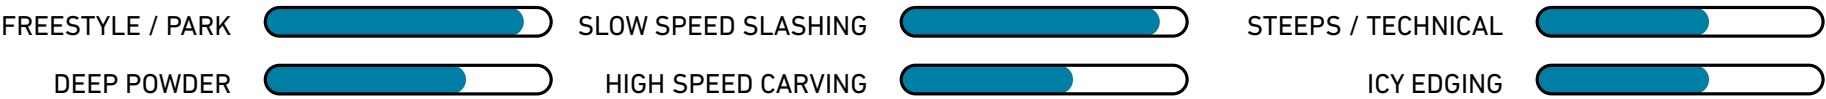

HIGH PERFORMANCE FOR KIDS

Ideal for freesytle, freeride, pow, corn or chop

The Prodigy is our all-mountain directional twin built for hard-charging kids. Most kids boards are made with very basic materials and are designed for first-time riders. Not the Prodigy. The Prodigy features the same premium materials and performance features as Jones’ adult models and offers quick learning young riders a solid foundation to keep progressing their skills. The spooned nose+tail edges on the Prodigy’s 3D Contour Base 1.0 allow for fluid ‘no catch’ turn initiation while the CamRock profile keeps the board floating in any snow condition. The Prodigy is also designed to be a little narrower than most other kids boards so small-footed riders can learn to rail turns with the board up on edge.

Youth Flagship

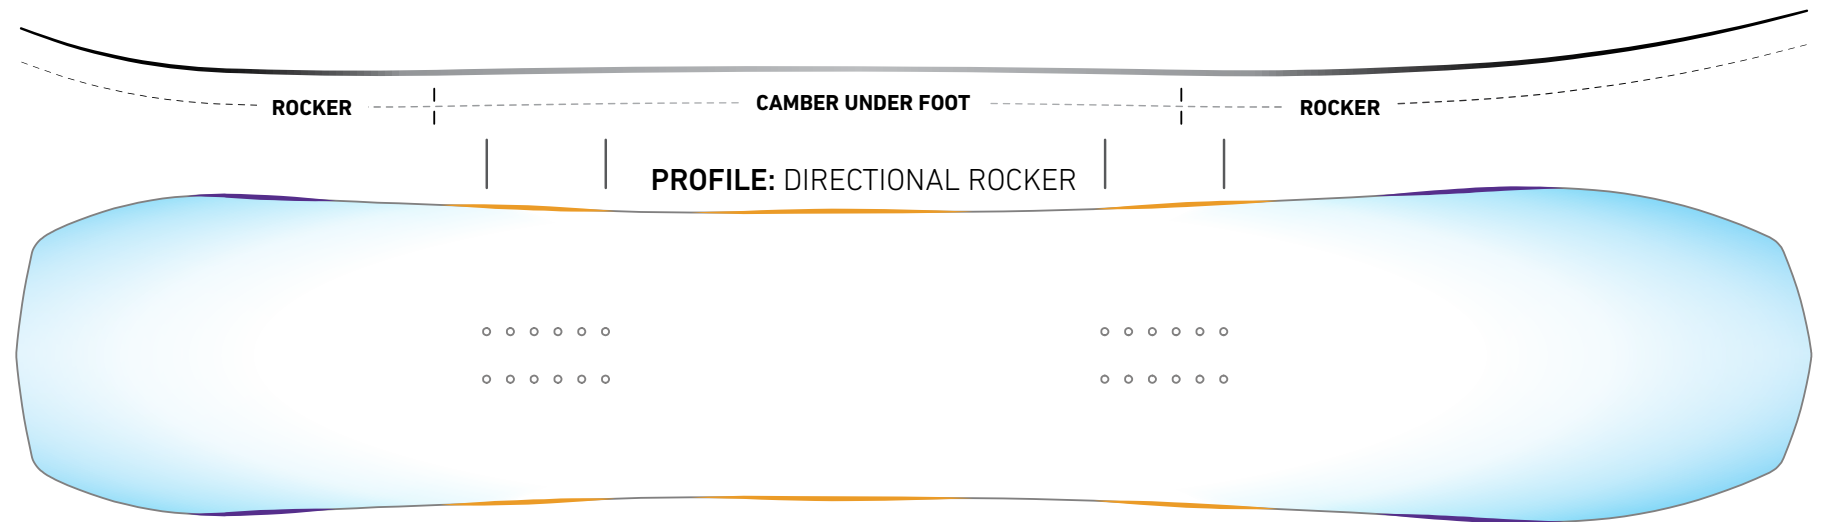

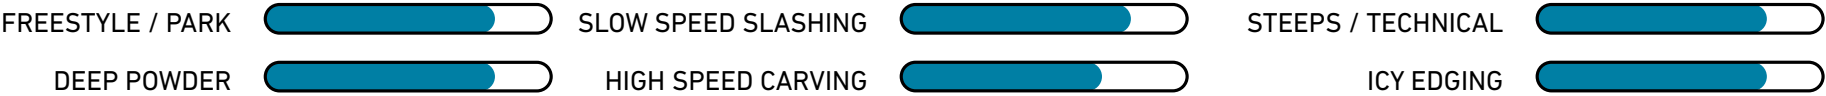

SERIOUS SHRED STICK FOR SMALLER RIDERS

Ideal for freestyle, freeride, pow, corn or chop

The Youth Flagship is a high performance freeride board for youth and small adults who want to confidently explore advanced terrain. Unlike most twin-tipped youth boards, the Youth Flagship features a proven directional shape that offers legit freeride performance on steeps and off piste. The Youth Flagship has a directional rocker profile that excels in variable resort conditions and a tapered directional shape that sinks the tail in pow for better float and glide. The Youth Flagship also features a 3D Contour Base 1.0 that helps eliminate edge catch and improve turn fluidity and Traction Tech 3.0 edges for added grip on icy runs. For speed and durability, the Youth Solution is built with a blazing fast Sintered 8000 base.

Youth Solution

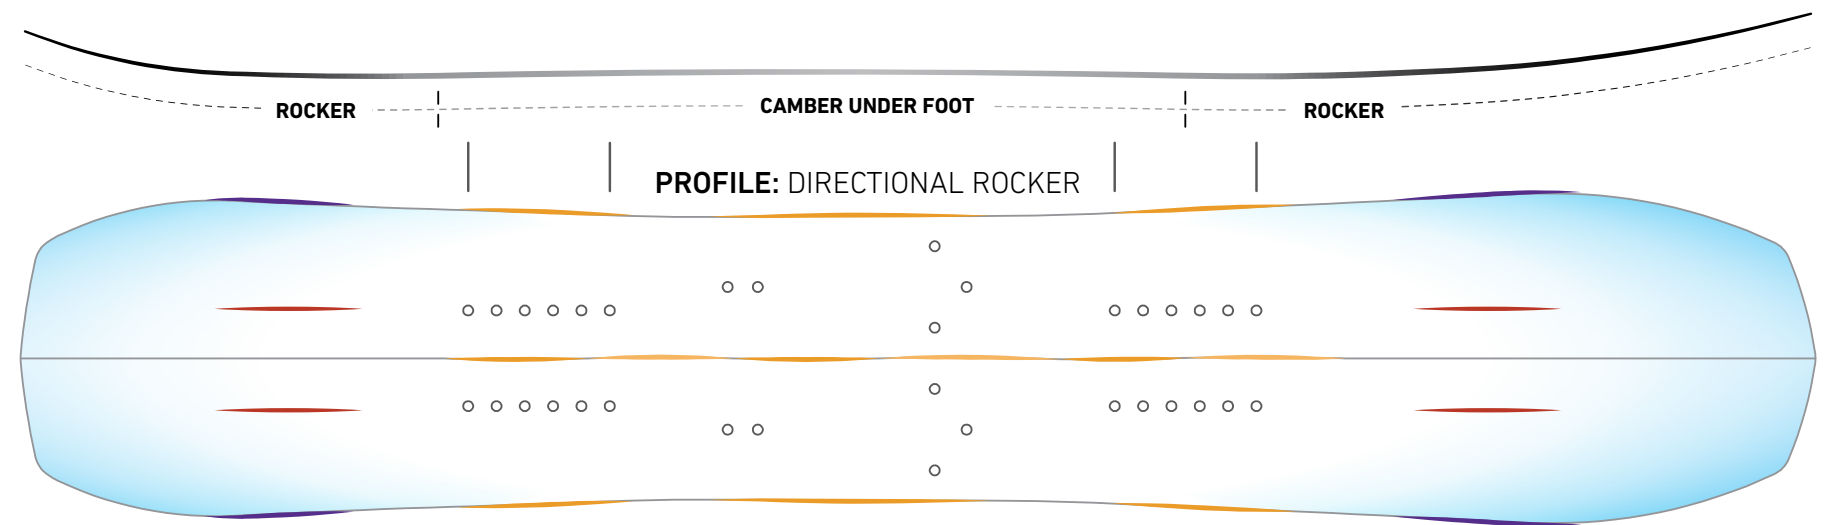

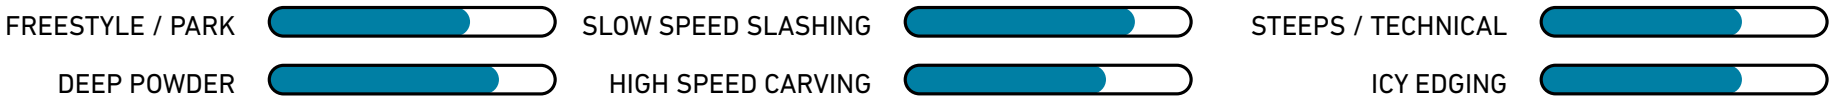

SERIOUS BACKCOUNTRY TOOL FOR SMALLER RIDERS

Ideal for sidecountry and backcountry exploration

The Youth Solution is a high performance splitboard designed for youth and small adults. This fully featured splitboard throws open the door for smaller riders to confidently ride advanced backcountry terrain and explore the wilderness. The Youth Solution has a directional rocker profile that excels in the inevitably variable backcountry snow conditions and a tapered directional shape that sinks the tail for better float in pow. The Youth Solution also features a 3D Contour Base 1.0 that helps eliminate edge catch and improve turn fluidity and Inner/Outer Traction Tech 3.0 edges for added grip on icy skin tracks or firm descents. For speed and durability, the Youth Solution is built with a blazing fast Sintered 8000 base and the Boltless Bridge plus Karakoram Split and Tip + Tail Clips.

