

YES.

The Master construction is a perfect harmony of different wood densities and wood species which lightens up the core and results in the best weight-to-performance-to-power ratio resulting in an ultra strong, uber-responsive, lightweight and high performance core.

6000

A fast base with a diamond structured finish, this base is all about speed and is resistant to impact. This base also has high wax absorption qualities.

9000

100% Eco base that is the fastest base available in the market. Produced with carbon, this base has a high molecular structure, this base is our most durable base in the range of base materials.

DIE-CUT

The Vibra-Kevlar delivers a comfortable ride that reduces vibration and chatter under your feet that will allow you the confidence in going bigger and faster no matter what the mountains throws at you.

Linseed fiber and basalt are the perfect match to replace and improve the standard fibre glass as this combination is stronger than standard triax glass. The natural qualities also allow for a damper more responsive ride.

This is the **ULTIMATE TRACTION**. Engineers have taken serrated edges to another level! In positioning 5 bumps strategically on the board's effective edges, the snowboard will be more reactive in any terrain and way more fun. Try it, and you will never go back to normal edges.

Our glass that combines 90 degree weaved fibers as well as 30 degree fibers allows for greater torsional response resulting in one of the most lively rides, especially for more aggressive riders and for more difficult terrain types, this is the perfect glass for the high performance rider in mind.

8000

Our specifically developed sintered base with carbon nano particles added to provide exceptional glide. This base is very impact resistant.

**DIAMOND
STONE FINISH**

Stone and Diamond structured base on 2 axes to maximize glide and to optimize the durability of the base.

The advantage of strategic carbon placement in our boards allows for better response, increased POP and stiffness to allow for more aggressive riding as well as giving you a more damp ride in all conditions.

By reducing the wood and the fiber in the nose and tail and reinforcing them with light materials such as Carbon and Kevlar, the Freeflex technology allowed us to lighten up the board in the nose and tail. Our Freeflex technology also dampens vibrations and provides a unique light feel in turn transitions, due to its reduced thickness and profile.

This invention will allow you to ride hard, artificial and icy snow as you have never done before. The board's shape and its positioning allow to minimize the surface of pressure by 75%, and multiply by 3 the grip, for the same power of pressure developed by the rider.

POP CORE

The freestyle core of excellence of our entire lineup. We added ash in the tail and in the nose and found the perfect blend of materials to deliver you the best POP of any snowboard offered today. The Poplar and Beech also is a very lively and responsive core of all around riding.

THE BASIC

WHEN WE STARTED BRAINSTORMING ABOUT THIS BASIC MODEL FOR 11/12 SEASON WE WANTED TO HAVE SOME EXPERIMENTAL PROGRESSION WITH THE COLORS. SO I DIGGED A LITTLE FURTHER WITH OUR IN-HOUSE DESIGNER MATT LAROCHE AND WE CAME WITH THE CONCEPT OF TONE ON TONE WHICH IS REALLY EASY BUT ALSO GIVES A SPECIAL EFFECT TO THE GRAPHIC! SOMETIMES SIMPLE IDEAS MAKE THINGS LOOK GOOD!

Romain de Marchi, 2010.

GREAT WOMEN

SOPHIA, MARILYN, BRIDGET, AUDREY, ELIZABETH & IMAN, SOME OF THE MOST BEAUTIFUL & ICONIC WOMEN TO EVER WALK THIS EARTH. ALL THE BEAUTIES ARE FROM DIFFERENT PLACES WITH DIFFERENT BACKGROUNDS THEY ALL HAVE HAD VERY DIFFERENT EXPERIENCES & UNIQUE CAREER PATHS, BUT WITH ALL THE DIFFERENCES THEY ALL HAVE COME TO THE FOREFRONT OF MODERN WORLD, PROVING THE UNIQUE, HUMAN ABILITY, TO APPRECIATE BEAUTY. WITH THIS SERIES WE WANTED TO EXPLORE THE UNIQUENESS, BUT AT THE SAME TIME THE SIMILARITIES, BETWEEN THE THINGS WE ALL HAVE IN COMMON. ONE WORLD, ONE PEOPLE, ONE LOVE. CPDC2010.

TDF

TADASHI'S BOARD SERIES IS BASED ON A JAPANESE TRADITION. KOI-NOBORI (KOI SHAPED STREAMERS) ARE FLOWN ON CHILDREN'S DAY IN JAPAN. THEY ARE FLOWN IN ORDER OF SIZE AND COLOR TO REPRESENT A FAMILY. THE GRAPHICS DEPICT THE KOI-NOBORI FAMILY FLYING DURING SUNSET, AS THOUGH THEY ARE ALL PLAYING TIL THE SUN GOES DOWN. TADASHI ALWAYS LIKE TO KEEP HIS SIGNATURE BOARD GRAPHICS LIGHT HEARTED AND PLAYFUL. A TRADITIONAL JAPANESE CHILDREN'S THEME FOR THE NEW FATHER OF TWINS, THE GRAPHICS SEEMED FITTING FOR TADASHI'S GRAPHICS FOR YES NOW BOARD THIS SEASON.

Kenta Goto, 2010.