Mini Mind Expander

ALTERNATIVE ALL-MOUNTAIN SHREDDER

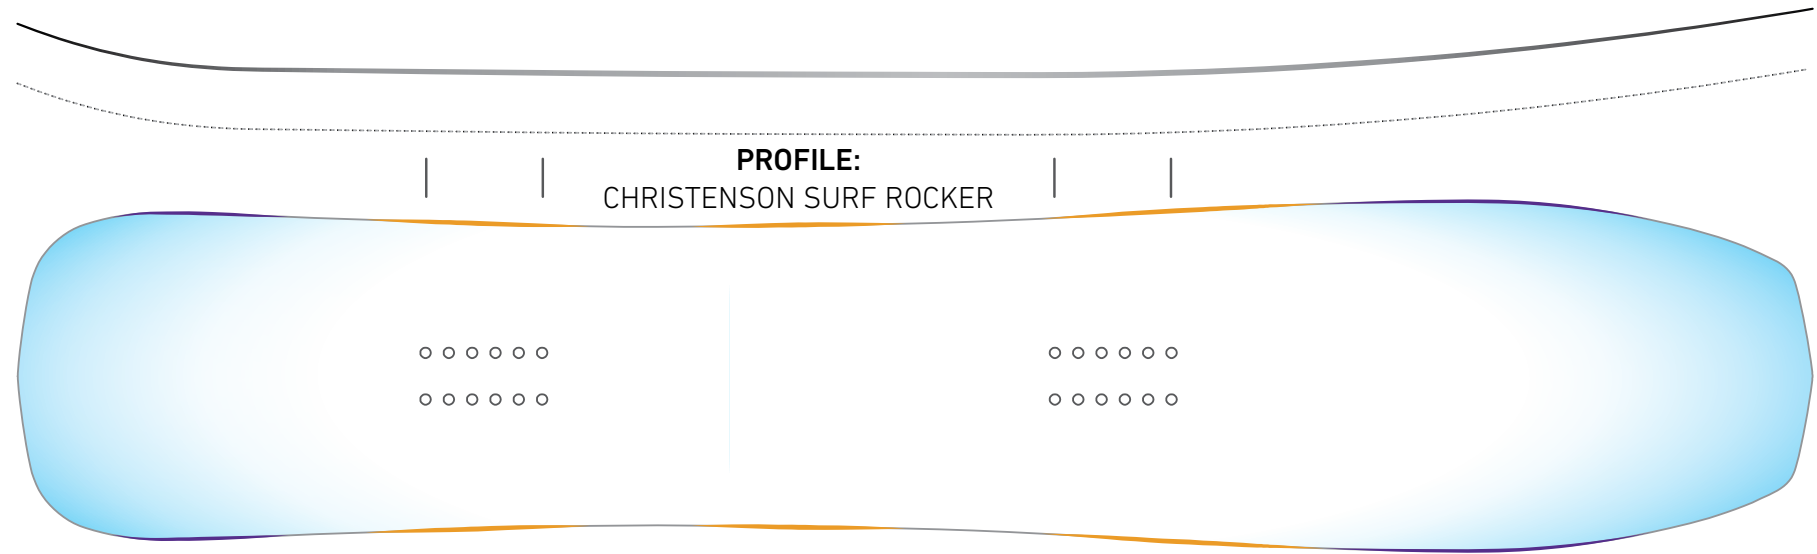

Ideal for small yet inspired slashers

The Mini Mind Expander is a unique surf-inspired shred stick built for youth with the skills to draw creative lines down the mountain. Designed by surf shaper Chris Christenson and Jeremy Jones, the Mini Mind Expander features a Christenson surf rocker profile and a blunted nose for epic float in pow plus a full sized tail for legit freestyle performance. The unique shape is matched with a short sidecut for snappy turn performance and a little wider waist width so the board can be ridden shorter. Youth who can confidently link turns and are looking to blaze their own tracks into the powder deserve this board. For added speed chasing after full grown rippers, the Mini Mind Expander is also built with our ultra fast and durable Sintered 8000 base.

Bindings

The ultimate balance of comfort and response

SKATE TECH

Feel the power in every turn.

Don't let your energy go to waste. If you want to ride stronger, you need a binding that directs every movement you make to your board edges with maximum efficiency and pinpoint accuracy. Jones bindings featuring SkateTech technology are designed to deliver lightning fast response and supreme comfort for unmatched all-day performance.

Reduce

Foot fatigue
and board chatter

Enhance

Board control
and edge hold

Customise

Response
and dampening

” JEREMY JONES

When I first tried SkateTech (NOW bindings) prototype bindings back in 2009, I tested them against the leading tradition binding on two identical boards with the same tune, same stance. I instantly felt the difference: more control, less chatter, less foot pain. Once I felt the power of SkateTech, there was no going back.

NEW

3D Flex Fit 2.0 Toe straps

3D Flex Fit 2.0 toe straps dynamically stretch to fit any shape boot. The new minimalist design is even lower profile and every bit as comfortable, durable and responsive as the original design.

Hanger 3.0

Binding hanger design featuring a wider bushing footprint that's closer to the edges for enhanced board connection and faster energy transfer. The Hanger 3.0 is also lighter weight and has a lower inner lateral wall for better ankle mobility and high volume boot fit.

Intelligent straps

Hinge connectors keep your ankle strap out of the way when you step in to strap in, and curved ladders make it easy to line up the buckle and quickly ratchet down.

Power Spine ankle straps

Two part molded ankle strap with a wider bottom section for flexible comfort and a stiffer center spine for unmatched response. Flip-It Strap compatible (Surf mode vs Freeride mode).

NEW

Comfort Flex ankle straps

Comfort Flex Ankle Straps are 3D molded to evenly distribute pressure and eliminate strap bite plus asymmetric for customizable response. Flip-It Strap compatible (Freeride mode + Surf mode).

NEW

Power ankle straps

Power Ankle Straps are made of durable molded ABS and are wide + asymmetric for enhanced comfort and adjustable response. Flip-It Strap compatible (Freeride mode + Surf mode).

Features

Asym buckles

Bombproof buckles made from aircraft-grade alloy featuring ultra-strong levers and springs. Triple action ratchet design increase speed of entry and release.

4x4, 2x4, EST/Channel disc

All Jones bindings include a mounting disc compatible with traditional 4x4 inserts, 2x4, and EST/Channel mounting system.

Boot fit

MEN'S	SMALL	MEDIUM	LARGE
US	5 - 7.5	7 - 10.5	10 - 13
EU	36.5 - 40	39 - 43.5	43 - 47
MD	23.5 - 25.5	25 - 28.5	28 - 30.5

WOMEN'S	SMALL	MEDIUM
US	5.5 - 8.5	8.5 - 10
EU	36.5 - 40	39 - 42.5
MD	23.5 - 25.5	25 - 27.5

Durability

Designed for durability. Lifetime warranty on binding Hanger and Post. 1 year warranty on all other binding components.

Foot pillows

Comfort Foam foot pillow

Full length EVA foam footbed that maximizes binding comfort while minimizing foot fatigue. The 3D molded footbed surface offers supreme traction for any boot tread pattern and prevents snow build-up.

Response Tri-Foam foot pillow

Premium full length foam footbed made with three different densities of EVA foam. The heel and toe are soft for max comfort, the center is mid-stiff for precise response and the bottom of the footbed is stiff for solid support.

Surf Cant foot pillow

NEW

The Surf Cant Foot Pillow offers 3° of canting to help you unlock more turn power and drive your slashes deeper, harder and faster. Canting can also improve stance comfort by relieving pressure on your knees.

Freeride mode vs Surf mode

Jones bindings offer customizable dampening and response by switching between Surf Mode and Freeride Mode. Surf Mode lets you tweak harder, while Freeride Mode keeps you locked in for maximum response. Switch modes by changing the bushings from soft (Surf Mode) to hard (Freeride Mode) and adjusting the Flip-It ankle straps. The Flip-It strap allows you to interchange the ankle straps between the left and right binding to create custom response. Ride with the ankle straps in Freeride mode for more lateral support and board response or flip the straps into Surf Mode for solid heel support, but more ankle flexibility for getting loose.

Freeride mode

- Position the wide half of the strap above the buckle for more lateral support and board response
- Use Hard Bushings for maximum response

Surf mode

- Position the wide half of the strap below the buckle for solid heel support but more ankle flexibility for getting loose.
- Use Soft Bushings for a looser, more dynamic surf feel.

SPECS

SKATE TECH

Patented

The components of the SkateTech design mimic the function of a skateboard truck. The “Hanger” acts as a lever that transfers energy input from the straps to the “Bushings” and onto the board edges. The “Kingpin” acts as the fulcrum for the “Hanger” and magnifies the energy transfer through leverage. Traditional bindings lose energy when the baseplate flexes and bends unevenly. The energy loss forces you to crank your straps tighter and ride with more forward lean to gain the same control. Uneven pressure and tight straps lead to more foot fatigue and pain. By evenly pivoting over the “Post”, the middle of your board flexes more uniformly and your energy inputs are focused directly on your edge. Your feet stay more relaxed and more comfortable because the bindings transfer power to the board with less work.

① Hanger 2.0 & 3.0

Hanger pivots on the kingpin like a lever, allowing lightning fast edge-to-edge energy transfer. True baseless design that delivers the most even board flex of any binding on the market.

② Kingpin

The kingpin is the fulcrum that the hanger pivots on. Design magnifies energy transfer and enhances board response through leverage,

③ Post

The post attaches the hanger to the kingpin and is the connection between binding and board.

④ Bushings

Bushings are the primary binding contact point and offer customizable response and dampening (Surf mode vs Freeride mode).

Riding flat

SkateTech bindings feature a built-in dampening system for ultimate control bombing flat on your base. The baseplate rests on rubber bushings that absorb vibrations as you ride over rough snow. The binding also follows your every foot movement without altering the flex of the board and offers unmatched board feel for making micro edge adjustments as you ride flat.

Unmatched turn power

Power is transmitted directly to the edge.

When you make a hard heel or toe turn the force you place on your straps and highback is transferred directly to your edge through the hanger, kingpin and post. **By using the mechanical advantage of this pivot and lever system, SkateTech bindings are the most responsive bindings in the world. Once on edge, you are locked in.**

No comparison to tradition bindings

Power is transmitted through the center disk.

When you make a hard heel or toe turn on traditional bindings the pressure you place on your straps goes into the fixed center disk and forces the binding baseplate to bend before power is delivered to the edges. **Energy is concentrated at the center of the board with traditional rigid baseplates which decreases potential turn power compared to SkateTech bindings.**

ORION X RP ROBERTS

THE PLAYFUL FREERIDE BINDING

Ideal for summit to park freestyle and playful freeriding

The new Orion binding is designed for fun focused freeriders who are looking for a comfortable and durable freeride binding with a freestyle friendly medium soft flex. The Orion features SKATETECH technology that transfers your energy directly to your edges through our most advanced Hanger 3.0. The Hanger 3.0 is wider for better boot fit and has an expanded bushing footprint for better energy transfer. The Orion’s Progressive Flex Highback is stiffer at the bottom and gets progressively softer toward the top for a precise and playful binding feel. The Orion can be set up in Surf mode or Freeride mode by switching bushing and interchanging the Comfort Flex Ankle Straps between bindings. The Comfort Flex Ankle Straps are 3D molded to evenly distribute strap pressure and eliminate strap bite. The Orion is also fitted with our new 3D Flex Fit 2.0 toe straps. The low profile 3D Flex Fit 2.0 toe strap is slightly stretchy to conform to any boot shape.

BINDING FEATURES

- Progressive Flex Highback NEW
 - 3D Flex Fit 2.0 toe straps NEW
 - Comfort Flex ankle straps NEW
 - Asym buckles
 - Tool-less strap adjustment
 - Hinge Connector strap attachment + Pre-Curved ladders
- Comfort Foam foot pillow
 - Hanger 3.0 - Nylon reinforced with 30% fiberglass
 - Flushcup Technology
 - Universal Mounting Disc - Compatible with 4x2, 4x4 and EST/Channel

PROGRESSIVE FLEX HIGHBACK

Designed for precise and playful response. Symmetric mid-wide profile and medium flex for carving, tweaking airs and riding switch.

- Dual density design that gets progressively softer from bottom to top
- Stiff lower section for solid carving performance
- Flexible top section for lively freestyle performance
- Tool-less forward lean adjustment
- Highback flex rating: 6

METEORITE

Meteorite

THE DYNAMIC ALL-MOUNTAIN BINDING

Ideal for all-terrain cruising, freestyle and surf slashing

The Meteorite binding is designed for the all-mountain rider that wants a stable and comfortable binding with a tweak-able medium soft flex. The Meteorite delivers precision response thanks to SKATETECH technology that transfers your energy directly to your edges. The Meteorite's Dynamic Flex highback is stiff in the center for solid support and softer on the sides for friendly maneuverability. The Meteorite can be set up in Surf mode or Freeride mode by switching bushing and interchanging the ankle straps between bindings. Surf mode offers maximum tweak-ability, Freeride mode offers maximum response. To keep your boots locked in with no strap bite, the Meteorite is fitted with our new Power Ankle Straps and 3D Flex Fit 2.0 toe straps. The molded Power Ankle Straps are wide and asymmetric for enhanced comfort and adjustable response and the low profile 3D Flex Fit 2.0 toe strap is slightly stretchy to conform to any boot shape. **The Surf Series Meteorite model features a 3 degree canted footbed and a Power Spine Ankle Strap for added turn response.**

Climbing skins

Skintrack proven.

All it takes is one hour in the skin track to realize the importance of solid climbing skins. High performance skins will not only deliver you to dream lines, but they will get you back to the trailhead safe and sound. Jones skins are made in Switzerland by Pomoca, one of the most trusted manufacturers in the industry. We've tested our skins over hundreds of hours in the skintrack and stand by both models as the premier splitboard skins in the world.

Jeremy Jones  Andrew Miller

Made in Switzerland

Jones skins are made in Switzerland by one of the most innovative and trusted skin manufacturers in the world, POMOCA. For the last 40 years POMOCA has produced industry leading skins for high altitude ski mountaineering and randonee racing.

Glide Tech

Glide Tech coating reduces friction on each skin fiber so neither super-cold fresh snow or wet, hot snow will stick to the skin and rob energy-saving glide.

Rubber Safer skins

Jones skins are laminated with a rubber backing that prevents skins from getting waterlogged. Drier skins are safer as they are less likely to lose adhesion to your skis in critical situations.

70% Mohair / 30% Nylon

Jones Nomad and Nomad Pro climbing skins are both made with a blend of 70% mulesing free natural mohair fiber and 30% synthetic nylon. The mohair offers unmatched glide and a supple skin feel while the nylon improves grip and water repellency.

Grip Tech

Grip Tech skins are made with a special material that works well under dynamic tension and has a high resistance to twisting and abrasion.

Ever Dry (bluesign® approved)

Jones skins are treated with EVER DRY anti-glopping treatment. The coating keeps the skins from absorbing moisture and prevents snow/ice build-up under the skin.

Nomad

Ideal for backcountry touring and wilderness exploration

Jones Nomad Climbing Skins are premium splitboard skins that offer the ideal balance of glide, grip and durability. The Nomad skin fibers are 70% Mohair and 30% Synthetic Nylon. The natural mohair fibers deliver exceptional glide in any snow condition because they remain soft and flexible at any temperature. The nylon fibers provide extra traction when the skin track gets steep or icy and improved durability over 100% Mohair skins. Nomad skins are PFC-free and are coated with Bluesign-approved EVER DRY 3.0 Anti-glopping treatment to improve performance in wet snow. Jones Nomad PRO Skins are also laminated with RUBBER SAFER SKIN backing. This rubber layer keeps the skin from absorbing water and makes the skins easier to pull apart. Nomad skins are available in three models: Trim-To-Fit with Universal Tail Clip, Pre-Cut with Quick Tension Tail Clip and Trim-To-Fit with Quick Tension Tail Clip . The Quick Tension Tail Clip adjusts in seconds, provides the perfect skin tension and is compatible with all Jones splitboards 2016 and newer.

Nomad Pro

Ideal for all-seasons, all-conditions backcountry touring

Jones Nomad PRO Skins are the ultimate high performance splitboard skins in any snow condition. The Nomad Pro skin fibers are a blend of 70% Mohair and 30% Synthetic Nylon fibers. This combination of natural and synthetic fibers provides the perfect balance of glide, grip and durability. Nomad Pro skins are PFC-free and have been coated with both Bluesign-approved EVER DRY 3.0 Anti-glopping treatment to improve wet snow performance and GLIDE TECH treatment which helps maintain the glide for the lifetime of the skin. Jones Nomad PRO Skins are also laminated with RUBBER SAFER SKIN backing. This rubber layer keeps the skin from absorbing water and makes the skins easier to pull apart. Nomad Pro skins are available in three models: Trim-To-Fit with Universal Tail Clip, Pre-Cut with Quick Tension Tail Clip and Trim-To-Fit with Quick Tension Tail Clip. The Quick Tension Tail Clip adjusts in seconds, provides the perfect skin tension and is compatible with all Jones splitboards 2016 and newer.

Splitboard poles

Advanced ascent gear, built to last.

Collapsible poles are the four-wheel drive of your backcountry ascent gear. They keep you from slipping and sliding as you ascend the skintrack and give you solid balance in the bootpack.

Forrest Shearer & Harry Kearney  Andrew Miller

Tech highlights

Scraper Grip

The Jones exclusive Scraper Grip has a hard plastic snow scraper built into an ergonomic EVA foam grip. Use the scraper to remove ice from your base and topsheet on the way up or down. The extended foam handle offers secure grip for multiple hand positions.

Snow Claw Basket 2.0

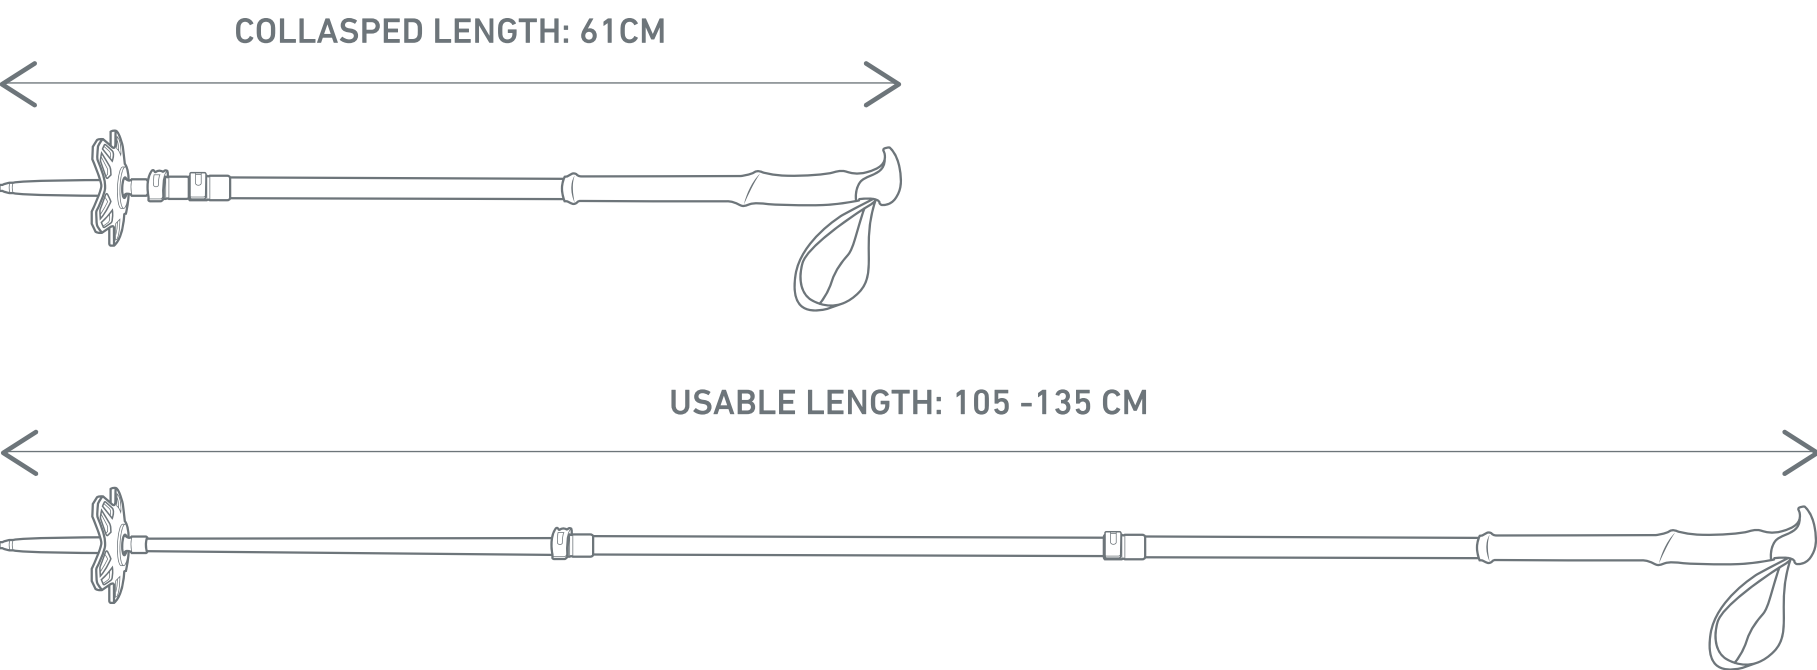

Our Snow Claw 2.0 baskets deliver exceptional traction on firm or soft snow and are easy to plant on any slope angle thanks to a unique basket attachment that floats relative to the pole shaft. The Snow Claw baskets are stiff on the inside for firm snow and softer on the outside for deep snow. Baskets interlock with pole tips for a tighter pole package when strapped to your pack.

Floating Basket

Dynamic basket design that grips the snow at any slope angle by floating relative to the pole shaft at a maximum angle of 32°.

Talon

THE SIMPLE, SOLID POLE

Ideal for freestyle, freeriding and surf slashing

The Talon poles are ultra durable three-section collapsible poles designed for a lifetime of backcountry use and abuse. The Talon features our dual-density Scraper Grip that has a hard plastic snow scraper built into a comfortable EVA foam grip. The scraper can be used for de-icing your base before dropping in or knocking snow off your split skis on the ascent. The Snow Claw 2.0 baskets deliver exceptional traction on firm or soft snow and are easy to plant on any angle slope thanks to a unique basket attachment that floats relative to the pole shaft. The Talon's pole sections are made with 7075-T6 aluminum for maximum durability and the usable length is 105-135cm. Collapsed length is 61cm and the baskets interlock with the pole tips for a tighter package when strapped to your pack. Talon poles are covered by a three-year warranty. Made in Austria.

Outerwear

Environmentally minded and movement focused technical gear built to embrace all of Mother Nature's moods.

Jeremy Jones' ultimate men's and women's outerwear lines balance unmatched all-weather performance and durability with industry leading sustainable manufacturing and material standards. From expeditions, to all-day lift lapping and backyard thrashing, the Shralpinist, Mountain Surf and Uphill collections got you covered no matter where you roam or how you ride. Jones apparel is the future of environmentally minded, movement focused technical gear built for pushing your limits and erasing boundaries.

Outerwear Ethos

We believe there is a better way.

A better way to manufacture apparel so it does less harm, and lasts longer. A better way to protect yourself from nature's wrath without sacrificing comfort, mobility and breathability. And a better way to get more versatility out of fewer pieces, to design clothing that adapts to nature's moods.

When we set out to start making apparel this is what drove us. To do things differently, and bring new winter apparel concepts to the world that blend comfort, performance and sustainability in a fresh look and fit. Every piece in the collection is purposefully designed to be extremely functional to help you unlock your wildest dreams in the mountains.

Every piece in the collection is also built with the most sustainable materials possible.

All of our materials are Oeko-tex and/or Bluesign certified, and a vast majority are recycled. We use only 100% organic cotton, 100% recycled down and 100% non-mulesed merino wool. We also use PFC-Free DWR treatments on all our fabrics, except for GORE-TEX PRO. DWR is a necessary evil of waterproofing and GORE-TEX PRO does not yet offer a PFC-Free DWR option. When they do, we will use it.

The social impact of our products is equally important to us as the environmental impact. Our production facilities are all BSCI or WRAP certified, which guarantees that the people who make our apparel receive fair salaries and that they can work in a safe and clean working environment. As a member of 1% For The Planet, every tee, jacket or pant we sell also gives back and helps protect clean air, clean water and a healthy planet.

This is not about putting our logo on more products. From upcycled down to body mapped GORE-TEX PRO, this is about making cutting edge apparel that performs just like we move through the mountains - with complex simplicity. One foot in front of the other, but no wasted steps, and no wasted energy. This is apparel we believe in every step of the way.

A woman in winter gear stands on a snowy mountain peak, silhouetted against a bright, low sun. A vibrant rainbow arches across the sky to the left. The scene is filled with soft, golden light and a few wispy clouds. The woman is wearing a dark jacket, pants, and a beanie, and is holding ski poles. The overall mood is serene and adventurous.

Women's Outerwear

**Movement focused, sustainably made all-weather
outerwear designed for women.**

Every shredder on the mountain deserves high performance and sustainably made outerwear that offers the confidence to move fast and ride hard in any weather. That was the inspiration behind the new Jones women's outerwear line - to balance a fresh style, comfortable fit and sustainable materials with the technical features you need to ride all day and stay safe in the backcountry. This is outerwear for hard charging women who want to look and feel their best whether skinning up, riding down or celebrating after.

The Shralpinist collection

Storm ready, expedition proven

We believe in the impossible.

With courage, hard work, and the right gear, there are no boundaries. Whether your dream line is in the Himalaya, Alaska or your home range, the Shralpinist collection is built for climbing high, riding hard and pushing your limits in extreme conditions.

SHREDDER + ALPINIST = SHRALPINIST

The Mountain Surf collection

All-conditions, every day comfort

We want to shred every day.

Balancing warmth, comfort, breathability, and durability, the Mountain Surf collection is built to handle any day of the winter and any approach to the mountains. The collection features unique, body-mapped fabric designs that provide protection where you get wet and breathability where you flex and sweat. Chairlift and skintrack proven, the Mountain Surf collection is so versatile and so comfortable you won't want to take it off.

Women's Shralpinist Stretch 3L Jacket

NEW MODEL

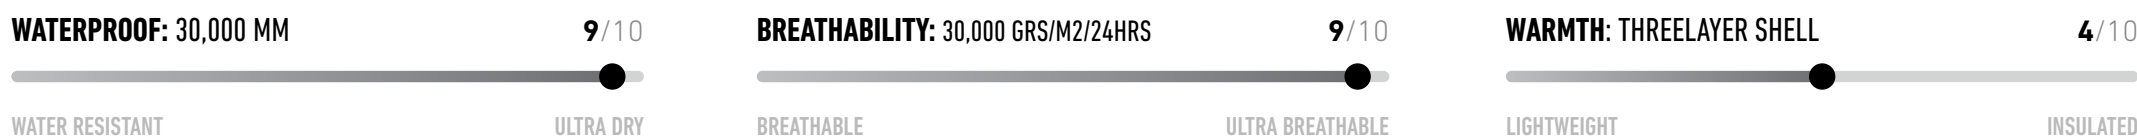

ALL-WEATHER PROTECTION, SUPREME COMFORT

Ideal for backcountry touring and resort ripping

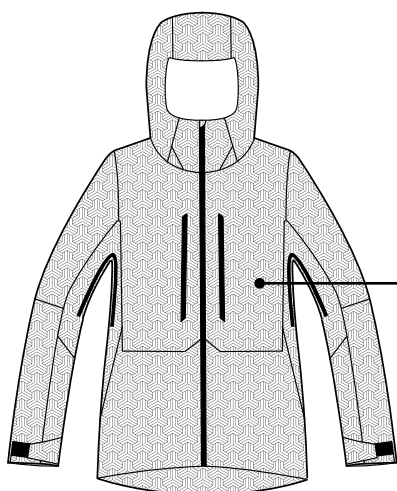

The Women's Shralpinist Stretch 3L Jacket is designed for motivated mountain explorers who's daily adventures require a storm proof shell that's as comfortable as it is functional. The jacket is made from 100% recycled three-layer 30K waterproof / 30K breathable four-way stretch fabric that's soft-to-the-touch and designed to offer supreme protection without ever feeling restrictive. This jacket is built for moving fast in variable weather, and is packed with functional features like four zippered pockets, zippered pit zips, plus a minimalist powder skirt. Blending performance, comfort and sustainability with an ergonomic fit, the Women's Shralpinist Stretch 3L Jacket is the ultimate shell layer for dawn-to-dark tours or bell-to-bell lift lapping.

FIT DESIGN **Regular** | Relaxed yet engineered fit. Ergonomically cut for precise articulation while climbing and riding.

Women's MTN Surf Jacket

NEW MODEL

ALL-CONDITIONS VERSATILITY, EVERY DAY COMFORT

Ideal for all-day adventures in any conditions

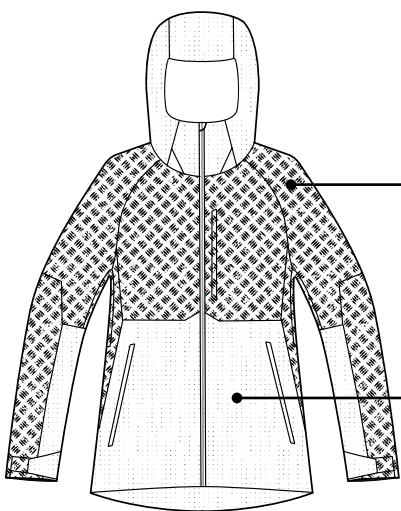

The Women's MTN Surf Jacket is the super cozy, extra comfortable, do everything, ride anything jacket. The jacket features a relaxed fit and a high performance, body mapped fabric layout that uses two unique partially recycled polyester fabrics. The shoulders and arms, where you most often get wet, are made with rugged, abrasion resistant two-layer 20K waterproof / 20K breathable ripstop fabric, and the torso, where temperature regulation is critical, is made with two-layer, four-way stretch 20K waterproof / 20K breathable fabric. Both fabrics are finished with a PFC-free DWR treatment for added storm protection. The jacket is lightly insulated with Primaloft BIO and lined with 100% recycled stretch polyester for those frigid mornings waiting for first chair or leaving the trailhead before dawn. From below zero days to bluebird days, the Women's MTN Surf Jacket offers the warmth and breathability to ride hard and stay dry any day of the season.

FIT DESIGN **Regular** | Refined traditional snowboard fit. Relaxed cut for comfort and freedom of expression.

Women's MTN Surf Anorak

NEW MODEL

ALL-CONDITIONS VERSATILITY, EVERY DAY COMFORT

Ideal for slashin' and bashin' in the resort or backcountry

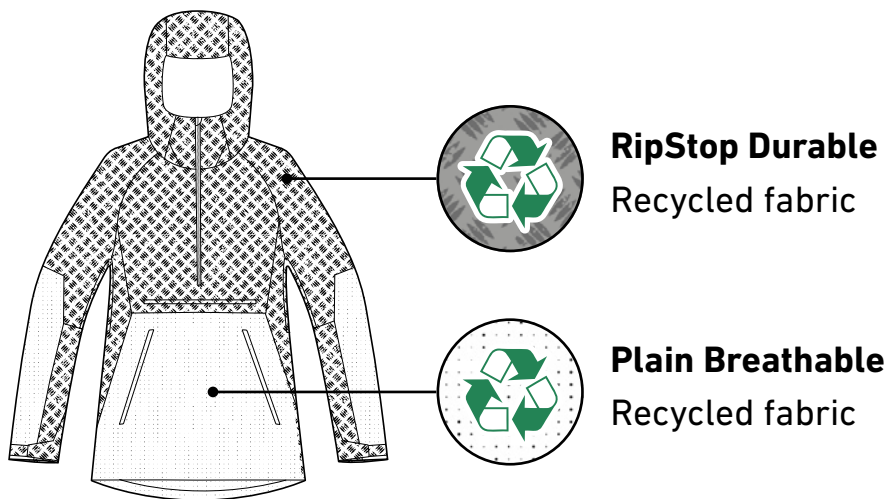

The Women's MTN Surf Anorak offers styley high performance for shredders drawn to the unique fit and performance of a pull over jacket. The anorak features a relaxed cut and a body mapped fabric layout that uses two partially recycled polyester fabrics. The hood and arms, where you most often get wet, are made with rugged, abrasion resistant two-layer 20K waterproof / 20K breathable ripstop fabric, and the torso, where temperature regulation is critical, is made with two-layer, four-way stretch 20K waterproof / 20K breathable fabric. Both fabrics are finished with a PFC-free DWR treatment for added storm protection. A large kangaroo pocket offers the perfect spot to stash a phone or gloves, zippered pit vents for dumping heat, and a side zip that makes it easy to get in and out. Designed to balance comfort and performance with a modern look and fit, the Women's MTN Surf Anorak is ready for action in any terrain or weather condition.

Women’s Re-Up Down hoodie

NEW MODEL

GROUNDBREAKING SUSTAINABILITY, EVERY DAY FUNCTIONALITY

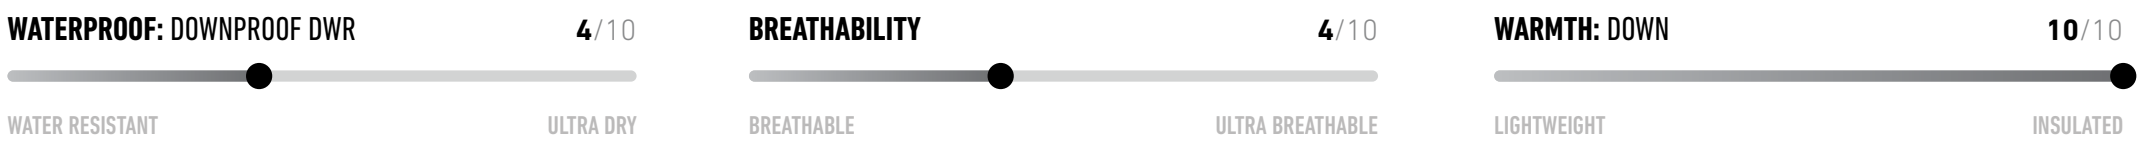

Ideal for backcountry layering and around-town warmth

The first puffy in the world made with 100% recycled fabrics and 100% upcycled 750-fill down.

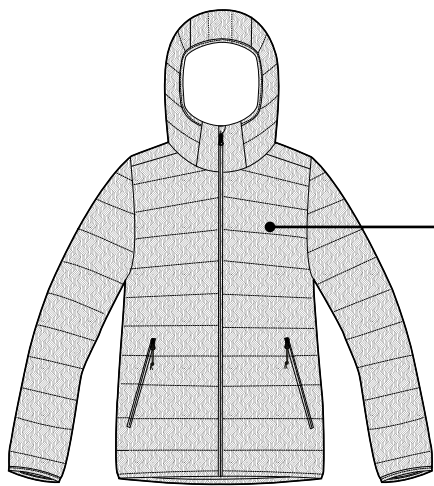

The Re-Up Down Hoodie is your best friend when the temps drop and the flakes start flying. The hoodie offers sustainably produced warmth with the added functionality of an under the helmet hood. It’s made with 100% recycled 750-fill down, plus water repellent 100% recycled outer shell fabric, and is one of the only jackets in the world made with recycled down of such premium quality. To save space in your backcountry pack, the hoodie stuffs into the zippered internal chest pocket. Wear it on it’s own, or slip it under a shell jacket, the Re-Up Down Hoodie is a technical layering piece that will look great, and keep you cozy warm, anywhere from a night on the town to a cold day in the backcountry.

FIT DESIGN **Regular** | Enough articulation to comfortably move in, but still layerable under a shell. To layer over a shell, size up.

Men's Outerwear

**Movement focused, sustainably made
all-weather outerwear.**

Whether breaking new ground or bangin' out hot laps, trailblazing mountain explorers need high performance, sustainably made outerwear that balances comfort, protection and breathability with a fresh look and functional fit. The expanded Jones men's outerwear line is purpose built to raise the bar on sustainable performance and includes three collections of movement focused technical outerwear designed to keep you cool, dry and comfortable in any situation the mountain throws at you.

The Shralpinist collection

Storm ready, expedition proven

We believe in the impossible.

With courage, hard work, and the right gear, there are no boundaries. Whether your dream line is in the Himalaya, Alaska or your home range, the Shralpinist collection is built for climbing high, riding hard and pushing your limits in extreme conditions.

SHREDDER + ALPINIST = SHRALPINIST

The Mountain Surf collection

All-conditions, every day comfort

We want to shred every day.

Balancing warmth, comfort, breathability, and durability, the Mountain Surf collection is built to handle any day of the winter and any approach to the mountains. The collection features unique, body-mapped fabric designs that provide protection where you get wet and breathability where you flex and sweat. Chairlift and skintrack proven, the Mountain Surf collection is so versatile and so comfortable you won't want to take it off.

The Uphill collection

Rapid ascent apparel

We want to explore deep into the mountains.

Jeremy Jones built the Uphill collection for foot powered backcountry adventures that demand long days, covering huge amount of terrain, through ever changing weather. Featuring cutting edge, stretch breathable fabrics, the Uphill collection is designed to keep you cool and comfortable when you're moving, and warm and dry when you stop, so you can focus all your energy on chasing summits and sending lines.

Men's Shralpinist 3L GORE-TEX PRO Jacket

STORM READY, EXPEDITION PROVEN

Ideal for alpine adventures in extreme conditions

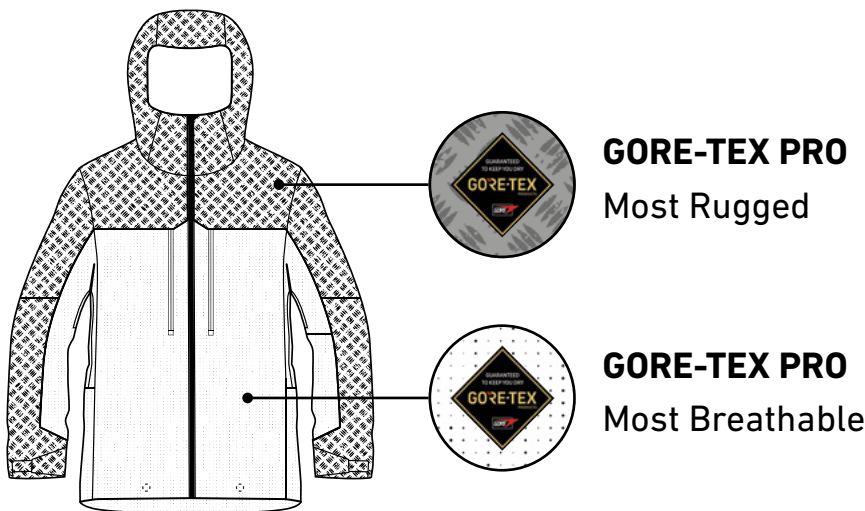

Mother Nature can be ferocious. And when breaking new ground in the mountains, you gotta be ready to deal with it. “Full value” conditions are part of the game. From extreme winds and pounding snow to driving rain, the Shralpinist 3L GORE-TEX PRO Jacket will keep you comfortable in uncomfortable situations, so you can give the mountains the focus they demand. What makes this jacket so unique is its groundbreaking, body mapped GORE-TEX PRO fabric design. The hood and arms, where you get wet, are made with the most rugged GORE-TEX PRO fabric available, and the torso, where temperature regulation is critical, is made with most breathable GORE-TEX PRO fabric available, made with 100% recycled nylon face fabric with solution dyed backer. Balancing comfort, durability and sustainability with an ergonomic fit, the Shralpinist 3L GORE-TEX PRO Jacket is designed for pushing your limits and embracing the unknown.

FIT DESIGN **Regular** | Relaxed yet engineered fit. Ergonomically cut for precise articulation while climbing and riding.

Men's Shralpinist Stretch 3L Jacket

NEW MODEL

ALL-WEATHER PROTECTION, SUPREME COMFORT

Ideal for backcountry touring and resort ripping

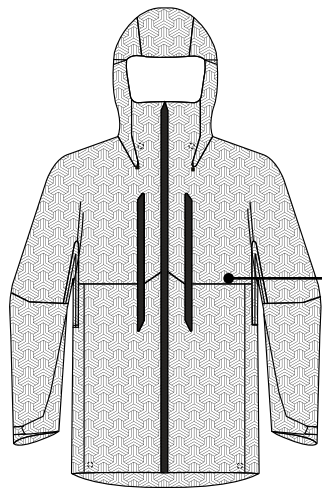

The new Shralpinist Stretch 3L jacket is designed for hard charging mountain explorers who's daily adventures require a storm proof shell that's as comfortable as it is functional. It's made from 100% recycled three-layer 30K waterproof / 30K breathable four-way stretch fabric that's soft-to-the-touch and offers supreme protection without ever feeling restrictive. This jacket is built for moving fast in variable weather, and is designed using an origami-inspired fabric pattern that maximizes mobility and breathability by minimizing taped seams that don't breathe or stretch. The jacket is also packed with functional features like six zippered pockets, zippered pit zips, plus a minimalist powder skirt. Blending performance, comfort and sustainability with an ergonomic fit, the Shralpinist Stretch 3L jacket is the ultimate shell layer for dawn-to-dark tours or bell-to-bell lift lapping.

Men's MTN Surf Jacket

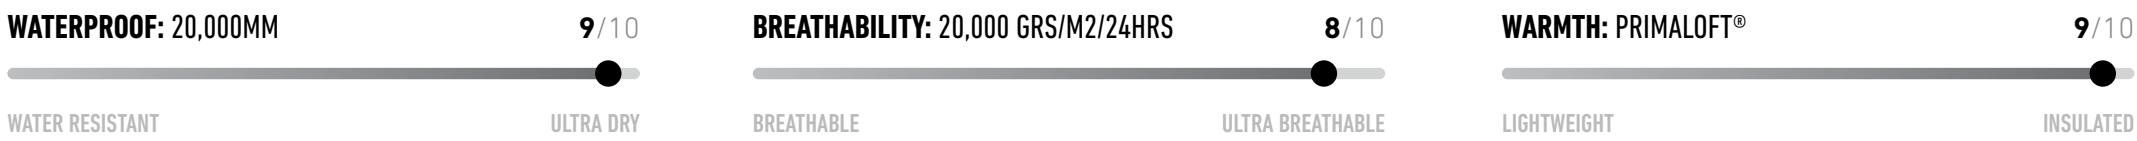

ALL-CONDITIONS VERSATILITY, EVERY DAY COMFORT

Ideal for all-day adventures in any conditions

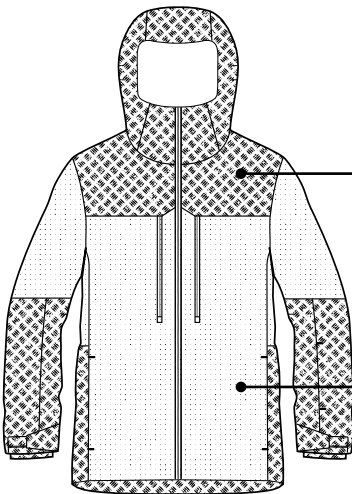

The MTN Surf Jacket is the super comfortable, do everything jacket for shredders who want to ride-it-all. The jacket features a relaxed fit and a high performance, body mapped fabric layout that uses two partially recycled polyester fabrics. The hood and arms, where you most often get wet, are made with rugged, abrasion resistant two-layer 20K waterproof / 20K breathable ripstop fabric, and the torso, where temperature regulation is critical, is made with two-layer, four-way stretch 20K waterproof / 20K breathable fabric. Both fabrics are finished with a PFC-free DWR treatment for added storm protection. The jacket is also lightly insulated with Primaloft Bio and lined with 100% recycled stretch polyester for those chilly mornings waiting for first chair or leaving the trailhead before dawn. From frigid storm days to warm bluebird days, the MTN Surf Jacket offers the warmth and breathability to ride hard and stay dry any day of the season.

The hood and arms, where you most often get wet, are made with rugged, abrasion resistant two-layer 20K waterproof / 20K breathable ripstop fabric, and the torso, where temperature regulation is critical, is made with two-layer, four-way stretch 20K waterproof / 20K breathable fabric. Both fabrics are finished with a PFC-free DWR treatment for added storm protection. A large zippered dump pocket offers the perfect spot to stash a phone or gloves, zippered pit vents for dumping heat, and a side zip that makes it easy to get in and out. Designed to balance comfort and performance with a modern look and fit, the MTN Surf Anorak is ready for action in any terrain or weather condition.

FIT DESIGN **Regular** | Refined traditional snowboard fit. Relaxed cut for comfort and freedom of expression.

Men's MTN Surf Pants

NEW MODEL

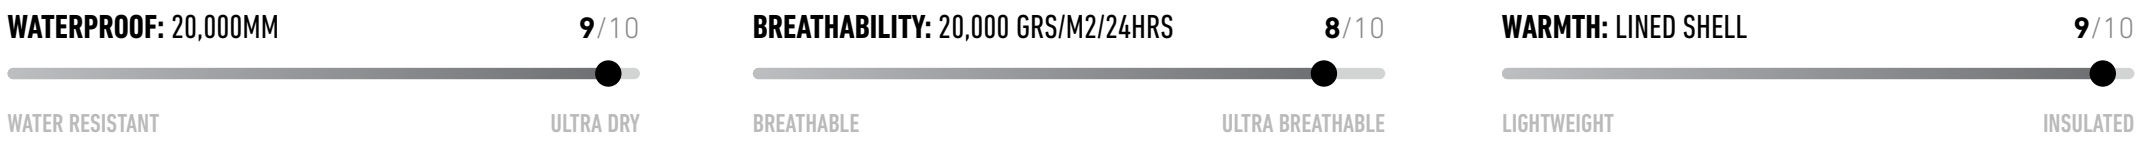

ALL-CONDITIONS VERSATILITY, EVERY DAY COMFORT

Ideal for every day resort and backcountry shredding

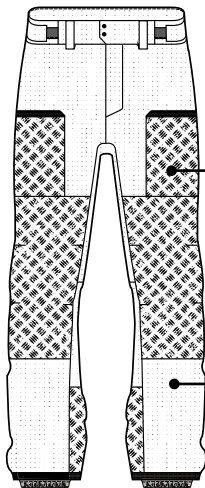

The new MTN Surf Pants are storm proof shred pants that are as comfy as your favorite jeans. They feature a relaxed fit and a high performance, body mapped fabric layout that uses two unique two-layer polyester fabrics. The seat and knees, where you most often get wet, are made with rugged, abrasion resistant 20K waterproof / 20K breathable ripstop fabric, and the torso and thighs, where heat is generated as you move, are made with four-way stretch 20K waterproof / 20K breathable fabric. Both fabrics are made with 50% recycled material and are finished with a PFC-free DWR treatment for added storm protection. These pants are also lined with 100% recycled stretch polyester for a little extra warmth on chilly mornings. Offering the perfect balance of mobility, breathability and protection, the MTN Surf Pants are so comfortable you won't want to take them off.

FIT DESIGN **Regular** | Relaxed yet engineered fit. Ergonomically cut for precise articulation while climbing and riding.

Men's Peak Bagger Jacket

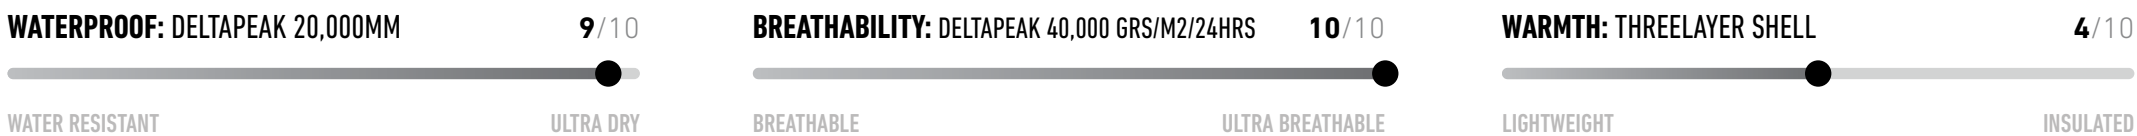

HIGH PERFORMANCE FOR HIGH ENERGY ADVENTURES

Ideal for high output backcountry touring

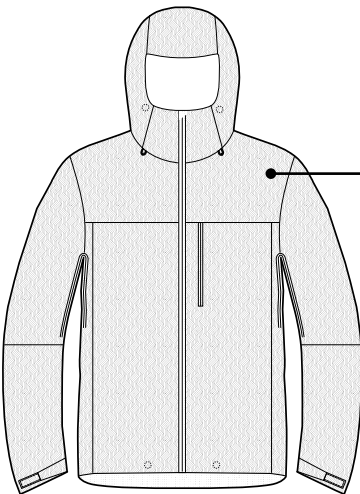

When it comes to gear, we are not a fan of compromises. To hike and explore to our full potential we need waterproof AND breathable outerwear. The Peak Bagger Jacket is a lightweight jacket with a tailored fit that's built for dynamic days in the mountains. Made for dark starts straight through to afternoon squalls, the Peak Bagger is made with a Jones exclusive 100% recycled fabric that offers remarkable four-way stretch, 20K waterproof / 40K breathable performance. The two-layer fabric is soft-to-the-touch, abrasion resistant and finished with a PFC-free DWR treatment for added storm protection. The Peak Bagger is also packed with functional features like a zippered chest pocket, zippered hand warmer pockets and two internal drop pockets. Set your pace and go big with perfect all-day temperature regulation in this jacket that's designed to keep you dry all day, inside and out.

FIT DESIGN **Regular** | Refined mountaineering fit. Designed for dynamic movement while skinning or billy-goating.

Men's High Sierra Pro Pants

NEW MODEL

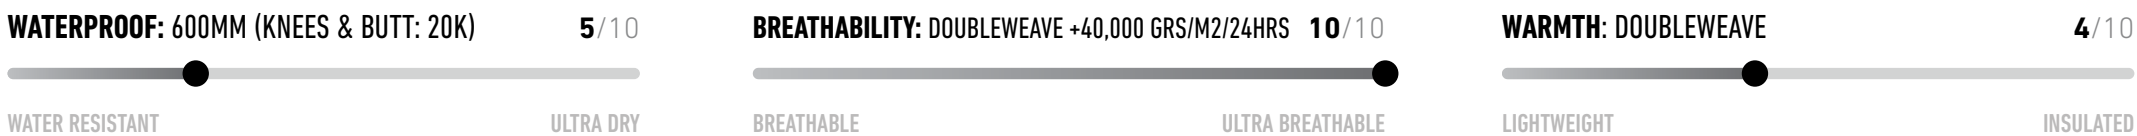

HIGH PERFORMANCE FOR HIGH ENERGY ADVENTURES

Ideal for high output backcountry touring

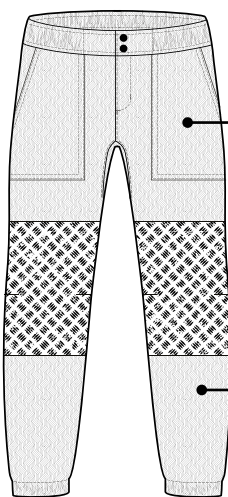

The new High Sierra Pro Pant asks you to open your mind to a high performance touring pant alternative. The pants evolved from the High Sierra Stretch Pants and feature the same movement focused fit and function, but with the added protection of rugged two-layer 20K waterproof / 20K breathable stretch fabric on the seat and knees. The body mapped fabrics offer added insurance if you get caught in a rogue storm or you're slashing around in sloppy slush. Featuring a tailored fit and super breathable, four-way stretch, abrasion resistant base fabric, the High Sierra Pro Pants are the ultimate touring pants for endurance days in the skintrack covering a wide variety of terrain.

FIT DESIGN **Regular** | Refined mountaineering fit. Loose in thighs for dynamic movement, trim in cuffs for no crampon catch. Size up for a looser fit.

Men's Re-Up Down Puffy

THE RE-UP REVOLUTION

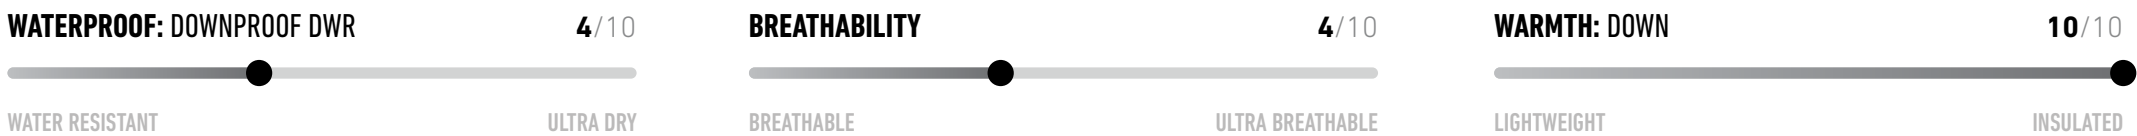

Ideal for backcountry layering and around-town warmth

The first puffy in the world made with 100% recycled fabrics and 100% upcycled 750-fill down.

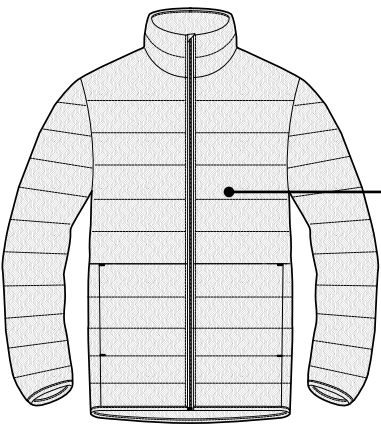

The Re-Up Puffy is simple, sustainable warmth for your body and soul. It's made with 100% recycled 750-fill down, plus water repellent 100% recycled outer shell fabric, and is one of the only jackets in the world made with recycled down of such premium quality. The Re-Up is a workhorse utility puffy that's perfect for slipping into on a windy summit, layering under a shell jacket on a brisk mid-winter resort day, or tossing on for a night on the town. To save space in your backcountry pack, the hoodie stuffs into the zippered internal chest pocket. The Re-Up puffy is on Jeremy Jones' back, or in his pack, every time he leaves the trailhead.

FIT DESIGN **Regular** | Enough articulation to comfortably move in, but still layerable under a shell. To layer over a shell, size up.

Men's Re-Up Down Hoodie

NEW MODEL

GROUNDBREAKING SUSTAINABILITY, EVERY DAY FUNCTIONALITY

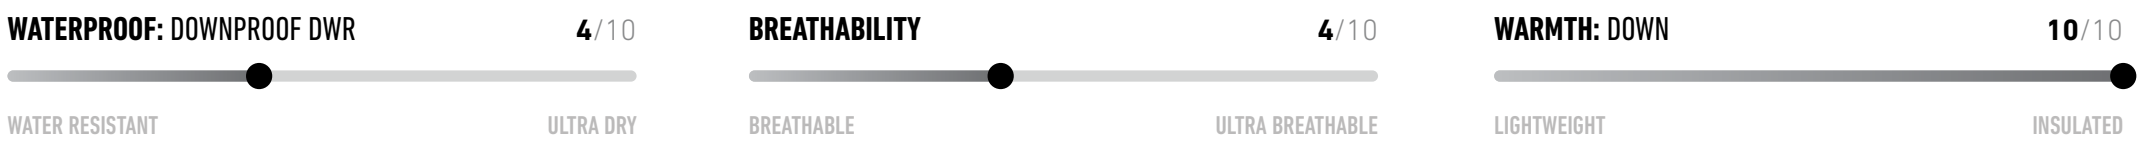

Ideal for backcountry layering and around-town warmth

The first puffy in the world made with 100% recycled fabrics and 100% upcycled 750-fill down.

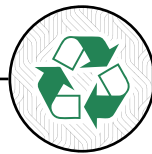

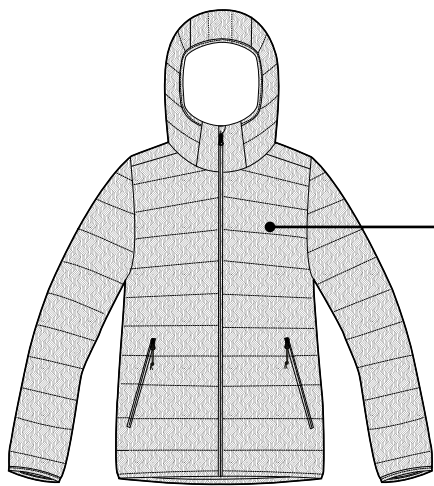

The new Re-Up Down Hoodie is your best friend when the temps drop and the flakes start flying. The hoodie offers the same sustainable warmth as the Re-Up Down Puffy with the added functionality of an under the helmet hood. It's made with 100% recycled 750-fill down, plus water repellent 100% recycled outer shell fabric, and is one of the only jackets in the world made with recycled down of such premium quality. To save space in your backcountry pack, the hoodie stuffs into the zippered internal chest pocket. Wear it on it's own, or slip it under a shell jacket, the Re-Up Down Hoodie is a technical layering piece that will look great, and keep you warm, anywhere from downtown to the backcountry.

FIT DESIGN **Regular** | Enough articulation to comfortably move in, but still layerable under a shell. To layer over a shell, size up.

Backpacks

Functional designs, made for movement

When you are one with your pack in fit and function, it is a game changer. You move faster and conserve energy to ride stronger when your food and water are close at hand and your gear is locked down tight. We live and breathe backcountry snowboarding so we design our packs to be perfect for what we do. Jones packs are built to feel like a natural extension of your body as you move through the mountains. The DSCNT packs were designed for riding dynamic, technical terrain. They include all the features you need for efficient backcountry travel contained in a modern shape that disperses weight evenly over your entire torso to keep you center of gravity tight.

DSCNT 32L

Ideal for long technical backcountry tours

The DSCNT 32L is designed for long tours and technical objectives that demand you carry the full kit. Featuring a streamlined rectangular shape that evenly distributes weight and volume over the center of your torso, the DSCNT 32L is built for both ascent and descent performance. The main compartment will easily swallow crampons, food, water and layers with separate accessory pockets and sleeves to organize your avy tools, skins, goggles, helmet, camera and keys. When it comes time to bootpack, vertical board carry straps plus side ski-carry straps allow multiple options for carrying your board and a back panel zipper to the main pocket provides access to your gear even with the board attached. The DSCNT 32L is built with PVC-free 450D nylon.

PACK FEATURES & TECHNOLOGY

- Avy tools pocket
- Fleece lined goggle pocket
- A-frame split-ski carry mode
- Helmet holder
- Internal zipper pocket with key clip
- Dual ice axe loops
- Back panel cargo access
- Thermo-molded foam back panel
- Dual hip belt pockets
- Integrated safety whistle
- Ergonomic comfort shoulder straps
- Hydro-pocket with insulated sleeve
- Reflective strap accents
- Internal aluminum suspension frame
- Hip belt gear loop
- Avy rescue protocol info panel

SPECS

Size: H-52 / W-30 /D-18

DSCNT 32L R.A.S.

Ideal for long technical tours in avalanche prone terrain

The DSCNT 32L RAS pack is the ultimate tour pack for technical backcountry terrain. It has all the features of the DSCNT 32L pack plus the pockets that hold the MAMMUT Removable Airbag 3.0 system. The Removable Airbag 3.0 system allows you to use the pack with or without the airbag installed and utilizes compressed air instead of nitrogen so you can deploy the bag before a plane trip and then easily refill the canister at your destination (North American Canister Only). **Removable Airbag 3.0 system and canister sold separately by MAMMUT.**

PACK FEATURES & TECHNOLOGY

- Avy tools pocket
- Fleece lined goggle pocket
- A-frame split-ski carry mode

DSCNT 25L

Ideal for intermediate backcountry tours

The DSCNT 25L is a mid-size touring pack designed to hold everything you need for a basic backcountry mission. The pack’s contoured profile is purposefully designed for ascent/descent performance and keeps the weight of your gear evenly distributed in the center of your torso. The DSCNT 25L’s highlight features include a main pocket with dual internal accessory pockets and a hydration sleeve, a dedicated avy tools pocket, a fleece lined goggle pocket, dual hip pockets, a stowable front panel helmet holder, a thermo molded back panel, reflective strap accents and a removable safety whistle. When it comes time to bootpack, vertical board carry straps plus side ski-carry straps allow multiple options for carrying your board. The DSCNT 25L is built with PVC-free 450D nylon.

PACK FEATURES & TECHNOLOGY

- Avy tools pocket
- Fleece lined goggle pocket
- A-frame split-ski carry mode
- Helmet holder
- Internal zipper pocket with key clip

DSCNT 19L

Ideal for sidecountry and quick tours

The DSCNT 19L pack is a sleek sidecountry and quick tour pack that’s the perfect size for the bare essentials - avy tools, water, snacks and a layer. The pack’s compact profile is designed to keep your center of gravity tight on the way down and your board locked to your back when you hit the bootpack. The DSCNT 19L’s highlight features include a main pocket with an internal accessory pocket and avy tool sleeves, a fleece lined goggle pocket, a stow-able front panel helmet holder, a thermo molded back panel, a hydration sleeve, reflective strap accents and a removable safety whistle. All of the board straps and the hip belt can also be tucked away for streamlined use off the slopes. The DSCNT 19L is built with PVC-free 450D nylon.

PACK FEATURES & TECHNOLOGY

- Fleece lined goggle pocket
- A-frame split-ski carry mode
- Helmet holder
- Internal zipper pocket with key clip
- Ice axe loop
- Thermo-molded foam back panel
- Integrated safety whistle
- Ergonomic comfort shoulder straps
- Hydro-pocket with insulated sleeve
- Reflective strap accents
- Internal aluminum suspension frame
- Avy tools slots

Escape board bag

Ideal for road trips, bus, train and quick plane travel

The DSCNT 25L is a mid-size touring pack designed to hold everything you need for a basic backcountry mission. The pack’s contoured profile is purposefully designed for ascent/descent performance and keeps the weight of your gear evenly distributed in the center of your torso. The DSCNT 25L’s highlight features include a main pocket with dual internal accessory pockets and a hydration sleeve, a dedicated avy tools pocket, a fleece lined goggle pocket, dual hip pockets, a stowable front panel helmet holder, a thermo molded back panel, reflective strap accents and a removable safety whistle. When it comes time to bootpack, vertical board carry straps plus side ski-carry straps allow multiple options for carrying your board. The DSCNT 25L is built with PVC-free 450D nylon.

PACK FEATURES & TECHNOLOGY

- Fully padded shell
- Water resistant PVC-free exterior fabric
- Zippered exterior pocket
- Exterior ID window pocket
- Removable shoulder strap
- Side carry handle

SPECS

Size: H-20 / W-30 / D-170 (Fits up to a 166cm board)
Weight: 1.28 kg
Color: Black
Fabric: PVC Free 600D polyester

Adventure board bag

Ideal for long distance and plane travel

The DSCNT 19L pack is a sleek sidecountry and quick tour pack that’s the perfect size for the bare essentials - avy tools, water, snacks and a layer. The pack’s compact profile is designed to keep your center of gravity tight on the way down and your board locked to your back when you hit the bootpack. The DSCNT 19L’s highlight features include a main pocket with an internal accessory pocket and avy tool sleeves, a fleece lined goggle pocket, a stow-able front panel helmet holder, a thermo molded back panel, a hydration sleeve, reflective strap accents and a removable safety whistle. All of the board straps and the hip belt can also be tucked away for streamlined use off the slopes. The DSCNT 19L is built with PVC-free 450D nylon.

PACK FEATURES & TECHNOLOGY

- Fully padded shell
- Water resistant PVC-free exterior fabric
- Zippered interior pocket
- Exterior ID window pocket
- Top and side carry handles
- Oversized wheels and skid plate

Expedition board bag

Ideal for travellers and international explorers

The Expedition Board Bag is a fully padded roller bag built to carry multiple boards and gear to any snowy location on the planet. It's lightweight, high volume and tricked out with just the right amount of pockets and handles to handle any travel challenge you throw at it. The main compartment has reinforced straps to secure 2-3 boards plus two removable pouch pockets for carrying boots, bindings and avy gear. Small items can be stashed in the dual zippered pockets on either side of the top lid. On the exterior, dual compression straps keep your load solid and six carry handles allow you to pick it up from any side. Oversized wheels and a skid plate keep the Expedition rolling smooth from the terminal to the city streets. The Expedition is available in one size and fits up to a 166cm board.

PACK FEATURES & TECHNOLOGY

- Fully padded shell
- Water resistant PVC-free exterior fabric
- Main pocket board straps
- (2) removable pouch pockets
- Zippered, mesh interior pocket
- Zippered exterior pocket
- Exterior ID window pocket
- Dual compression straps
- Removable shoulder strap
- Dual side, top and end carry handles
- Oversized wheels

SPECS

P.O.P.

For more information about our P.O.P., please download the program from the online Resource Center.

Wood poster #1

Solid wood printed poster featuring our tagline.

Size: 80 x 60 cm

Wood poster #2

Solid wood printed poster featuring our mission statement.

Size: 80 x 60 cm

Wall sign

Solid wood Jones logo sign. Includes shelf display stand.

Size: 45 x 34 cm

Coir floor mat

Natural coir floor mat.

Size: 70 x 47 cm

Board stand

Solid wood, collapsible board stand with raised, contrasting logo.

Size: H-56 / W-35 / D-5 cm

Wood binding shelf

Beech wood binding display shelf with laser engraved details.

Size: H-7 / W-26 / D-20.5 cm

Wood binding display

Solid wood binding display with printed binding tech info panel.

Size: H-44 / W-22cm / D-20.5 cm

Wood Jones display

Solid wood display with printed brand info and mission statement panel.

Size: H-36.5 / W-20cm / D-11.5 cm

Wax scraper

Triangle wax scraper. Made with recycled acrylic.

Size: 117 x 135 mm

Opinel knife

Wood handled pocket knife. Made by Opinel, a French knife manufacturer since 1890.

Split scraper

Scraper designed to clear ice and snow from your splitboard hardware. Made with recycled ocean plastics.

Size: 5.5 x 10 cm

Wax

Premium wax made with non-gmo plant based speed additives. Collaboration with WEND wax. Universal temp (10 to 40°F / -12 to 5°C).

Size: 98 x 80 mm

P.O.P.

Front

Back

The Journey Organic Cotton Tee

Made with 100% organic cotton. Shop staff only.

Sizes: XS to XL

Neckwarmer - Safety red

Made with REPREVE® 100% recycled polyester. Shop staff only.

Consumer sticker pack

12 stickers, 1 die-cut sticker, 2 iron-on patches

Size: Packed in A5 envelope with bar code

Shop sticker pack

76 stickers (60 consumer, 15 die-cut in 3 sizes, 1 Authorized Dealer).

Size: Packed in A5 envelope with bar code

Distributor sticker pack

545 stickers (500 consumer, 30 die-cut in 3 sizes, 10 Authorized Dealer and 5 EPICenter).

Size: Packed in A3 envelope with bar code

Tents/Banners

Complete folding tent 3x3m

Complete, ready-to-use tent package - 50mm aluminum tent frame, printed roof, printed back wall and 4x tent stakes. Packed in a roller bag.

Size: H-66 / W-26 cm

Black tent banner - 100x35cm

Durable vinyl banner with attachment eyelets in each corner.

Size: 100 x 35 cm

Black banner - 300x105cm

Durable vinyl banner with attachment eyelets around the sides and in each corner.

Size: 300 x 105 cm

Black beach flag - 4.5m

Ready-to-fly beach flag with ground spike. Packed in a carry bag.

Size: 4.5 meters

P.O.P.
